Wood Plastic Composite (WPC) is a combination of highly refined wood fiber and polymer resins (PE). The wood fibers are encapsulated in a polymer which makes the hard and significantly reduces its thermal expansion. Thanks to this composition, WPC enjoys some of the best qualities of wood and plastic. It looks like natural wood, but with much higher endurance and performance.

To ensure the excellent quality and safety, we insist to use 100% HDPE plus dried wood powder with safe high quality chemical additives.

The environment friendly HOHECOTEC[®] WPC is made of :

- » HDPE (Grace A Recycled HDPE)
- » Wood fiber (Professionally treated by dry wood fiber)
- » Chemical Additives (anti-UV agent, anti-oxidation agent, anti-fungus agent, stabilizers, colorants, coupling agent, reinforcing agent, lubricants, etc.)
