

Garbage Feeding Equipment

There are three kinds of this equipment, one is plate-type and equable feeding integral machine, one is step-by-step feeder, another one is combined with plate-type feeder and average package breaker. This equipment will guarantee garbage of the processing line uniform and equable amount, it provides a good feeding conditions to the follow-up mechanical and manual processing.

Plate Type of Conveyor

Technical Parameters

Parameters Type	Belt Width (mm)	The Largest Transmission Degrees	Speed of Belt
BD10	1000	40°	The largest speed is 0.1m/s, frequency and speed-adjusting
BD12	1200		
BD16	1600		
BD18	1800		

Notes: It can be made into turning or Z-type structures according to requirements of the processing.

Hydraulic Step-by-step Feeder

Technical Parameters

Parameters Type	Handling Capacity(t/h)	Total Power(kW)	Feed Inlet Height(mm)	Speed of Feeding
BG100-2	15	8	2880	Hydraulic automatic speed control
BG100-3	25	12	4320
