
Metal stamping dies

Our Metal Stamping factory accumulated over 20 years manufacturing experience, services can be created and designed in stainless steel, aluminum, brass, copper, sheet and steel stamped metals.

We provide the Highest Quality Custom Metal Stampings from prototype to production manufacturing and assembly to your exclusive specifications.

Metal Stamping Custom secondary services include assembly, welding, plating, painting, prototyping, and tooling for most industries.

Quality, control and cost is all important why our capabilities and in house assurance results in your metal stamping custom part or tool and die design is delivered on time.

Metal material: Steel, brass, stainless steel, copper, aluminum

Software: AutoCAD, Solidworks, ProE

General capabilities: Design-Engineering-Fabricate-Modification

Die type: Single-hit, progressive die, piercing die, trimming die, lancing die, drawing die, forming die, offset die, compound die,

Production equipment:

precise punching machines (200T, 160T, 110T, 80T, 60T, 45T), Extrusion machine, wire cutting machines, milling machines, water mill machine with big and small sizes, frilling machines

Production capability: 300sets per year

Metal stamped custom parts and components

We excel in producing a limitless variety and sizes of custom stamped metal parts used in industrial and commercial assemblies, all made to your exact specifications.

KEY STAMPING BENEFITS INCLUDE:

Prototype to Production capabilities, run length from 10 to millions
custom metal stamped and die metal parts, quality from system management of control operations.

Pricing based on the custom metal stamping quantity ordered, tooling required and the lead time necessary for on time delivery.

Whether your part is metal sheet stamping or in Steel, Stainless, Aluminum, Brass, Copper our company can provide you with impeccable quality machining services.

Metal finishes

Completed In House Metal Finishes with Various Surface Treatments include:

- Powder Coatings
- Vinyl Coatings
- Zinc Plating
- Cadmium Plating Galvanizing
- Painting Finishes
