

Cow/Rumen Magnets

Cow magnets are popular with dairy farmers and veterinarians to help prevent Hardware Disease in their cattle. When a cow swallows a large smooth magnet, It lands in the first compartment of the stomach, and attracts the stray metal on its way by, holding it in a safe place. So that they do not penetrate the stomach wall. Therefore, it make sure to gain cows' appetite and increases milk output.

Our company offer Alnico cow magnets. It is non-toxic, non-corrosive and safe in use and is the best choice of Dairymen and Vets. Sometimes We also offer NdFeb cow magnet with stainless steel & Ceramic cow magnets according to customer requirement. these ceramic cow magnets below is made of ceramic 5 (strontium ferrite) magnet material; its special magnetization manner causes nails and other sharp metal objects line up along the length of the magnet where they are no longer a danger to the cow; the FDA-approved epoxy coating is gentle on the cow and helps protect the magnet from chipping; rounded corners ensure safe and easy passage to the reticulum.
