

## V2 Pole Mounted Camera

For pipelines, wet wells, manholes, tanks, vessels

This affordable pole camera features an outstanding zoom function, a scalable carbon fiber rods and a sunlight presentable monitor.

We specially engineered this for our customers with a simple goal in mind, that is to provide a dependable and reliable inspection system with most advanced features yet simple enough to be operated by employees without much training, and affordable too.

With high-brightness led lights, it can provide better illumination performance for dark areas to increase the detection distance up to 60m and allows for capturing clear and bright images of very remote objects.

The camera sensor features 30 x optical zooming function to allow you to examine and focus on every little defect or obstruction. Then press the button on the 5.7" monitor to copy inspections to TF card or USB media. The sunlight presentable TFT monitor and its DVR allows to overlay text on the videos, name the files.

Thanks to advanced water-proof technology, the V2 system can be used in wet conditions. The 6.7m (12m customizable) scalable telescopic carbon pole allows for simple configuration to suit all kinds of manhole rapid views.

### Advantages at a glance

- Portable, Wide-angle and lightweight design
- IP68 Waterproof
- Text Generator Without Extra Keyboards
- Still Images (MPEG) and Video (MPEG4/AVI) Recording
- Telescopic Rod with Length up to 6.7m(9/12m optional)
- 700 TVL Horizontal Resolution
- ¼ EX-view HAD CCD Camera Sensor
- 5.7" Sunlight Viewable TFT Monitor
- Powerful Zoom: 30x Optical Zoom
- Auto Tilt: up 45°; down 90°
- Adjustable Superb Bright LED Illumination
- Detection Distance: up to 60m
- Explosion-proof
