

# X2 extreme

## Rugged HMIs for tough environments

X2 extreme panels are certified by all major classification societies. Designed to perform in rugged environments and in hazardous areas where gases, vapors and dust are present. Extended environmental capabilities include operating temperatures from -30°C to +70°C, high vibrations and high-pressure wash-downs.

*X2 extreme panels are available in 7, 12 and 15 inches, all in 3 versions: Standard versions, high-performance versions and fully sealed high-performance versions. The high-performance and fully sealed high-performance versions both offer high brightness display and optional integrated CODESYS PLC functionality.*

### Features X2 extreme

#### Wide screen format

X2 panels offer wide screen format, designed to succeed the traditional 4:3 square aspect ratio.

#### UL, CE, FCC and KCC certificates

The entire X2 range offers a strong standard certification with UL, CE, FCC and KCC certificates.

#### iX software – why you'll love our hardware

The iX software gives you smart communication tools. iX combines top-class vector graphics and easy-to-use functions that provide reliable operation, and almost limitless connectivity to your other equipment.

#### Fast forward engineering with WARP

Create integrated HMI, control, drives and data communication solutions with WARP Engineering Studio. WARP automatically configures all hardware, software and communication in your application.

#### Custom design or non-branded

Profile your brand or go for neutral. X2 panels offer custom designed or non-branded front foils, as alternatives to the standard Beijer Electronics branded versions.

#### Powerful ARM Cortex-A9 processor

Powerful dual or quad core ARM Cortex-A9 processor delivers fast screen changes and program running applications.

#### Robust aluminum housing

Robust aluminum housing with IP66, NEMA 4X/12 and UL

Type 4X/12 front. Resistant to direct rain, snow or high-pressure wash-downs, dirt, grime and dust.

#### Extreme operating temperature -30°C to +70°C

Extreme -30°C to +70°C operating temperature range guarantees trouble-free use in the harshest environments.

#### Marine certifications

The X2 panels meet extended classes of marine certifications not normally carried by HMIs, making them suitable for all onboard locations.

#### Integrated CAN bus

It's easy to interface with controllers using the integrated CAN bus.

#### SD memory card

Card holder and USB connection are located behind the lid on the back of the panel for smart memory expansion, project backup and application loading.

#### Dimmable backlight

Comfortable and safe operation in high and low ambient light conditions. Backlight is continuously dimmable to less than one cd/m².

#### High brightness display

The high-performance and fully sealed versions feature 1,000 cd/m² backlight providing excellent readability in high ambient light levels such as sunlight.

#### Add control by CODESYS

The high-performance and sealed versions offer integrated CODESYS

IEC 61131-3 PLC functionality running on dedicated CPU cores for safe and fast program execution. Just add remote I/Os for a scalable, cost-effective solution.

#### Certified for hazardous environments

Certified for use in hazardous areas where gases, vapors and dust are present.

#### Internal isolation

Internal isolation conforms to marine standards for both burst and surge immunity.

#### High vibration

Panels are tested to 4 g RMS sweep sine for vibration and 40 g 11 ms half sine for shock.

#### Extensive testing

We perform extensive testing to ensure our panels meet high environmental standards and guarantee reliable operation in challenging environments.

#### Fully sealed

Fully sealed versions with M12 connectors hold IP66, NEMA 4X/12 and UL Type 4X/12

ingress protection rating for the entire product and conform to ATEX Zone 2 and ATEX Zone 22 certification.

*X2 extreme is scheduled for release in Q3 2017.*
