>> FAQ

1. Can I use three serums together?

Yes, you can use them at the same time, but we suggest that:

- Using thinner serum first, then use thick serum.
- Or according to the absorb on the depth of the serum to skin, the order is moisturize、whitening、anti-aging
- If you use variety serum, it is better to use them separate. Not only can meet skin request, but also don't waste.

According to skin feature to use different function serum, for example, anti-aging use in U area、moisturizing serum use in face area、control oil serum use in T area, and then use whitening serum that work for spot.

2. Do it have any side-effect if use more?

No. Because our product containing natural herbs, which is safe and effective. What is more, our product is a daily skin product without any harmful formulas, such as parable, Free of parabens, alcohol or sulfates. Detail can refer to our ingredient list.

3. How quickly should I be seeing results with the HA and Vitamin C Serums?

The effects you should be seeing at 2-3 weeks is a better texture, tone, glow, with a more moisturized and plump feeling to the skin. Skin care products can take at least a month to start showing any results, and if the skin is more mature then it will take longer. These serums also stimulate collagen growth over time, with age and skin conditions playing a factor as to how quickly you will see those changes. Your skin did not become damaged and age overnight, therefore, your skin care products will not correct these issues overnight.

4. What is the percentage strength of your Hyaluronic Acid Serum?

The HA concentration level is 5%, and comprises 50% of the entire formula of ingredients.

5. What is the percentage strength of your Vitamin C serum?

The Vitamin C serum is 20% strength of Vitamin C, and comprises more than 50% of the entire formula of ingredients.

6. Is your Vitamin C serum of high quality?

Our Vitamin C Serum is of the highest quality C Serums on the market, and we put it up against other popular brands like Obagi and Perricone. In fact, many of our customers have left reviews stating they like our C Serum over both Obagi and Perricone. Of course, because everyone's skin is different some brands may work better for some people than others. Also, our serums are created in a state-of-the-art, FDA-certified facility, with years of testing and research to ensure our products are potent and made from extremely, high quality natural ingredients.

7. Can I use your Hyaluronic Acid Serum as an injectable?

No, this HA serum is not to be injected into the skin, and could be very dangerous if one injected it rather than using as a topical. Injectables undergo a different process, and the sterilization in which it is packaged is not even the same. You could suffer from an infection from injecting something that was not meant to be used in that way. Definitely leave injections to the physicians who are trained and certified to do so. If you are considering having injectables performed on your skin, please go to a doctor's office who specializes in this field. This is a very involved process that one should never administer on themselves unless they are trained and certified.
