

DR-QDJ Chocolate chip depositing machine

The machine is for depositing chocolate drops (chips). The chocolate drops/chips can be poured on the conveyor belt directly and the weight of the each drop can also be adjustable.

The material of the line which touch with the chocolate is made in stainless steel or aluminium alloy except the convey belt is made in PU. The insulation board can be also stainless steel.

Technical data

Conveyor belt width : 400-1200mm

Depositing speed: 0~15 times/min

Temperature of cooling tunnel: 0~10°C

The min. weight of drop: 0.098 g
