

TELHOO

MACHINERY FROM TAIWAN

Z5G SERIES TAPER PIPE END-FORMING MACHINE

AUTOMATIC PRESS BENDING MACHINE

ZXV-6 TUBULAR FITTING MACHINE

PIPE ROLLER BENDING MACHINE

SAW BLADE SHARPENING MACHINE

AUTOMATIC FEEDING PIPE-CUTTING MACHINE

VS-355FA-DR

VS-275FA-DR

MC-275A

MANUAL CUTTING MACHINE

MC-315B

SEMI-AUTOMATIC (PNEUMATIC) CUTTING MACHINE

MC-360

SEMI-AUTOMATIC (HYDRAULIC) CUTTING MACHINE

MC-455L ALUMINUM PIPE CUTTING MACHINE

METAL PIPE AND BAR CHAMFERING MACHINE

EF-AC150
Single head pipe/bar
chamfering machine

DEF-FA152
Double head pipe/bar
chamfering machine

You are so welcome to visit Zhangjiagang Telhoo Machinery Manufacturing Co., Ltd.

Established in 1991, Telhoo is the leading manufacturer for steel pipe processing machines. We are a Taiwan company and set factory in China. "Quality—Taiwan, Price—China."

Our company occupies an area of more than 10,000 square meters, has strong research and development capability and is also equipped with complete equipment of high precision. On the basis of over 15 years of production experience, adopt Taiwan technology and management methods, we have successfully developed series of micro-computer controlled DW, SW pipe bending machine, pipe-end forming machines, Circular Sawing machine and some other automatic pipe material processing machinery. With the high technology and creativity, We also can customize the machines according to your request.

Our products are widely used in ships, cars, motorcycles, bicycles, petrochemical processing, steel-pipe furniture, physical gymnastic equipment, tourist and leisure articles, plumbing, sanitation, bathing industries, and other process industries.

With new and high technology, advanced equipment, consummated crafts and complete detection means, we will provide satisfactory products and reasonable price to customers all around the world.

DW SINGLE HEAD MANUAL
NC PIPE BENDING MACHINE

DW25/38/50/63NC

DW75/88/115/130NC

DW168/219/325/400NC

MECHANICAL CHARACTERISTICS

The microcomputer control is adopted with strong functions, high extensibility, English subtitles and dialogue-based operation, easy to learn and understand. Set speed by segmentation with high precision of elbow pipes. The sixteenth level elbow pipe data setting and storage, and remarkably smooth assembly of work pieces of many angles. The functions of reboarding with auxiliary shoving and slowly returning the core can be achieved. The thin-wall pipes can be bent and manufactured. Extensively used in large ship building and repair, boiler, petroleum pipeline and auto spare parts.

DW SINGLE HEAD SEMI-AUTOMATIC
PIPE BENDING MACHINE

NCBL semi-automatic series

DW SINGLE HEAD AUTOMATIC CNC
PIPE BENDING MACHINE

DW25CNC-2A-1S (One layer mold)

DW38CNC-3A-2S (Two layer mold)

DW38CNC-5A-3S (Three layer mold)

DW130CNC-6A-4S (Four layer mold)

DW SINGLE HEAD AUTOMATIC CNC PIPE
BENDING MACHINE

Environmental bending machine

DW-50CNC-4A-3SV (with pushing bend)

SW SERIES DOUBLE-HEAD
PIPE BENDING MACHINE

SW38A
Internally or externally 90° rotary

PIPE END-FORMING MACHINE

Automatic hydraulic forming machine for pipe end expander, reducer and flange

SG40-A (One station)
Single head pipe end forming machine

SG100NC-2H-3S
Double head pipe end forming machine
