

3D shoe design software

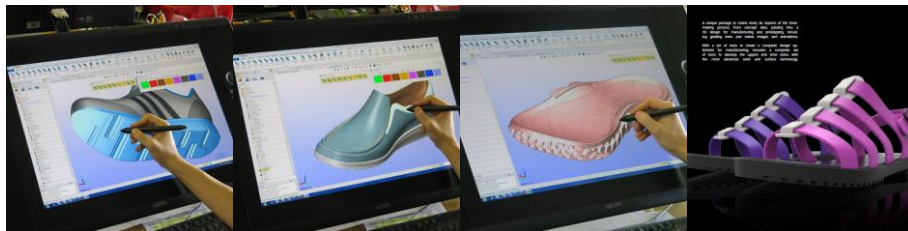

Keywords:

3D shoe design software price
3D shoe design software factory
3D shoe design software for shoe sole
3D shoe design software for shoe mould
3D shoe design software with European engineering
Shoe CAD software
3D shoe design software real Solid file

Product attributes:

Place of Origin: Portugal
Operating System: Windows
Service: Online service
Factory or not: Factory
Exported File Type: IGES, STEP, VDA, DWG, DXP and STL file, etc
Brand: larystudio

Brief description:

Larystudio 3D Shoe Design software came from Europe—easily operate, creat real solid model for CAM production.

Product details:

3D shoe design software for shoe sole, upper shoe, shoe mould and shoe sole mould etc.

Description:

3D Shoe Design software came from Europe—the most professional 3D shoe design software.

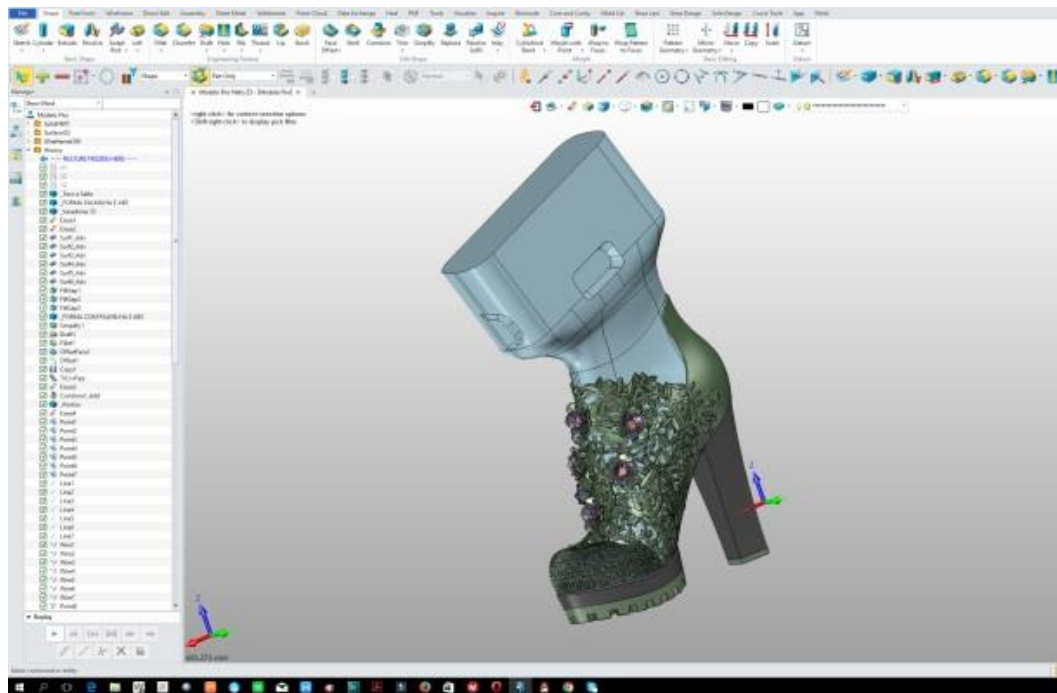

- A software designs visual effects and also can be used in CAM production
- Special surface modeling technology and dozens of practical functions for shoe designing
- Perfect integration with Lary 3D scanner, based on 3D shoe last model file for designing upper shoe, inner shoe, shoe sole and shoe mold which ignores repetitive modeling operations.

Practical case analysis of **Larystudio** 3D shoe design software

1. A software with several kinds of curve modeling technologies makes the extremely complicated 3D model design easier. The designers can realize all of their ideas by the software easily.
2. The unique solid-surface hybrid modelling technology makes all the upper shoe, design pattern

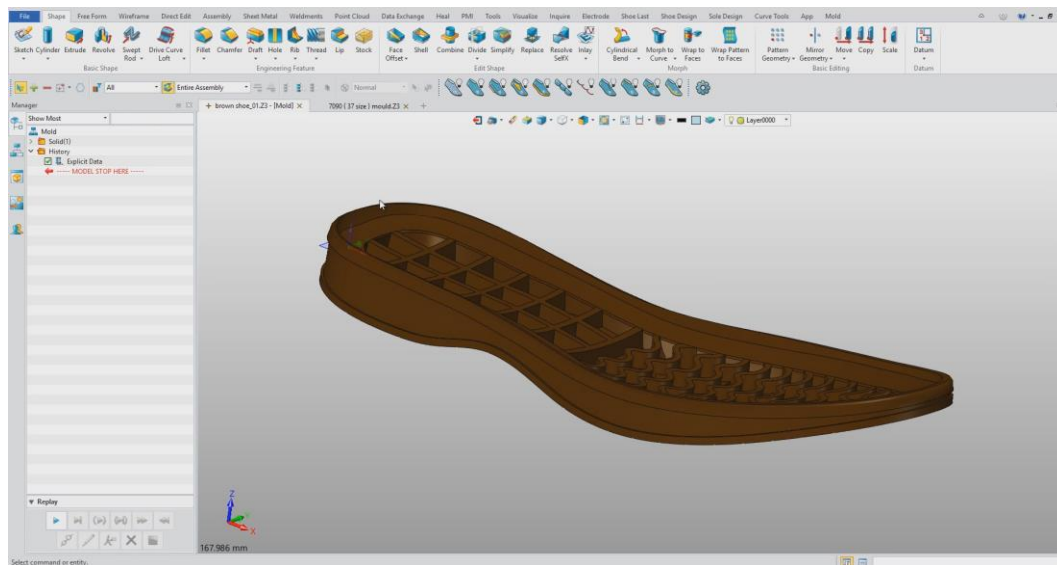

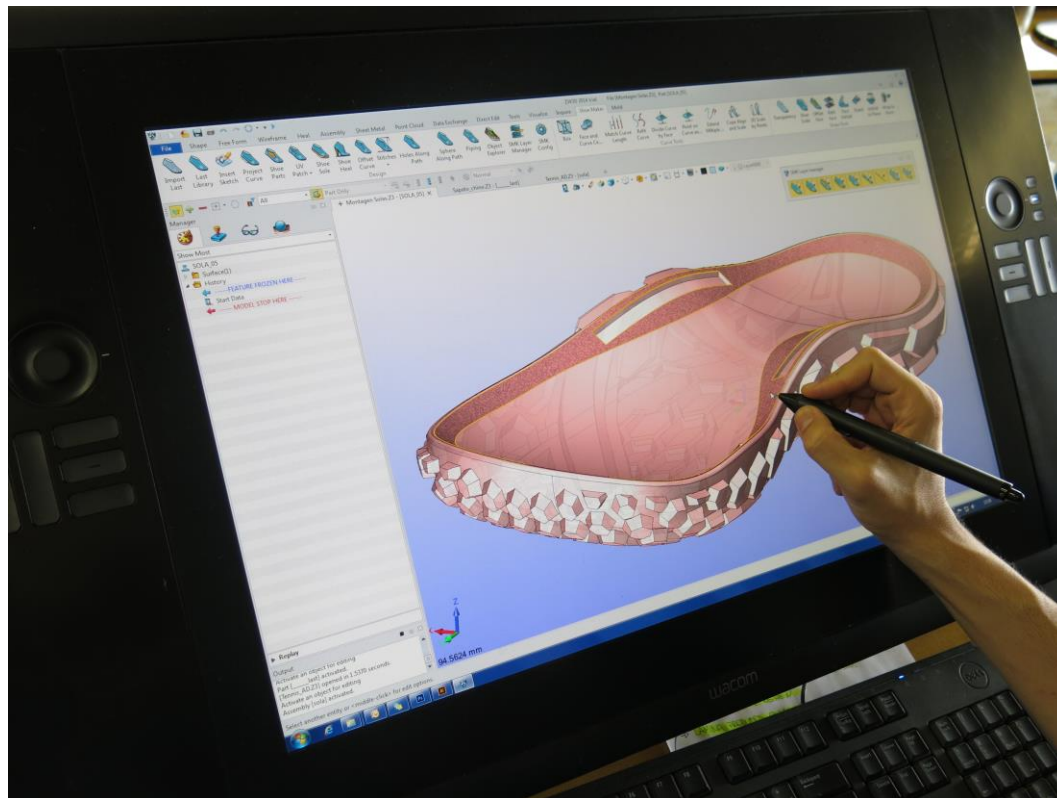

and inner sole accurately attached to the 3D shoe last modeling to ensure the comfort of finished shoes.

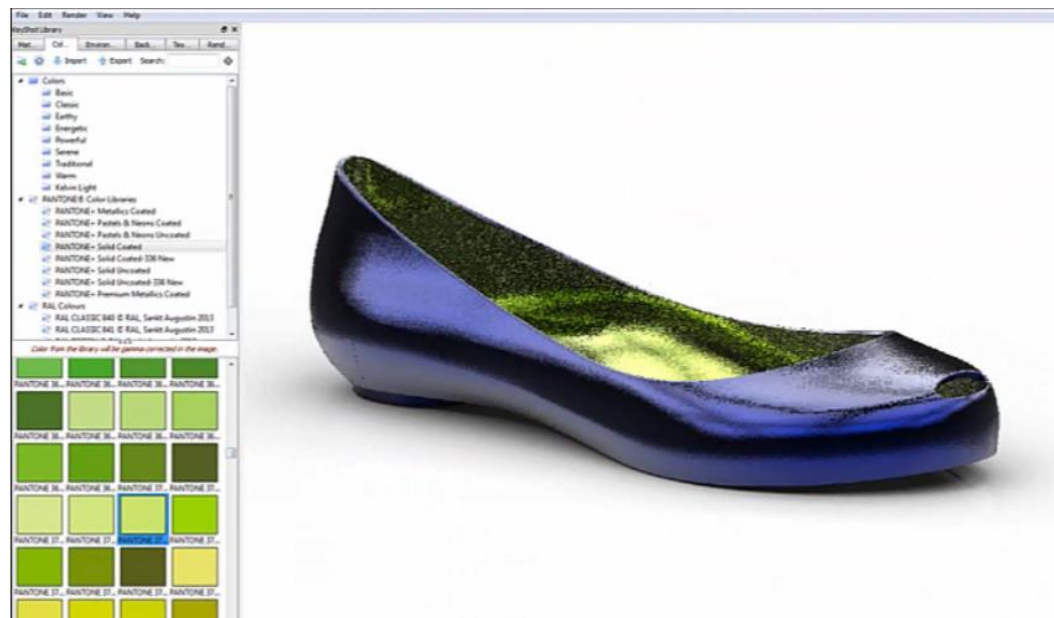

3. All design data can be directly applied to mold design, 3D printing, or CNC processing with CAM software to avoid repeated modeling, and ultimately use in the production process

Company:

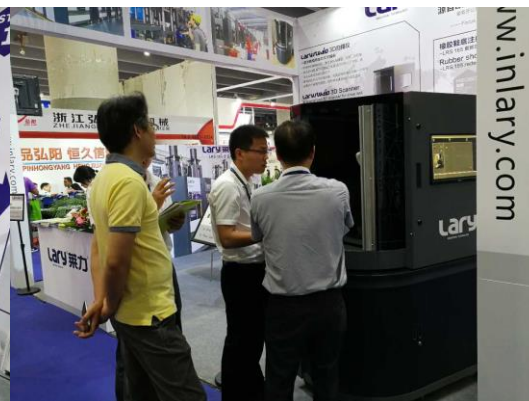

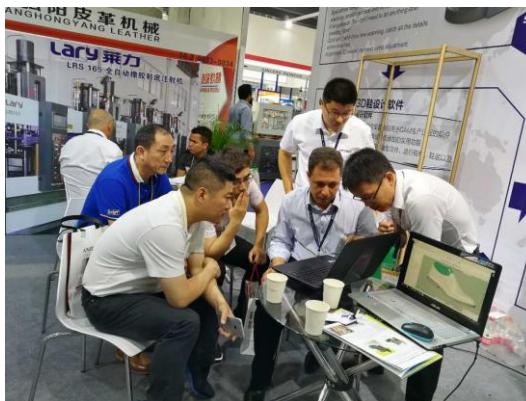

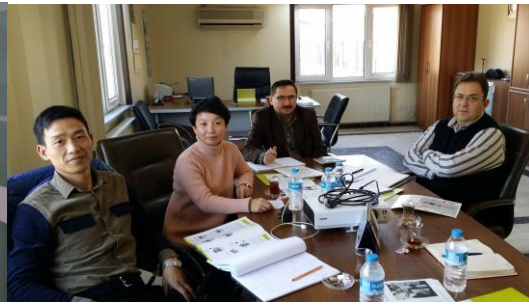

Ningbo Lary Industry Technology Co., Ltd is a joint venture with Portugal TECNIROLO Engenharia Industrial S.A. Lary is an engineering & manufacturing enterprise which inherits the concept of providing customers with best services in Europe for more than twenty years. Lary has committed to product promotion and service of shoe industry technology with Portugal TECNIROLO. Now, Lary's current products include: rubber shoe sole injection mold machine, high precision & speed rubber injection machine, 3D scanner for shoe last, 3D shoe design software and 3D printer. TecnIrolo - Portugal and Lary Industry - China are a group of companies that work as a global solution provider for an international network over of 16 countries.

Grendene

Grendene, 成立于1971年,是世界上最大的鞋类生产商之一。独家专有的鞋类生产技术让他们在全世界的女鞋和童鞋市场占有一席之地。Grendene旗下有许多著名的品牌,包括Melissa (梅丽莎果冻鞋), Grendha, Zaxy, Rider, Cartago, Ipanema, Pega Forte, Grendene Kids和Zizou等。

Grendene, founded in 1971, is one of the world's largest producers of footwear. It has exclusive proprietary technologies in the production of footwear for the women's, men's and children's markets. It owns successful, widely-known brands, including Melissa, Grendha, Zaxy, Rider, Cartago, Ipanema, Pega Forte, Grendene Kids and Zizou.

Bolflex

BOLFLEX公司是欧洲鞋类组件供应市场的领导者, 专注于鞋类零部件生产已有二十余年, 尤其精通是橡胶鞋底生产, 自1992年起, 用最丰富的行业知识和经验, 以及最先进的设备, 为多个欧洲知名鞋品牌提供最优质的橡胶鞋底。

BOLFLEX is a market leader company, expert in the footwear components sector, with consolidated skills and credit in the production and supply of soles for the European footwear industry. The project began in 1992. ... With its know-how, its experience and modern machinery, the main focus is in the production of rubber soles.

Team:

Payments and Delivering:

Payments: 40% deposit by T/T after confirming the drawings and 60% balance by T/T before delivery.

Delivering: 30 days after we confirmed both side.
