

1) Material : pre-cut and numbered 4mm plywood parts, motors, battery box, remote controller

All DIY wooden moving dinosaur has passed the test of EN71,ASTM963,RoHs,CE.

2) Assembled sizes :407x160x295 mm

3) Function: Can walk, bite, roar after assembled.

4) It's a diy wooden toy, should be built by yourself.

### Three Control Approaches

#### **1,Remote control**

When Dinosaur is switched to the remote control mode, it is capable of controlling it to move, bite and roar.

#### **2,Light control**

Under non-remote control,the light change can make the dinosaur move and make different sounds.

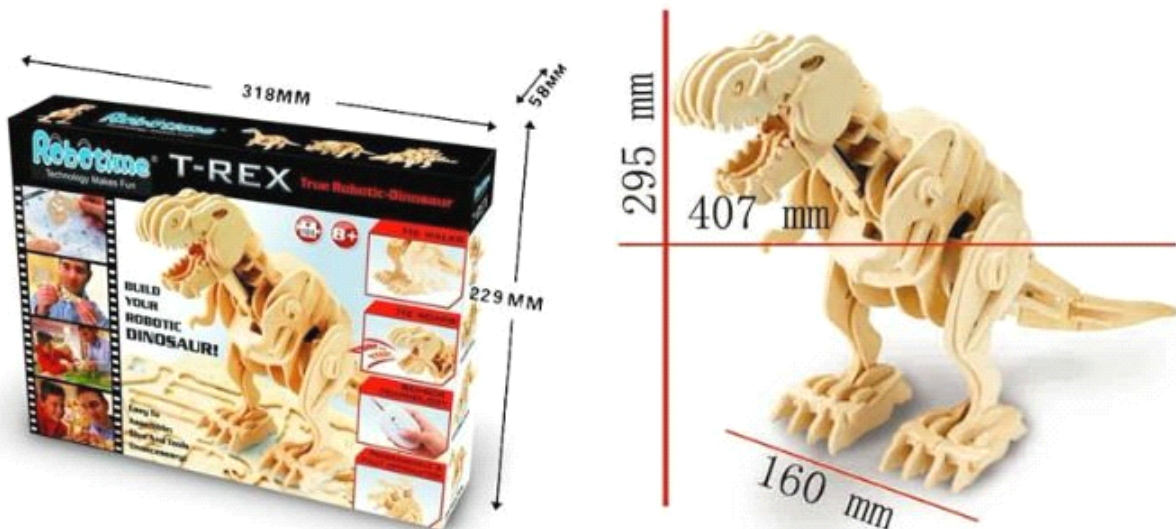

#### **3,Sound control**

Under non-remote control,sound (clap or other voices) may make dinosaur move, bite and roar.
