CHOOSE **BESTA** MACHINE
HIGH QUALITY AND EXCELLENT SERVICE

WHY We shall choose high quality machine??

1. **High quality machine** is designed more reasonable, by using high quality parts and the time for making one machine is longer than other quality.
2. Because we have used better quality parts and spend more time to make, and also investment innovation of new machines, our price looks a little expensive than less quality one, but in terms of PRICE VS PERFORMANCE, our machine ranks first.
3. High quality machine will be more easy for operation, easy maintaining, save your time and energy, less change frequency of spare part etc. It is not other machine can be compared.
4. For high quality machine, you can get more advance technology of making. Some of our machine, same name, but other machine do not have the same functions. Good machine enjoys more merits than other model.
5. BESTA MACHINE-is a company insist high quality machine and excellent services. We have served more than 200 customers in more than 30 countries.
6. For you, it is one time investment, high quality machine will enable you to success.

Flow of Making Toothpick

ABOUT OUR COMPANY

BESTA BAMBOO MACHINE CO., LIMITED. Located in China, It is the world top famous supplier for bamboo processing equipment.

OUR MAIN BAMBOO PROCESSING MACHINE

1. Bamboo Toothpick Making Machine
2. Bamboo Chopstick Making Machine
3. Bamboo BBQ Stick Making Machine
4. Bamboo Furniture Board/Flooring Machine
5. Bamboo Mat Making Machine etc.

In this catalog, we wish to introduce you the main concerned things about Bamboo chopstick making.

For more introduction about our company other machines, welcome to Visit our company website:

www.bestachina.com

Thank you.

Before you want to make **Bamboo Toothpick**

SPECIFICATION	CONTENT
What is the toothpick diameter you want to make?	The regular size is 2.0mm, 2.2 mm
What is the Toothpick Length	The length is 65mm
Which type	Double pointed or single pointed

If your toothpick diameter, length is different, pls kindly let us know. For example, some customer wish to make 2.5mm*70mm type .

If you want to make both single pointed & double pointed toothpick, you need to buy 2 sets of toothpick sharpening machines.

Each Machine Introduction

Name: Raw Bamboo Sawing Machine

Model: ZG-1

Brand Name:  www.bestachina.com

Function: Cutting the bamboo into certain length

Power: 2.2 KW (three phase)

Machine Size: 1100*555*1200 MM

Weight : 85 KGS

001

Name: Bamboo Splitting Machine

Model: ZP-2500

Brand Name:  Besta www.bestachina.com

Function: Splitting the bamboo into strips

Power: 3 KW-6(three phase)

Splitting Length: Max. 2.7 meter

Machine Size:4270*1000*1150 MM

Weight :800KGS

For 1 set of machine, it is equipped with 10 pcs of splitting blades.

002

Name: Fixed Width Slicer

Model: MZP-3

Brand Name: Besta www.bestachina.com

**Function: Width/thickness setting,
knot removing, layer separating**

Power: 10.6 KW (three phase)

Max. Processing thickness 25mm.

Machine Size: 2300*570*1190MM

Weight :600 KGS

003

Name: Small Layering Machine

Model: MZP-1

Brand Name:  www.bestachina.com

Function: Layering thicker strip into thinner ones.

EX. Layering 5.0mm into 2 pcs of 2.5mm .

Power: 2.2 KW (three phase)

Processing Thickness: max. 15mm

Machine Size: 540*570*960MM

Weight : 120 KGS

004

Name: Bamboo Wool Slicer (stick making)

Model: MBZS-5

Brand Name: Besta www.bestachina.com

Function: Making bamboo strip into bamboo sticks

Power: 11 KW (three phase)

Stick Size : 1.3 mm to 8mm etc.

Machine Size: 1400*800*1100MM

Weight :553 KGS

By change shaping blade, you can make different sizes. (1.3mm,1.4mm, 2.0mm etc)

005

006

Name: Precise Cutting Machine

Model: BJQ-6

Brand Name: Besta www.bestachina.com

Function: Cutting the long stick into 65mm

Power: 3 KW

Main Axis Rotation Speed: 3200RPM

Machine Size: 990*620*780MM

Net Weight: 125 KGS

007

Name: Toothpick Polishing Machine

Model: BPG-1G (HIGH SPEED)

Brand Name:  Besta www.bestachina.com

Function: Polishing the bamboo stick into smooth.

Power: 2.2 KW (Three phases)

Machine Size: 2500*850*700MM

Net Weight: 470 KGS

This machine is designed according to toothpick length. EX. 65MM

008

BXJ-1S

This machine is used for shape forming round stick (2.0mm*65mm) into toothpicks.

Pls kindly let us know you want to make single pointed or double pointed toothpick?
If you want to make both types, you need to buy 2 sets of BXJ-1S toothpick sharpening machine.

Name: Toothpick Sharpening Machine

Model: BXJ-1S (New design)

Brand:  www.bestachina.com

Power: 2.75 KW (Three Phase)

OUTPUT: ABOUT 2,500 PCS/MINUTE,

1.2 MILLION PCS PER DAY

MACHINE SIZE: 1100*800*820 MM

NET WEIGHT; 280 kgs

Bamboo Toothpick Size: 2.0mm*65MM

This machine has adopted the vibration feeding , making the feeding of stick more smooth. Selecting systems.

Name: Medium type blade sharpening Machine

Model: TZQ-020

Brand Name: Besta www.bestachina.com

Function: Flat Blade, Shaping Blade Grinding.

This machine is used in machine maintaining.

Power: 0.75 KW (three phase)

Main Axis Rotation Speed: 2800R/MIN

Machine Size: 780*740*1450MM

Weight : 150 KGS

TZQ-020

009

Regarding the **toothpick packing machine**

If you want to pack the toothpick individually and sell to customers, 1 pcs or 2 pcs per bag, you shall consider our machine model GD-BZ2 (three side sealing, individual packing machine).

IF you want to pack the toothpick by plastic containers ,(bulk), you can consider our machine model PZJ-1 machines.

Toothpick Packing Machine Introduction

Name : Toothpick Packing Machine

Model: GD-BZ2 (Three side sealing type)

Packing Type: Individual packing, 1 pcs per bag.

Packing Materials: OPP film (Plastic packing film) and papers

Brand:  www.bestachina.com

Power: 0.37 KW (220V,50HZ, single phase)

Net Weight: 390 KGS

Machine Size:1300*700*2000 MM

Output: 200 to 600 PCS/Minute

GD-BZ2

010

Can use both OPP and paper packing film

Two-color printing functions

Model: PZJ-1

Name: Toothpick Container Packing Machine

Toothpick Filling Machine

Function: Filling the toothpick into container

Number of cylinders: 4 Nos.

This machine shall be cooperated with air compressor

Working Voltage: 220V, 50HZ (Single Phase)

Working Pressure: 4 KGS pressure

Machine Weight: 67 KGS

Control form: Electromagnetic foot switch

Regular diameter of plastic container : 48MM

Based on this size, the speed is :

1200 pcs to 1800 containers/Minute

Machine Size: 880*470*690MM

This machine is specially designed according to plastic container Size.

011

https://youtu.be/DZ_v2h8BiuQ

Filling the toothpick into plastic container

Our Machine is designed according to your bottle size/shape.

This info will be help for us

TOOTHPICK DIAMETER
EX. 2.0MM, 2.2MM, 2.5MM

It is related to the SHAPING BLADE
SIZE one MBZS-5 Machine.

TOOTHPICK LENGTH

It is related to the POLISHING
MACHINE. THE POPULAR SIZE IS
65MM

Working Voltage

All our machine shall working under
three phase.
In China, it is 380V, 50HZ.
If yours are different, pls kindly
indicate.

OTHER CONCERNED QUESTIONS

1. IT WILL TAKES ABOUT 25 TO 35 DAYS TO MAKE THE MACHINES.
2. For making double-pointed toothpick, the speed is about 2500 PCS/MIN.
3. Our shipment Port: Shanghai Port, China
4. Your Destination Port: Pls kindly indicate
5. We will make proforma invoice with bank details to you before you make the payment.

The following information is helpful for us.

1. Pls kindly email us all your kind requirements

Toothpick Diameter

Toothpick Length

Capacity you want to make.

2. Pls kindly let us know your local working voltage (three phase)

3. What is your destination port.?

3. Pls kindly let us know your detailed consignee information

Why Choose **BESTA** ?

BESTA can offer all customer whole package plan of making the product you want including machines, all technical data, concerned things, layout. We will share our professional knowledge with our customers. We only provide customer high quality machine and NEVER attract customer with cheap machine which is not good quality. TOP QUALITY AND LONG TERM RELATIONSHIP is our persisting pursuing.

In BESTA, you can get good services and communications.

We will provide customer good services.

All the machines before shipment, we will test into good performance. If customer could not come to China, we will take photos, videos for customers.

We will treat customer things as our own things.

Our machine packing is by plywood case. Clean and good strength.

We will follow up customer all documents requirements and send you all scanned copy after the shipment and also after confirmation and we will send you original documents. We are professional in This.

We are an company famous in our industry and provide you good feeling of cooperation.

You can get a reply from us within 12 hours. We will do quick reply for all customers.

Within more than 15 years in our industry and we have gained a lot of customer all over the world.

If you need abroad training service, we can provide engineer. But it is charged service.

Welcome to China to learn how to use machine.

Our main customers are from INDIA, INDONESIA,

THAILAND, PHILIPPINES, MYANMAR, MALAYSIA, TANZANIA, NIGERIA, ETHIOPIA, BRAZIL, COLOMBIA, ETC.

All of our customer like our machine and services.

We sincerely wish we could have the chance of cooperation with you.

Regarding Engineer Abroad Training Service

We can also provide you engineer training service abroad. But it is charged service. The buyer shall afford engineer's Flight tickets, salary, foods, accommodation and other cost. The service time suggested is 1 month. You can also Come to **China** to learn how to use.

What are the other machine
you also need ?

The machines you may need. (AUXILIARY EQUIPMENT)

1. Stainless Steel Tank (for bamboo stick boiling and chemical treatment)

The machines you may need.

2. RFL-70 HOT AIR STOVE MACHINE

After you make the bamboo stick from MBZS-5 bamboo wool slicer, you shall boil the bamboo stick in the stainless steel first and then do the drying. For drying the bamboo stick, you can choose to dry it under sunshine or drying in the chamber (drying room) during the raining days. For RFL-70 hot air stove, it is for supplying the heat for the drying room., by burning the bamboo wastage.

3. Accessories for stove making

It is for making the stove below the stainless steel tank

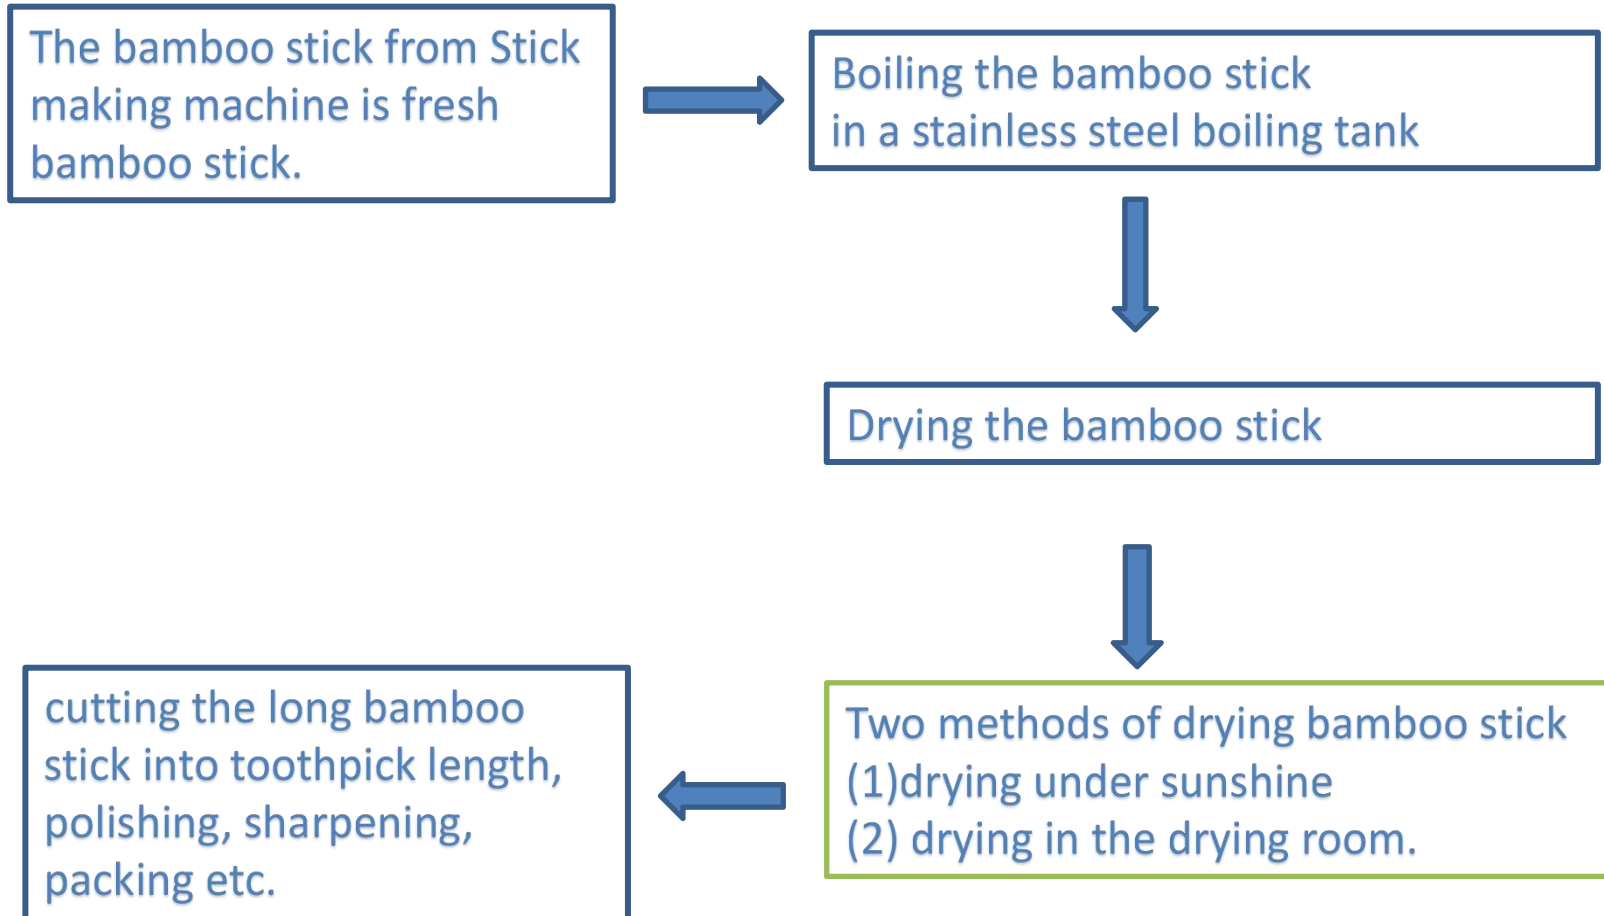

2 SETS is needed.

4. Electric Hoist (3T)

It is used for lifting the heavy sticks into the stainless steel tank.

Stick Drying

How to do the stick drying?

How to do the stick drying?

1. Customer self-built two chamber (also called drying room) (every 12 to 15 square meters) with interactive use, chamber can be built under the guidance of our engineers, the construction cost is determined by the local cost of raw materials and the local labor (chamber main raw materials are: sand ,brick etc)
For raw material which shall arrange local, it is customer's responsibility.

2. RFL-70 Hot Air Stove Machine.

Technical Data is as follows,

Main Stove Body: 1 SET

Machine Size: 1600*1700*2500MM

Accessories:

Blower: 1 SET 2 Meter Chimney : 3PCS Connector: 1 PC
