Believe Slim Lady L-carnitine Slimming Pill

Different from Believe for men, this product is formulated specially for women. It works to eliminate harmful toxins, beautify skins and reduce weight. Associated with women's aging, some noticeable changes take place in the skin and body shape, such as skin pachylosis, freckle, and the accumulation of fat around the waist. In addition, postpartum obesity can hardly be avoided. In order to solve those annoying problems, we firstly boost the metabolism of fat cells and cleanse our body of harmful toxins by using some powerful and active ingredients, like organic acid enzyme, lipolytic enzyme, digestive enzyme, glucose-polymer fibrin, protamex and peptidase.

Meanwhile, owing to the liquid in stomach and the environment of gastrointestinal tract, enzyme turns Garcinia Cambogia extract (HCA), L-carnitine and other ingredients into active elements to eliminate fat from cells and harmful toxins more effectively.

We add Soybean isoflavone and VITE into our slimming products, which makes our products more successfully cater to women's slimming need, and thus more effectively remove harmful toxins, promote radiant looking skin, and slim our body in a healthy way.

Main ingredients: Garcinia Cambogia extract (HCA), L-carnitine, Soybean isoflavone, VITE, glucose-polymer fibrin, protamex, organic acid enzyme, digestive enzyme, lipolytic enzyme, peptidase, fiber enzyme, Gynostemma pentaphyllum, etc

Function: eliminate toxins, beautify skins and reduce weight
