CL-668A

CL-668B

Powder coating machine CL-668 is our new product ,with good function for better working.
Operations very convenient, and have function of one key to control and choose the models.

***Blind angle model *Respray model *Pulse model *Plate model**

This model apply the more easy spray method Combine digital and electric analogue Perfect result of coating, best control system.

Based on COLO tecnology , realize the high performance and efficiency

Updated the actually powder coating machines

Form a uniform thickness and higher quality

Amazing adhesion , reduce the powder using

Weight of Gun :500g(16.2oz.)

Length of Gun: 340mm (1.1ft.)

Power Source: AC220V/110V

Frequency: 50~60Hz

Power Consumption: 30W

Voltage Output: 100kV

Max. Current Output: 180 μ A

Polarity: Negative

Max. Injection Capacity: 600g(22.9oz.)/Min

Air Consumption: MAX. 13N m³/h

Temperature Rage in use-10~50°C(-14~22°F)
