公司簡介

東莞展宏織帶有限公司始建於1992年，是一家擁有自營進出口權的外商獨資專業生產企業。註冊資本1200萬港元。主要生產各式挂帶、行李帶、寵物帶、鞋帶、腰帶等織帶類延伸產品。公司位於著名的製造業名城——廣東省東莞市。

公司于2003年購入土地13000多平方米，自建現代化標準廠房20000多平方米，現有固定資產5000餘萬元。經過20多年三代人的努力，我們已經發展成為全國最大的挂帶生產企業之一，產品主要銷往歐美及日本等市場。

公司擁有環保型染廠、織帶、電腦提花、熱轉印、絲印等整套生產設備，自有產品物性測試實驗室。完善的配套，使得我們在做好各環節品質管控的同時，確保產品高效穩定生產。

經過多年的培養和建設，公司擁有一支經驗豐富、技術嫺熟、穩定性強的業務、生產和管理隊伍，可為客戶提供及時、周到的服務。公司技術力量雄厚，創新意識強，注重產品研發，先後獲得十多種專利，且專利產品在市場的份額不斷提高，產品質量在同行業中處於領先水平。

我們通過了BSCI、COCA-COLA、UNIVERSAL、ISO9001:2000等社會責任和質量體系的驗廠。正是我們的專業，我們的誠信，我們在同行業的強大競爭力，為我們贏得了衆多的高端客戶：我們是2012年倫敦奧運會和殘奧會官方挂帶唯一授權生產廠家。此外，我們重要客戶還有Disney、環球影城、可口可樂、Vodafone、歌萊雅、保時捷、法拉利、Walmart、Hello-Kitty、三星、谷歌、Microsoft、英特爾、Canon、騰訊、百度、華為等。

無論您剛剛起步，還是已成為行業領袖，我們都將努力為您提供最高性價比的產品。小小織帶，承載您的品牌。細節決定成敗，品質連接未來！我們必將不負衆望，通過我們的小小織帶，讓全世界的每一個客戶、每一個品牌更加出彩！

Company Profile

2012 London Olympic and the Paralympic Games' official Lanyards Manufacturer with more than 20 years of experience

Dongguan Zhanhong Weaving String Co, Ltd., established in 1992, is located in the famous manufacturing base Dongguan China. We specialize in a variety of lanyards, luggage belts, pet leashes, shoelaces, fashion belts and other straps extending products. Entitled to handling export and import, European Union, North America and Japan are our main markets.

In 2003, we purchased the land of 13,000 square meters to have our self-built modern standard workshop with more than 20,000 square meters. After more than 20 years' efforts through 3 generations, we became one of the largest lanyards & shoelaces manufacturers in China and with fixed assets of 50 million RMB. We have our own dyeing, weaving, embroidering, silk-printing, heat-transferring and assembly department. All manufacturing processes are done on site at our own factory, allowing us to better control the quality at every stage, therefore to guarantee our overall production efficiency.

We owned an experienced, highly skilled and stable team of sales, production and administration after years of continuous cultivation and construction. With adequate and reasonable staffing arrangement, we provide our customers with timely and thoughtful service always. Meanwhile, we have strong technical force and sense of innovation, focusing on R&D of products, has obtained more than 10 patents, and the patent products in the market share is continuously improving, moreover, quality of our products keep the leading level in the same field.

We passed BSCI, COCA-COLA, UNIVERSAL and ISO9001:2000 audit. Superior quality, stylish designs, competitive price and perfect service won us honorable customers. We are 2012 London Olympic and Paralympic Games' official lanyards sole manufacturer. We also work with the top-class enterprises such as Disney, Universal Studios, Coca-cola, Vodafone, L'OREAL, Porsche, Ferrari, Walmart, Samsung, Hello-Kitty, Google, Microsoft, Intel, Canon, Tencent, Baidu, Huawei, etc.

We will always strive to provide you the most competitive products no matter you have just started or have already been a leader in this field. Small straps carry your brand. Details determine success or failure, quality connect our future. Through our small straps, we will make every one of our customers, each of your brands to be more outstanding in the world as you expect!

Our Small Lanyards, Your Big Stages!

小挂帶，品牌傳播大舞臺！

WHY CHOOSE US?

Hidden Champion of lanyards production in the world

1, Built Dongguan Zhanhong the global hidden champion in lanyards field through three generations of 25 years' operation.

Our Taiwan family appointed Chen Minyi as General Manager, brought shoelaces production technology from Taiwan, invested and set up factory in Guangdong Province in 1990, named Yuchang Weaving Co.Ltd which specialized in shoelaces making. My father Chen Zhizheng joined Yuchang Corporation under invitation of our Taiwan family and mainly responsible for business development. In 1992, my father established Zhanhong Weaving String Co.,Ltd. As the eldest son, I took charge of the factory affairs, it developed rapidly and demand always exceed supply. I sensitively found great demand of lanyards in the market, seized the opportunity and devoted ourselves in lanyards field when it first appeared in European countries in the beginning of 21st century. From Taiwan to Mainland, through three generations of more than 20 years' continuous efforts, Dongguan Zhanhong Weaving String Co.,Ltd had been hidden champion in lanyards filed in the world.

2, International standards, plant planning and full set of production lines.

In 2003, we purchased 13,000 square meters lanyard and built our modern standard workshop with total more than 20,000 square meters. With nearly 3000 square meters of factory gardens, various types of production equipment, and fixed assets of about 50 million RMB.

3, High standard quality control system and production process

We have our own Rohs standard dyeing, weaving, computer jacquard, silkscreen printing, heat transfer and assembling department. The first to have our own product testing laboratory. Meanwhile, to construct strong quality control system, we employed professional person who had rich experiences on quality controlling in Japanese enterprise. Which ensured us efficient and stable production under good quality control with perfect matching.

4, Efficient and professional core operation team

In 2004, we introduced partner system and started to go out of family management. This formed us an experienced, highly-skilled, stable and strong sales, production and management team.

5, Having a number of industry patents, focusing on R & D and environmental protection

We are one of the first to participate in research and development of ECO friendly material for lanyards, cooperated with many well-known brands and strongly promote the use of recycled fiber, biodegradable bamboo and other new environmental materials etc.

6, Choice for 60% of the world's top 500 enterprises.

We've passed the audit of BSCI, Sedex, Coca-Cola, Vodafone, L'OREAL, Universal, ISO9001:2000 and so on. Our more than 20 years' profession and concentration on our lanyards field helped us won a lot of upscale customers. Moreover, we are the sole official manufacturer of 2012 London Olympic and Paralympic Games and worked with many top-class enterprises such as Disney, Porsche, Ferrari, Budweiser, Hello-Kitty, Microsoft, Samsung, Baidu, Fedex and SF express etc.

7, With the global first market share

We can produce over 10 million yards of different lanyards monthly, and more than 100 million pieces lanyards a year with our high output, wide sales and big impact in the market. We are one of the first batch to participate publicity and promotion of Alibaba International station and to apply Canton Fair booth through our own company name. Our lanyards sold directly or indirectly to all corners of the world and thus achieved full coverage of countries with out competitive prices, quality and services.

8, Small orders, personalized and rush delivery

We firstly carried out the process of informatization reform, in order to adapt to the personalized and customized requirement under new environment, and to break through the bottleneck of production management. The use of the latest Internet technology rebuilt relations between customers and factories, users and the third party design agencies or individuals can join the earlier stage design of products. We've easily achieved the diversity of small quantity orders, quick responses between two parties, and have been the new manufacturing enterprise with data real-time sharing. The informatization reform will definitely greatly improve the efficiency of our production, management level and experience effect for customers, which will make us a more competitive leader enterprise for lanyards making in the world!

- 1 In 1992 to 1994, we rented 4 vacant shops as semi-hand processing workshop with 200 square meters, which has become a prosperous commercial street.
- 2 In 1995 to 1998, rented vacant space for simple iron-made shed as workshop with about 800 square meters.
- 3 In 1999-2000, rented 3-floor non-standard floor with about 2,000 square meters.
- 4 In 2000-2003, rented standard 4-floor plant with about 3,500 square meters in Industrial Area.

Garden Plant Real Scenery

花園式廠房實景

In 2003, we purchased industrial land with over 13,000 square meters, and self-built the modern standard workshops, staff dormitory building, office building in phases with total over 20,000 square meters by stages.

Luggage belt your considerate choice for business gift

There are a lot of people had a painful experience of baggage lost no matter in domestic or international air flights

Airport baggage claim area is always the most confusing area in the airport. Everyone rushed to grab their own luggage once them out. Some people got their luggage in a hurry without careful checking. Thus baggage taken wrong or missing occurs often by similar luggage.

We have our sales person met the situation of taken by mistake of the baggage with others in 2010 when attending foreign exhibitions, and finally retrieved our luggage after 2 days under airport staffs' help. But we missed one and a half precious exhibition day and brought huge loss to our company image and effect of the exhibition.

In fact, we just need one luggage belt to avoid wrong taken. If we hold a legible luggage belt on our luggage, we can find our own luggage quickly and accurately in the confusing airport baggage claim area.

It will not only the fashion and trend but also your caring for them to provide your customers or business partners luggage belt with customized logo and design as a gift. Luggage belts have the traditional anti explosion prevention and reinforcement, and also can play an important role in air flights to ensure smooth and happy travel without baggage taken wrong. Luggage belt carried your logo and brand, it can largely win support among the people in the airports, on the buses, in the hotels and exhibitions etc.

Luggage belt with tourist attractions logo design for tourism products and other popular authorized design products such as Disney, NBA, Universal Studio and Hello-Kitty had been good seller too.

Luggage belt, it is your insurance of happy travel! Air travel, you can do it!

TOP-line for ECO Friendly Material

新型环保材料排行榜

Bamboo

Biodegradable, growing fast, belonging to natural fiber with economic price, can be dyed based on the Pantone color, with large stocks for raw materials to have short delivery time. **Disadvantages:** There are 5-10% right rate lower than common cotton or polyester materials for color dyeing, can only be silkscreen printed instead of heat transferred and easy to wrinkle.

Recycled PET

Made from waste plastic bottles with low price and dyed exactly, can be heat transferred, with larges stocks for raw materials to have short delivery time. **Disadvantage:** non-degradable.

Ordinary Cotton

Traditional and natural fiber, rich resources with low price and short delivery. Dyeing with high accuracy. **Disadvantages:** can only be silkscreen printed instead of heat transferred and easy to wrinkle.

Organic Cotton

Organic fertilizers, biological control pests, natural tillage management based, no chemicals is allowed. Made from all-natural, pollution-free cotton. Less sources, but we have stocks for short delivery. **Disadvantages:** Can only be silkscreen printed instead on heat transferred, easy to wrinkle and with comparatively high price.

Soybean

Made from extracted protein from soybean meal and silk which made through high-tech means and other materials. Belonging to natural fiber and is biodegradable. **Disadvantages:** light colors can be dyed but dark and bright colors with poor fastness, dyeing accuracy is not high enough and with comparatively high price. Can only be silkscreen printed instead of heat transferred. We have less stocks for raw materials so that delivery time will be longer.

Corn

Based on corn, wheat and other starch to be fermented into lactic acid and then by polymerization and spinned. Biodegradable and is natural fiber. **Disadvantages:** light colors can be dyed but dark and bright colors with poor fastness, dyeing accuracy is not high enough and with comparatively high price. Can only be silkscreen printed instead of heat transferred. We have less stocks for raw materials so that delivery time will be longer.

Linen

Bast fiber and leaf fiber obtained from a variety of hemp fiber, biodegradable and it's natural fiber. Can be dyed, but still a little yellow after bleaching and with higher price. Harder than cotton fiber but not so easy to wrinkle like cotton. Can not be heat transferred. With less stocks of raw materials so that delivery time will be longer.

What is more

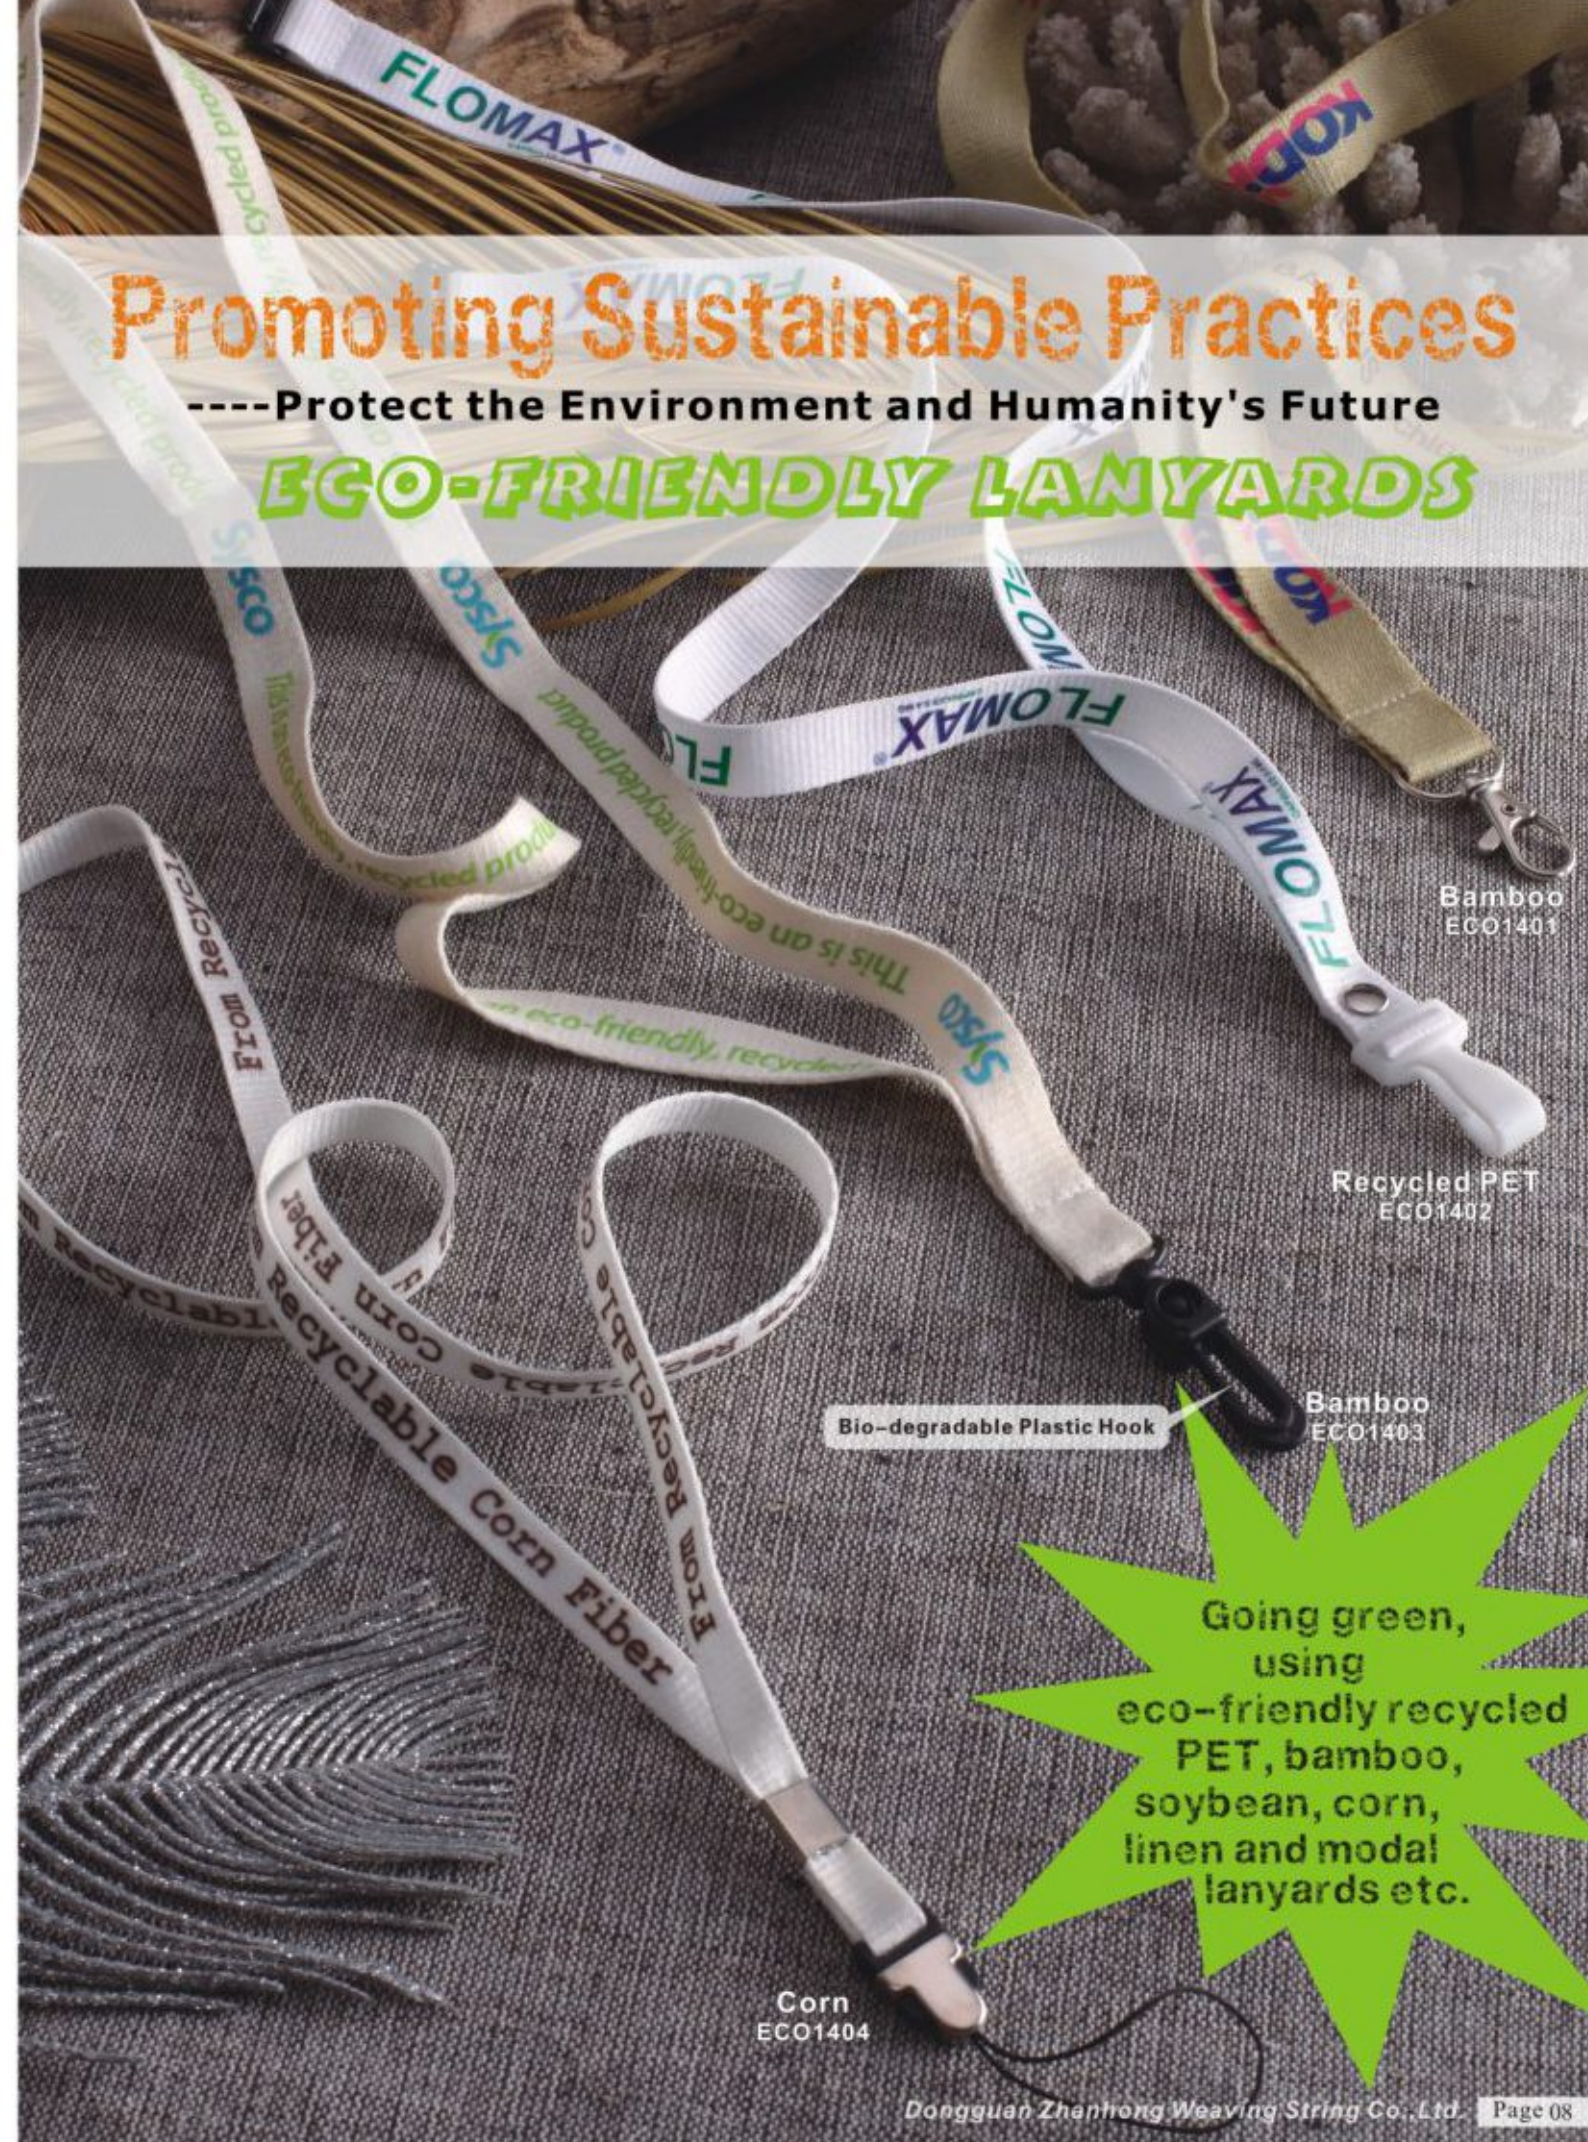

In addition, we have milk fiber, coconut carbon fiber, bamboo carbon fiber and other ECO Friendly Material, only a relatively few of our customers need so we do not arrange stock for these materials that production time will be longer.

About Silk-screen Printing

We provide top quality silk-screen imprinted lanyards. A fine mesh screen is made from the customer's artwork. The screen is laid on top of the material and the colored ink is applied over the screen. A squeegee pushes the ink through the mesh screen to create the design beneath on the fabric. All our Silk-screen imprints are done manually, rather than through a machine, allowing us to maintain the highest standards in imprint quality for clearness and sharpness.

Silk-screen printing is effected one by one color, so the more colors, the higher unit price. Silk-screen printing mold could be made quickly, mold revising relatively convenient and colors matching exactly. For Silk-screen printed lanyard, the lanyard bottom color is normally the color dyed out from yarn.

Silk-screen printing unit price changes not much because of quantity, i.e. smaller quantity not very expensive, bigger quantity not much cheaper than smaller, so if a small order and unit price in a tight budget, silk-screen print is recommended. For silk-screen printing, the other side printing will be applied after repeating all processes of the first side printing, i.e. re-organize the lanyards on the working base and then print them one by one color, so two-sides printing unit price has much difference from one-side printing, which is the reason why Silk-screen printing is normally applied to one side. For silk-screen printing, the polyester material has the best fastness with the paint.

Silk-screen printed logo must not approach the edges, for example, for a 20mm width lanyard, the width of the logo should be no more than 16mm, 25mm lanyard, logo no more than 21mm; However, heat-transfer printing has no such a limit; it could be fully printed to the edge.

About Heat-transferring

Heat-transferring is a superior printing process that can create multicolored, highly detailed designs. With this method the customer's design is transferred to a fine paper that uses dye sublimation inks. The paper is placed on the lanyard and pressure and heat are applied, causing the image to become enmeshed into the material.

The design remains smooth because of the method used. Heat-transferring lanyards offer durable imprinting onto these lanyards providing you with an imprint that will last for the life of the lanyard, no more rubbing off or fading.

The cost for one color has no much difference from for multi colors, only the mold charge for multi colors is higher, and mold time longer. Heat-transfer printing is indirect printing, so the colors are very difficult to completely match exactly, even it is the repeated order, colors still hard to match exactly.

Because of the different technology for these two types of printing, silk-screen printing logo is most made regularly, i.e. every piece is the same as the other. But heat-transfer printing is made irregularly, i.e. infinitely repeatable, the finished products will have difference at the position of beginning and end of each lanyard. Please see illustration.

For heat-transfer printing, if expect a bottom color or logo color change, another new mold will have to be opened. If silk-screen printed logo is right, only expect a bigger or smaller space between logos, it needs not to change the film, only needs to change the space between the adjusters fixed on the working base.; but for heat-transfer printing, a new mold will have to be opened and this extra mold charge needed. For silk- screen printing, the same logo, different bottom color lanyards could share the same logo, while for heat-transfer printing, the same logo, but bottom colors different, will need different molds.

About Woven-logo Lanyards

Jacquard weaving is an automated method of raising and lowering yarn on a loom to produce designs, named after its inventor Joseph Marie Jacquard. The machine uses software to control a sequence of operations, which produced repeated weave patterns. In this case, both the logo and everything you need on the lanyard, is woven during the production of the lanyard itself.

Woven, weaved-in or embroidered lanyards can last life time! Depending on your application, we can weave your logo or specific message directly onto your lanyards ribbons, straps, cords or webbing with sharp images. General speaking, thinner woven lanyards can get higher resolution woven logos, while thicker lanyards will have lower resolution.

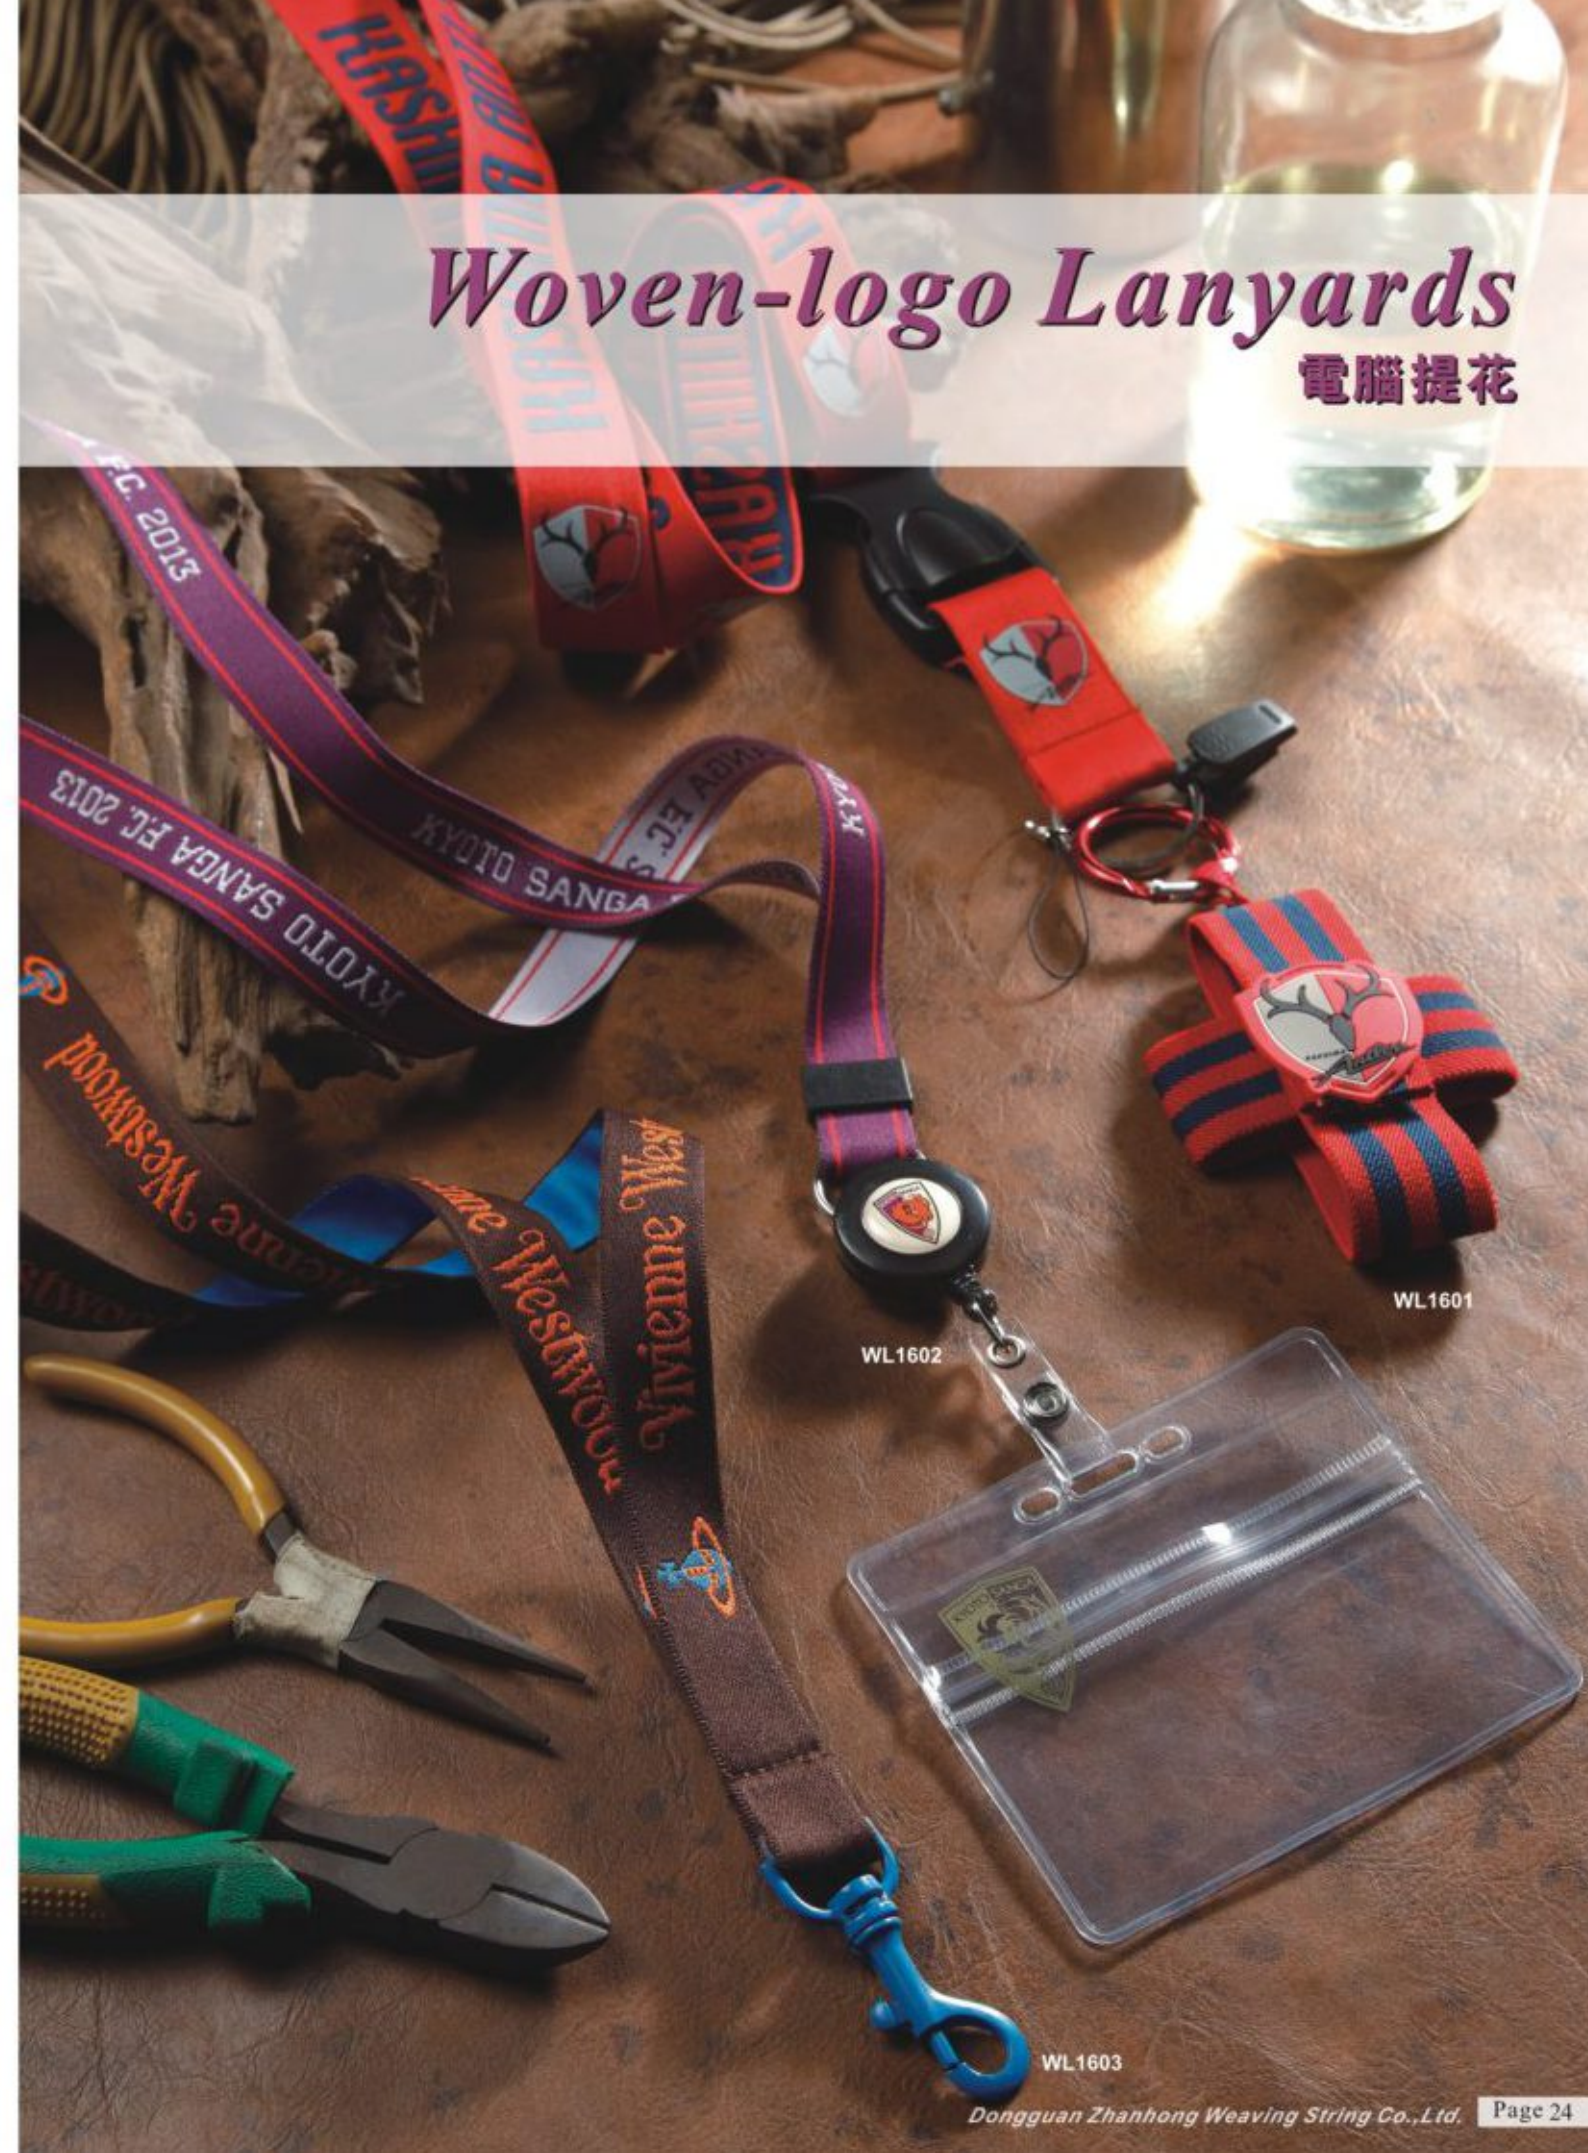

Woven lanyard can be a one layer flat ribbon, two layer flat-tube, or soft-touch round cord style. Most of the woven logos are positive/negative style, the straps is only one ply. Some of the logos are mirror style, the straps is double ply. We can also make unique both positive style logos, although most of our competitors think it impossible.

The woven-logo lanyard is more expensive than silk-screen printing lanyard, but it looks more third-dimensioned, high-graded and splendid. There is also some technology difficulty in weaving very exquisite logo, too many colors logo or too complex logo. If you really like the woven logo style with exquisite logo, we could combine jacquard with silk-screen printing to achieve it, only the cost higher.

DOG LEASHES

寵物帶

The leash and collar is one of the most important tools you have. In most places, it's even required by law when your dog is outside. We have many DIFFERENT TYPES OF COLLARS BUT MOST OF THEM are basic and simple style. If you don't have issues on the walk, this can be a great tool. It allows you to keep your balanced dog safely by your side and out of harm's way. I recommend this for easygoing, happy-go-lucky dogs without obedience problems. They are Simple but useful, simple but unique, simple but lovely! A combination **PET COLLAR** and leash includes a leash that is attached to the **COLLAR** and is fastened about the **COLLAR** when not in use. When fastened about the **COLLAR**, the **LEASH** conforms to the **COLLAR** around the neck of a **PET**. When unfastened from the **COLLAR**, the **LEASH** extends to a length to provide comfortable separation distance between a person holding the **LEASH** and the **PET** wearing the collar while allowing for appropriate control of the pet.

Mobile Phone Cleaner

手機擦

Backside of Cleaner

Mobile Phone Cleaner

Mobile phone screen cleaner can be used for most electronic devices with LCD screen such as a mobile phone, PDA, mp3 player and digital camera. Your company logo or individual characters can be imprinted on the front and you can use its back side to removes the dirt and fingerprint left on LCD screen of electronic devices safely. The cleaner is made of Microfiber, which is well-known for its cleaning abilities, especially for sensitive surfaces such as camera lenses.

Mobile phone cleaner look nice when they are hung to lanyards, key chains, cameras, backpacks and wallets, they serve as a tool to clean, a kind of accessories and a great promotional product to boost brand awareness and recognition as well.

How to get lanyards with your own-designed logo quickly

In order to shorten the delivery time, quicken the manufacturing efficiency, we prepare some standard color yarns and straps, which colors are among the most popular colors chosen by our customers.

Less than 5000pcs imprinted polyester lanyards will be completed within 7 days as long as you choose from our recommended standard colors (20mm width only).

Remarks: We can match your lanyard with any PANTONE color and the color of the logo was not confined.

Geographic location: we lie in Dongguan city which is the famous manufacturing city, between Guangzhou & Shenzhen. Only less than 1 hour's drive you can arrive at Guangzhou airport or Shenzhen airport. The transportation is very convenient, accessible from all directions.

Specific position of Factory : Our factory lies in Satian town in the Southern of Dongguan city, it's only 5 km away from Humen port which is very famous all over the country. It has overall functions and facilities.
