# Providing Measurement Solutions Across Our Customer's Value Chain

Start to Explore Our Weighing Solution For the Industrial Environment

Flip to the next page ►►►

In addition to the industrial weighing solutions found in this catalog, we offer precision instruments and services for many applications in research and development, quality control, production, logistics and retail to customers around the world.

## R&D Laboratory

Our precise instruments are the foundation of research and quality control labs all over the world. High-performance weighing solutions offer a basis for solid R&D results. Pipettes are an essential tool for life science research. Thermal analysis instruments help to improve materials and their thermal behavior. Automated chemistry solutions accelerate the development of new chemicals.

## Quality Control Lab

Quality control relies on fast and precise analytical measurement as well as good data management. Our analytical balances, titrators, pH meters, density meters, refractometers, melting point meters and pipettes can be tailored to each customer's application and provide a fully documented workflow for every quality control lab.

## Scale-Up & Production

Our sensors for measuring critical liquid analytical parameters, such as pH and oxygen levels, water conductivity and resistivity as well as total organic carbon, enable pharmaceutical, biotech and other companies to continuously ensure product quality and meet regulatory standards. Our transmitters and connectivity solutions make data collection and integration into control systems efficient and flexible.

## Production & Filling

We offer industrial scales in all sizes and formats. We also offer terminals and software to control and monitor manufacturing processes. Specialized solutions for formulation, piece-counting and many other applications help to improve productivity and reduce errors.

## Packaging

Product inspection solutions safeguard product quality, safety and integrity, inside and out. Our systems for metal detection, checkweighing, x-ray and vision inspection provide confidence that product quality is maintained, compliance with industry standards is achieved and consumers and brands are protected.

## Logistics

Our vehicle-scale systems offer the highest level of accuracy and can prevent unexpected downtime thanks to a unique design and remote diagnostics capabilities. For express carriers, in-motion weighing, dimensioning and identification software solutions increase throughput and provide revenue recovery opportunities.

## Food Retail

From retailers' receiving docks to their checkout counters, we enhance efficient handling of fresh goods with weighing, packaging, pricing, wrapping and labeling solutions. Internet-enabled scales greatly facilitate in-store marketing, fresh item management, promotions and more.

# Terminals for Bench and Floor Scales

## Flexible and Accurate

To maximize overall equipment effectiveness, it is critical to use a terminal with application flexibility that allows the weighing system to be easily integrated into your overall manufacturing operation. Our weighing terminals are designed for use with bench and floor scales so you get a maximum return on your weighing-equipment investment.

► [www.mt.com/ind-bench-floor](http://www.mt.com/ind-bench-floor)

Many bench scales are used in manual working environments in which equipment ergonomics and ease of use impact operational productivity and quality. The terminals' vivid color HMI, multi-lingual operator messages, configuration menu and responsive tactile keys maximize operator efficiency.

### Added Capabilities with Peripheral Devices and Systems

For many weighing applications, the process involves capturing data and integrating it into the weighing record, plus sending transaction information to a PC or printer. The weighing terminal software and communication interface must be capable of connecting to barcode scanners, external keyboards, remote displays and other devices. Our family of weighing terminals helps you create a well-integrated weighing system within your manufacturing operation.

#### Compact Design

For weighing various-sized items on a compact bench scale, a terminal mounted to the front of the scale platform provides good visibility of weight values.

#### Analog or Digital Scale Bases

Our terminals provide an interface to both analog and digital bases, allowing for flexibility based on accuracy or other performance requirements.

#### Operational Insight

Asset management and weighing performance is recorded and can be exported for analysis and mitigation actions.

#### DatabICS

##### Scale-Management Software

- Manage all scales from one PC
- Back-up/restore
- Manage scale database
- Save weighing data
- Create labels

##### Collect+ Software

- Visualize weighing and production data
- Monitor production output
- See counting efficiency, filling accuracy and giveaway

#### Barcode Scanner

- Scan orders and recall articles
- Identify operators
- Start weighing with a scan

#### Printer

- PC not necessary at every weighing station
- Immediately create labels with scale

#### Data Transfer

- Use USB as alternative data-transfer method
- Alternatively, use Ethernet or USB as data transfer method or WLAN for mobile solutions

# Terminals for Bench and Floor Scales

## Provide Enhanced Weighing Productivity

The weighing terminal is an important part of a complete weighing solution. These terminals are operator-friendly and designed for a variety of bench, compact and floor-scale applications.

# Tank- and Hopper-Scale Terminals

## Simple Integration and Monitoring

Tank, silo and machine-builder weighing applications require the ability to reliably and accurately interface weighing terminals with automation, material-requirements planning and manufacturing execution systems. Applications range from simple weight-data transfer to a plant network to complete control over a part of the manufacturing process via the weighing terminal. With our broad range of terminals, you can select the solution that fits your needs exactly.

► [www.mt.com/ind-tank-silo-hopper](http://www.mt.com/ind-tank-silo-hopper)

Typical applications include filling, dosing or blending of liquids or solid materials, batching or formulation of multiple ingredients and management of raw-material inventory levels. Whether the control of material transfer is managed by the weighing terminal or an automation controller, a rugged, accurate and reliable terminal is critical for success.

### Easy Integration

Support for multiple fieldbus protocols, sample PLC interface code and extensive product documentation speeds up and simplify integration.

### Advanced Diagnostics & Alarms

The POWERCELL® load-cell network helps pinpoint and communicate locally or remotely any weighing-system disturbances that could comprise weighing accuracy.

## Many Styles, Approvals and Technologies

Whether connecting to a single or multiple scale, analog or POWERCELL® technology, it's easy to find a METTLER TOLEDO weighing terminal that fits into your production process. With models available for mounting on a wall or column, or with a panel mount and DIN-rail mounting system, the fit into your machine and process is right for your needs. Our models, with global hazardous-area and weights-and-measures approvals, help ensure that local regulations are met. Multi-lingual product documentation and terminal user interface messages speed up installation and training while increasing operator performance.

Our family of weighing terminals provides capabilities that help you create a well-integrated weighing system within your manufacturing operation.

# Vehicle-Weighing Terminals

## Control Your Weighing Process

Maximizing your operational performance requires a weighing system that provides accurate, reliable and easy-to-understand information from your vehicle scale. While the vehicle scale itself is the foundation of your weighing system, without a high-performance weighing terminal, you cannot maximize efficiency in your operations that depend on vehicle-weight data.

[www.mt.com/ind-vehicle](http://www.mt.com/ind-vehicle)

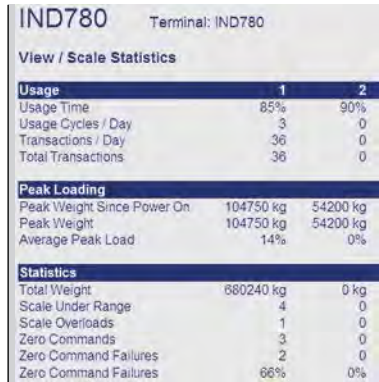

Vehicle-management software with databases of stored truck information and control over gates and loops provides increased productivity and improves the utilization of a vehicle scale. On-board data storage makes reporting easy. Efficient file export and flexible communication simplify data export to higher-level operations and software applications.

**Protection from Environmental Influences**  
Lightning-strike resistant electronics and an EMI-protected digital signal to all load cells ensure reliability.

**Advanced Diagnostics and Alarms**  
The POWERCELL® load-cell network helps pinpoint and communicate (locally or remotely) weighing-system disturbances that could compromise weighing accuracy.

**Operational Insight**  
Asset management and weighing performance is recorded and can be exported for analysis and mitigation actions.

### Interface with POWERCELL® PDX®

The power and flexibility of METTLER TOLEDO scale terminals enable them to be successful in the most demanding vehicle-weighing applications. The latest-generation POWERCELL® PDX® load cell provides protection beyond traditional analog load cells, securing both the integrity of your process and your profits. Accurate vehicle scale weights are ensured, day in and day out, under the most severe operating conditions, with predictive diagnostics constantly monitoring your scale and minimizing downtime costs.

POWERCELL PDX networks guard against failure by monitoring, logging and proactively notifying users on a variety of factors that can affect system integrity.

# Custom Programmable Terminals

## A Tailored Solution

METTLER TOLEDO channel partners have the weighing expertise and local support capabilities to provide a complete weighing solution. Depending on your process, it can be beneficial to customize the application software running on the weighing terminal. Several of our terminals have the ability to run customized software, optimizing your manufacturing operations.

► [www.mt.com/ind-programmable](http://www.mt.com/ind-programmable)

The right software architecture ensures that weighing functionality is not affected when custom programs are used with our programmable weighing terminals. Our terminals also provide powerful standard software functionality so the customized solutions benefit from the many core functions that exist in the terminal.

**Powerful Data Interface**  
SQL data replication functions are supported, allowing for syncing between terminal and external databases.

**HMI Customization**  
Touch and non-touch color HMI with a broad variety of intuitive icons provide a rich canvas on the user interface.

**Flexible Connectivity**  
Data interface to peripheral devices, automation and plant networks can be managed via a variety of serial and Ethernet-based connections.

### Integrate with PC or PLC-based Applications

While standard weighing terminal software manages data interfaces in a flexible way, there are many applications that could benefit from modifying the terminal HMI information layout and database format. The ability to export to an external database or guide an operator through a complex operation via a sequence of manual and automated actions is also desirable.

The secure, stable, documented and supported METTLER TOLEDO terminal software customization tools, such as Visual Studio, provide programmers with a solid toolset from which to create their applications. Additionally, program files can be backed up, archived or shared via standard methods.

# Custom Programmable Terminals

## A Perfect Fit within Your Process

Advanced weighing applications often can be made more efficient with a custom-programmed terminal that provides a tightly integrated and powerful system. We offer a range of programmable weighing terminals from which to select the most suitable solution.

# Terminals for Hazardous Areas Compliance and Safety

Protection and safety without compromise are requirements for working in hazardous areas. These terminals have been certified to the latest global standards, helping to ensure that your weighing system is suitable for such production environments. Additionally, they provide enhanced capabilities for the safe communication of weighing data to the hazardous area via a variety of interfaces.

► [www.mt.com/ind-hazardous](http://www.mt.com/ind-hazardous)

METTLER TOLEDO offers hazardous area approvals in most major markets. Obtaining required approvals, such as ATEX, IECEx, NEPSI, US/Canada NEC/CEC and other local standards, helps to ensure that equipment meets local regulatory requirements.

## Easy Integration

Support for multiple fieldbus protocols, sample PLC interface code and extensive product documentation increases processing speed and simplifies integration.

## Filling, Dosing and Blending

Powerful application software and I/O suitable for use in hazardous areas automates the material transfer process.

## AC or Battery Powered

Terminals can be powered either via a fixed AC power supply or a compact rechargeable battery to enable mobile-weighing applications.

## Safety and Connectivity in Explosive Environments

To increase safety while improving production efficiency, intrinsically safe equipment is the protection method of choice. Intrinsically safe weighing systems for hazardous areas consist of several components, such as weighing platforms, terminals, power supplies, communication modules and safety barriers. Typically, they can also incorporate a wide range of peripherals, such as PCs, printers or data communication systems. METTLER TOLEDO's intrinsically safe weighing terminals provide the benefits of modularity and flexibility to allow a variety of communication interfaces, such as serial interfaces, Ethernet TCP/IP and a wide range of automation fieldbus types.

# Terminals for Hazardous Areas

## Deliver Safety and Connectivity

Intrinsically safe technology provides protection without difficult-to-maintain and bulky cast flame-proof enclosures. Our range of intrinsically safe terminals for use in hazardous areas provides safe basic weighing or, for more advanced applications, connectivity to peripheral devices in safe or hazardous areas.

# Terminal IND570 with Fill-570 Software For Filling, Dosing and Blending

Modular, multi-functional and easy-to-program, IND570Fill supports quick adaptation of material-delivery processes to changing business needs. Whether integrated into an existing control system or functioning as a stand-alone process controller, IND570Fill provides flexibility to deploy workforce and manufacturing resources for maximum productivity.

► [www.mt.com/IND570](http://www.mt.com/IND570)

Fill-570 offers easy-to-program filling, blending and dosing sequences, together with fast-updating discrete I/O. These capabilities combine to create a reliable and accurate stand-alone process controller offering real potential for savings.

## Performance Monitoring

The Pac Statistics function calculates performance statistics. It provides data to help identify system adjustments that can shorten cycle times, reduce waste and improve margins.

## Integrated Data Storage

Fill-570 includes libraries for materials, formulas and containers. Recall stored data for use in production with an easy barcode scan to improve process efficiency and avoid errors.

## Expandable Solution

The IND570 terminal offers multiple PLC interfaces and a broad command set that eases integration into existing control structures so you can capitalize on existing investments.

## Supported Material Transfer Cycles

Enhanced Material Handling Capability for IND570

The following pre-programmed material transfer cycles and features are included:

- Fill
- Blend (up to 6 materials)
- Dump
- Cycle Combinations
- Learn Mode
- Auto Tolerance Check

# Batch-780 Application Software For Formulation or Batching

Engineered for the food, specialty chemical, plastics, glass and aggregates batching and formulation markets, IND780batch works as a stand-alone terminal for single or multi-scale applications. It offers high speed cut-off and Ethernet connectivity for PCs, terminals and configurable I/O. Installation and setup are quick and easy, providing a “box-to-batch” solution.

[www.mt.com/IND780batch](http://www.mt.com/IND780batch)

The IND780 batch provides multiple control options. The system is easily adapted to most batching, filling and formulation applications, providing functionality for automatic, semi-automatic and manual modes of operation. It also supports automatic material transfer with input from up to four scales.

### Stand-alone Operation

Operating without the need for a PLC or DCS system, the IND780batch is equipped with a large, easy-to-read color graphics HMI display.

### Easy Configuration

IND780batch includes libraries for materials, formulas and containers. Recall stored data for use in production with a barcode scan to improve process efficiency and avoid errors.

### Increased Manufacturing Efficiency

Enhance your automatic material transfer batch process by adding the Q.IMPACT® material transfer control feature.

**IND780batch PC Configuration Tool**  
Configures equipment, creates and manages recipes and orders, generates track-and-trace data and reports; provides connectivity to customers databases

**Barcode Scanner**  
Input devices simplify material lot and batch tracking

**Printer**  
IND780batch terminal prints batch data automatically and on demand

**Recipes / Orders**  
Configuration tool downloads recipes and orders to one or more IND780batch PC terminals

**Batching System**  
IND780batch terminal controls automatic and manual batching processes

## Integrated Batching Solution

### Features and Benefits

Controller	Self-contained, stand-alone controller
Simultaneous Operation	Supports up to 4 scales
Inputs & Outputs	Supports up to 40 inputs and 56 outputs
Formulation Mode	Manual formulation only or fully-automatic
PC Configuration Tool	Allows recipe and order creation, track and trace logging, security setup, and usage report
Storage	Storage for up to 1,000 recipes that can each contain up to 99 steps
Batch Adjustments	Ability to adjust batch order size by percent, target value, or ingredient amount with recipe looping capability

# Q.iMPACT

## Software for Optimized Feed Control

In many applications, the characteristics of a raw material or the delivery system itself can impact feed-rate accuracy. Patented algorithms embedded in Q.iMPACT™ material feed controllers from METTLER TOLEDO dynamically adjust target parameters in real time to ensure ongoing accuracy.

[www.mt.com/IND780](http://www.mt.com/IND780)

Q.i-780 combines second generation Q.i advanced material transfer control technology with the features and benefits of the IND780 terminal. Q.i-780 is engineered to work with your control platform to master feed measurement, management and cutoff control for all your batching, blending, filling, dosing and formulation processes.

**Minimize Production Cost**  
Reduce costly overfills, underfills, rework and scrap while decreasing the number of required operator touches for better productivity.

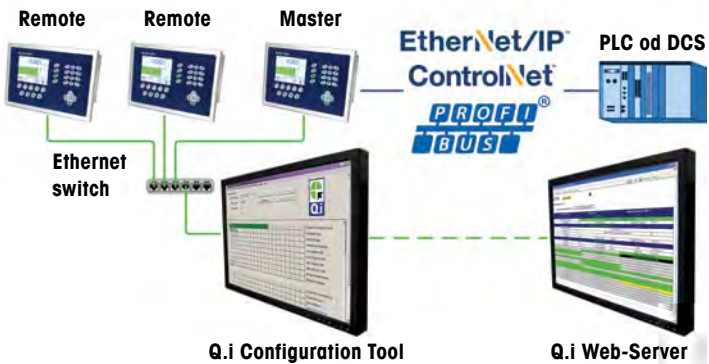

**Increase Manufacturing Capacity**  
Fast Q.i control algorithms reduce feed time while maintaining or improving feed accuracy.

**Improve Material Feed Accuracy**  
Continuously model and compensate for normal process variability during each feed while maintaining or improving throughput.

### Material Transfer Control for Batching, Blending and Filling Applications

#### Features and Benefits

<b>Flexible</b>	Concurrent monitoring and control of scales, load-cell systems and flow meters; gain-in-weight, loss-in-weight and flow-meter feeds cover all types of material transfer
<b>Innovative</b>	Patented Predictive Adaptive Control (PAC) algorithms consistently minimize material feed variability and maximize production throughput
<b>Powerful</b>	Q.i terminal clustering allows for large systems comprising up to 198 scale/flow meter combinations
<b>Integrated</b>	Multiple fieldbus options allow freedom to choose PLC or DCS platforms and maintain existing control platform architecture
<b>Efficient</b>	Q.i single-speed feed control provides fast and accurate control without extensive control hardware while built-in auto-jog automatically corrects out-of-tolerance feeds
<b>Safe</b>	Pre-feed condition ensures stable scale and prevent possible vessel overflow
<b>Smart</b>	Post-feed check verifies feed performance
<b>Proven</b>	Documented cost savings and attractive ROI in a broad variety of industries and applications

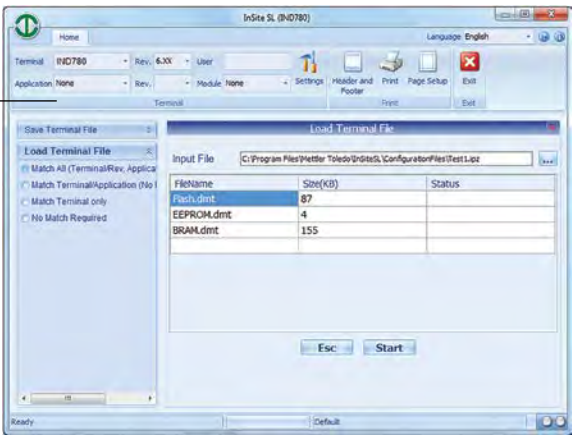

# InSite® SL

## Terminal Backup Software

The InSite® SL is a PC application that can be used to save the values of various terminal setup parameters and restore them at a later date or copy them to other terminals.

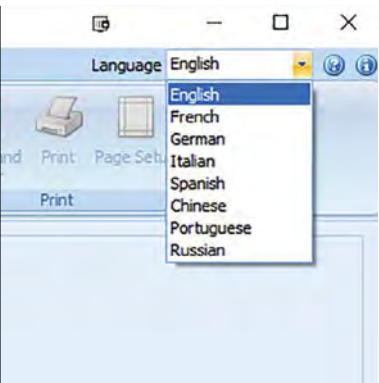

► [www.mt.com/Insight-SL](http://www.mt.com/Insight-SL)

InSite® SL is compatible with most METTLER TOLEDO IND and ICS weighing terminals. Drop-down selection tools allow easy weighing terminal connection.

### Secure

Password protection on the terminal prevents inadvertent or unauthorized changes to the terminal configuration, both via InSite and via the weighing terminal HMI.

### Multi-Language Enabled

InSite offers multiple user languages that match those available in the weighing terminal. It is compatible with Windows 7, 8, and 10 operating systems.

### Easy to Use

InSite provides easy back-up and restoration of METTLER TOLEDO weighing terminal configuration files via either a serial or Ethernet connection.

## Full Data Backup to a PC or Network of Important Terminal Files

### Features and Benefits

Application Back-Up	Save terminal-specific application files for back-up or restore.
Data Safety	Table information, such as stored tares values, can be saved and restored.
Configuration History	Configuration files can be saved for archiving purposes.
Secure Access	Manages security settings to avoid unauthorized file retrieval.

# Automation Transmitters

## Connectivity Made Easy

Due to high speed update rates up to 600Hz, a PLC can control the weighing process without any supporting transmitter function. Maximum flexibility is guaranteed with state-of-the-art PLC communication.

► [www.mt.com/terminals](http://www.mt.com/terminals)

State-of-the-art PLC communication with floating-point weight values and status bits mean no further PLC software conversion is required.

**High Speed**  
600Hz PLC update rate and 1,200Hz I/O update rate allow for wide application in packaging, sorting and checkweighing.

**Digital I/O**  
Achieve maximum process control via ultra-fast digital inputs and outputs.

**Run Flat**  
Monitors PowerCell® load cells online, alarms in case of failure and provides RunFlat function; ensuring that manufacturing can continue.

### Filtering for Stable Results

The ACT350 family provides sophisticated TraxDSP filtering, which can be set up to match the application. Filtering cut-off frequency, stability filter and environmental adaption allows you to find the best compromise between response time and stability.

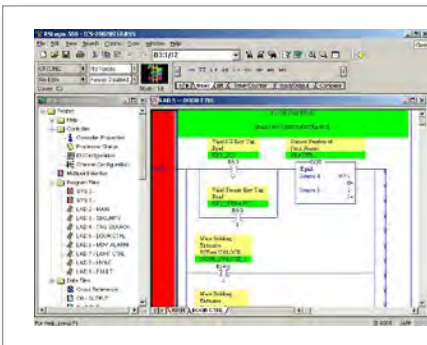

# Automation Transmitters

## Process More, Faster

Automation transmitters convert the load-cell signal into a scale signal that is PLC-compliant and digital or analog-output ready for post-processing. They are typically installed in control cabinets.

Our Solution  
To Manage Your Production

# Software Solutions for Data Management

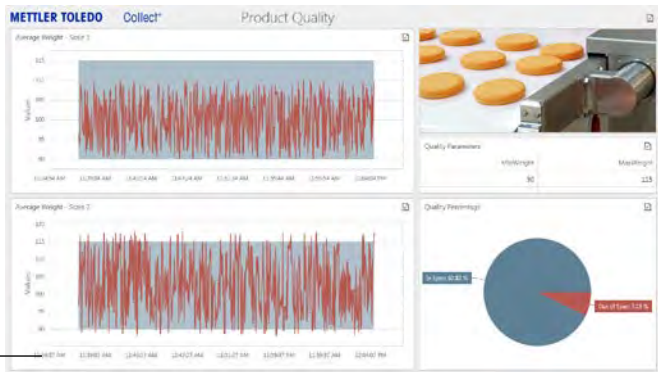

## Operational Excellence through Analysis

When operational excellence is your goal, data is everything. Our software solutions automatically and securely collect production data from the shop floor through to your entire value chain. Analyzing that data allows you to make informed decisions that can ultimately impact business results.

[www.mt.com/ind-software](http://www.mt.com/ind-software)

### Data Storage and Representation

Collected data must be archived in a central location. Our software allows you to retrieve the data for analysis in Excel. Use dashboards and standard software reporting tools to get insight into your production process. Drill-down functionalities are available to provide you with detailed information.

### Formulation Recipe Management

Eliminate operator error and material waste for greater predictability and profitability. Ensure high-quality process results with proper data handling.

### Statistical Quality Control

Comply with legal requirements by archiving sample-based production parameters in a centralized database. Create and analyze statistics for productivity improvements.

### A New Perspective

Create a graphical perspective of your process data. View data in multiple ways to see your results in an easy to understand way.

## The Power of Integrated Software Solutions

### Achieve High-Quality Results and Productivity Improvements!

Make use of various production data sources while complying with legal demands and international standards.

<b>Data Management</b>	Collect, archive, maintain and manage data in a central location.
<b>Data Integration</b>	Use process-data information in multiple departments and for different roles to better understand and improve your value chain.
<b>Production Process Analysis</b>	Understand production process deviations and make relevant changes by analyzing data to build key performance indicators.
<b>Plant-wide Optimization</b>	Compare results with other divisions and sites to improve the entire business.
<b>Documentation</b>	Automatically collect data and avoid costly manual collection. Store data electronically to ensure consistent documentation of all production process data.
<b>Audit</b>	Use current and historical data to deliver evidence of proper production according to international standards and legislations.
<b>21 CFR Part 11</b>	Software solutions also can be introduced into validated environments that comply with international standards.

# Dispensing and Formulation System

## Process Guidance for Consistent Quality

FormWeigh.Net® software for recipe management and material dispensing provides intuitive guidance for your production process. It allows you to optimize your manufacturing process by eliminating operator error and material waste for greater predictability and profitability.

[www.mt.com/FormWeighNet](http://www.mt.com/FormWeighNet)

**Take Control of Your Processes**  
Each process step is displayed for the operator in easy-to-understand screens. Quality checks are enforced at weighing stations. Automatic scale selection provides assurance that the operator cannot make a mistake.

**Reliable, Traceable Results**  
Electronically document your processes and results on a centralized database without compromising your flexibility. Take control of your workflows to see which orders are completed, in progress or awaiting processing.

**Increase Production Yield**  
Powerful functions, such as FEFO (First Expire – First Out), allow you to fully utilize your materials and reduce waste. This helps make your production more cost-effective and environmentally friendly.

**Simplify Your Tasks**  
FormWeigh.Net for dispensing and formulation is designed to simplify your complex and demanding formulation needs. An intuitive formulation process ensures stable product quality from batch to batch.

### Ensure Consistency

#### Automated Batch Evidence Reporting

Master Data Management	Monitoring and reporting keep materials and processes under control. Allows fast access to crucial control functions so you can easily manage materials, instructions, recipes, orders, history, label reprints, reports and users.
Advanced Stock Management	Optimized material picking – according to FEFO principle (First Expire – First Out).
Textual Instructions	Increased operator efficiency by guidance through reliable and documented process steps. Release personnel from countercheck principles and assign parallel tasks.
Reporting	Use a set of standard reports including weighing, manufacturing, exception, order, consumption or materials list. Tailor your custom reports to your corporate design guidelines.
21 CFR Part 11 Ready	Ensure FDA compliance and electronic documentation.
ERP Data Integration	Seamless online data management. Exchange production data with ERP systems to prevent errors and data redundancy.
System Setup	Network solution with MS Windows operating system and MSSQL Database.

# Data Collection and Monitoring

## Solid Support for Business Decisions

Collect+™ data collection and visualization software brings a new perspective to your processes. It graphically represents trends, offering the transparent operational views necessary to maintain high-quality, profitable manufacturing.

[www.mt.com/collectplus](http://www.mt.com/collectplus)

### Intelligent Data Capture

Efficiently store all measurement values centrally. Easily export raw data to other systems in your plant, including Microsoft® Excel®, via the web-based interface.

### Remote Monitoring Display

View material levels in remote silo farms or track environmental factors, such as temperature and pressure. Specify how often the measurement should be checked and see the dashboard update automatically.

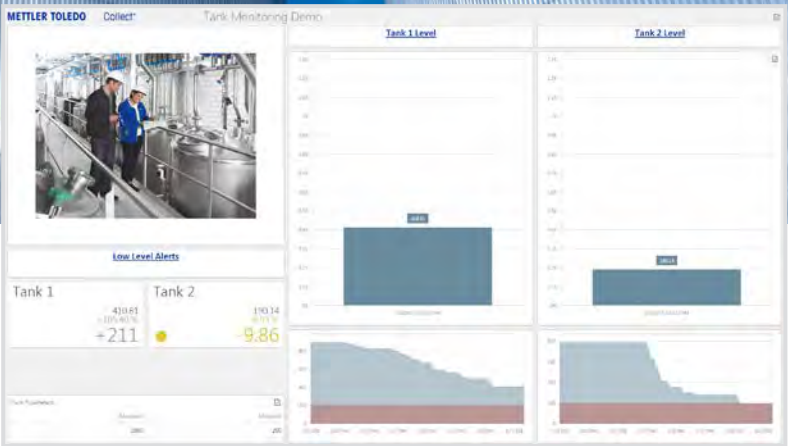

### Monitor Product Quality

Display your key performance indicators in helpful dashboards to observe trends and highlight deviations. Ensure the quality of your product by taking corrective action before failures occur.

### Track Production Efficiency

Estimate process performance by work station on a timely basis or analyze total throughput. Predict how many parts will be completed within a specific timeframe to better allocate resources.

### Collect+™ Data Collection

#### Link Your Scales to Your Business

Represent process trends and key performance indicators graphically to support sound decision-making and maintain quality and profitability.

Data Collection	Collect process data from many types of devices, including scale terminals and other sensors. Retrieve data via RS232 or Ethernet TCP/IP connections.
Graphical Visualization	Easily analyze current production status using dynamic and engaging dashboards. View dashboards from anywhere in your plant, even on tablets.
Knowledge Sharing	Share web-based dashboard links with others so they can view on their PCs. Save data as CSV files and dashboards as PDF files for archiving. Export data to Microsoft Excel for advanced analysis or transfer to other systems.
System Requirements	MS Windows 7 SP1 or higher, 2.0GHz dual-core processor, 4 GB RAM, 200 GB free HDD
Web Browser Support	MS Internet Explorer 11, MS Edge, Google Chrome 35 and higher, Mozilla Firefox 30 and higher, Apple Safari for iOS 7 and higher
Database Support	Microsoft® SQL Server® 2008 SP3 / 2008 R2 SP2 / 2012 SP2 / 2014
Device Compatibility	Compatible with METTLER TOLEDO scale terminals, and many other devices with data output
System Setup	Stand-alone or network

# Statistical Quality & Process Control

## Legal Compliance and Productivity

FreeWeigh.Net™ for process control helps you comply with legal requirements by documenting and archiving sample-based production parameters in a centralized database. Furthermore, it helps you optimize filling processes and reduce overfills to enhance productivity and maximize revenue.

[www.mt.com/FreeWeigh](http://www.mt.com/FreeWeigh)

**Provide Documented Evidence**  
Meaningful diagrams help users to identify quality issues in the production process. Sample mean values as well as standard deviations are presented. A quality statistic provides information about total production to help increase productivity.

### Quality and Filling-Cost Control

#### Control Your Process, Enhance Productivity

Use weight statistics to control your filling process and comply with legal requirements.

Batch Management	Manage batch data. Create batch reports and release batches.
Multi-component Weighing	Weigh and control multiple components constituting one product.
Multi-head Statistic Control	Ensure quality per filling head or see the mean value of a set of multiple filling heads.
Attribute Control and Test Plan	Simultaneously check non-weighing data, such as visual control, to achieve a comprehensive test plan for consistent documentation. This includes connectivity to third-party devices.
Statistical Process Control (SPC)	Recognize process deviations immediately through underlying defined rules.
Formula Editor for Customized KPI	Define and create your own key performance indicators to optimize reporting and decision-making.
21 CFR Part 11 Ready	Ensure validation in a regulated environment.
System Setup	Operate this solution as stand-alone system or as part of a network application.
More Information	<a href="http://www.mt.com/FreeWeigh">www.mt.com/FreeWeigh</a>

**Connectivity to MES/ERP**  
Connectivity is key to thorough and complete process control. Connect FreeWeigh to any third-party device, PLC or software solution.

**Control Beyond Weight**  
Check attributes of any visual control or automated non-weight data, such as torque, density and much more, to complete your statistic.

**21 CFR Part 11 Compliance**  
The system helps to ensure compliance for FDA-regulated industries. Perform system validation and make use of audit trail and electronic signature documentation.

# Statistical Quality Control

## Ensure High-Quality Production

Statistical quality control (SQC) is an important production aid to ensure consistent quality throughout your process by controlling variables, such as weight. With the IND890SQC terminal, all basic control-system requirements are met with a fast, easy-to-operate and reliable standalone solution. You gain an intuitive interface to fine-tune production in the easiest way possible.

[www.mt.com/IND890sqc](http://www.mt.com/IND890sqc)

### Constant Control

A big touchscreen with an intuitive menu guides the operator through the predefined product sample test sequence. Integrated tolerance systems support you in your efforts to comply with national and international net-content legislation and global standards.

### Ready for Harsh Environments

The terminal is designed for hygienically sensitive environments. It comes marked IP69K, making it suitable for high-pressure, high-temperature wash-down applications.

### Ease of Use

The system provides pre-configured information so operators can configure it in just a few steps. It is user-friendly and easy to set up and operate.

### All-in-one Quality Assurance

IND890SQC is a powerful and efficient SQC tool. Receive meaningful results of random sampling from useful, easy-to-understand reports.

## Stand-Alone Statistical Quality Control

### Reliable Information for Quality Assurance

Collect, calculate and report information allows operators to react immediately if a violation occurs.

Touchscreen Interface	Standard on all models at 10" size, measured diagonally.
Environmental Protection	IP69K compliant, suitable for harsh industrial environments. Stainless housing with Ra<0.8µm surface finish.
Data Storage	Internal compact flash storage memory standard in all models.
Connectivity	Ethernet connectivity standard for integration into industrial networks. Select and install up to six interfaces including scales, USB and serial (RS-232) for connection to PCs, printers and bar-code readers.
Regulatory Compliance	Choose from several different tolerance systems for effortless regulatory compliance.
Flexible Reporting	Export reports to a memory stick or a network-accessible server folder.
Operation	Enter product information quickly and accurately using the touchscreen HMI. An information line messages the operator if a sample series or statistic has passed or failed.

# Weighing Data Transfer Solution

## Software for PC-Based Scale Integration

WeighSync DC software allows data from individual weighing transactions or stored tables to be transferred automatically from a terminal to a central database using an Ethernet or serial connection. Weighing data transfer can be automated in real time or initiated manually, or can occur on a set schedule.

[www.mt.com/ind-WeighSync](http://www.mt.com/ind-WeighSync)

Pre-defined templates enable quick connection to a broad variety of METTLER TOLEDO industrial weighing terminals. From within WeighSync DC software, simply select the terminal's template from a drop-down menu.

### Flexible Data Integration Application for Weighing Terminals

#### Features and Benefits

Supported Devices	Connects to METTLER TOLEDO industrial weighing terminals, laboratory scales and non-METTLER TOLEDO products via the custom-configuration interface.
Data Input Types	Demand Print data from weighing terminal print templates and data from standard tables found in METTLER TOLEDO industrial weighing terminals.
Data Viewing	Live data transfer monitoring with an ability to view detailed data from multiple devices.
Data Mapping	Ability to specify the number of data fields, length of each field, data type and characters to remove from the incoming data string and match desired database formats.
Search Functionality	Supports transaction data searches by device name and serial number, data range and data type.
Data Reporting	Complete or filtered table reports are available to view, print or export in .csv format.
System Requirements	Microsoft® Windows 7® or Windows 8® Operating System.
More Information	<a href="http://www.mt.com/ind-WeighSync">www.mt.com/ind-WeighSync</a>

**Flexible Configuration**  
Custom configuration parameters provide the flexibility to define data structures that can be mapped a Microsoft® SQL Server Express database.

**Scalable for Future Growth**  
The WeighSync network supports serial connection to communicate with older terminals, but it is also ready to take advantage of newer, Ethernet-enabled products.

**Data Reporting**  
Use collected data to create tables and graphs for reporting in Microsoft® Excel® and other programs for efficient tracking and tracing.

# Scales and Platforms

## For Wet and Harsh Environments

Stainless-steel scales and platforms are designed for easy and fast cleaning with IP protections up to IP69k. They are fit for heavy wash-down applications and hygienically sensitive processes and can be used in a broad range of applications from checkweighing and portioning to counting. Choose the one that meets your process needs, whether you work with food, pharmaceuticals, or chemicals.

► [www.mt.com/bench-scales](http://www.mt.com/bench-scales)

Wherever product integrity matters, color-Weight® checkweighing can be used as a fast and cost-effective quality assurance method. Our scales provide clear information as to whether quality specifications are met and a product is safe for further processing.

### Premium & Advanced

Provide checkweighing and classifying in hygienically sensitive areas. Benefit from full-graphic display technology, an alphanumeric keypad and multiple interfaces.

### Industrial Basics

Industrial Basic Scales feature quality scales at attractive prices. They are suitable for basic food, chemical or manufacturing applications in dry and wet environments.

### Weighing Platforms

Solutions are available from 0.6 to 600 kg and thanks to innovative measuring technology, accuracies as low as 1 mg can be reached.

## Built for Efficient Cleaning

IP69K-protected terminals and hermetically sealed load cells, engineered in conjunction with platform designs conforming to the latest hygienic guidelines, enable easy access to all scale areas for efficient and easy cleaning.

- Stainless-steel construction
- No open threads
- Smooth surface finish
- Minimized horizontal surfaces
- Full-penetration welding

# ICS Bench Scale Series

## Where Hygiene Counts

The ICS689, ICS469, ICS449, ICS439 and ICS429 bench and compact scales series can be used for a variety of applications, including over/under checkweighing, counting, classifying, filling and many more. The full stainless-steel design makes it best suited for wet, harsh or hygienic environments especially in the food, pharmaceutical or chemical industries.

► [www.mt.com/bench-scales](http://www.mt.com/bench-scales)

The ICS product family supports fast and efficient portioning and classifying processes. Whether filling small containers placed on the platform, or using the powerful take-away mode for filling without a keystroke, ICS scales help to speed up productivity by as much as 20%.

### Fast and Secure Data Management

An embedded database stores up to 5,000 articles and 300,000 weighing records for secure traceability and compliance.

### colorWeight® Speeds up Production

Save time and money with the smart colored display that makes weighing applications faster and less error-prone.

### Mobile Operation for the Flexibility of Your Processes

An optional WLAN interface and long-lasting Li-Ion battery pack allows flexible operation anywhere in the facility.

## Hygienic Design for Sanitary Environments

From occasionally wet to harsh wash-down conditions, these scales can take it. The stainless-steel platforms and terminals of the ICS6 and ICS4 series provide a flexible and rugged solution for a wide range of weighing tasks. All parts have been engineered and manufactured according to the latest hygienic-design guidelines, resulting in a construction without closed cavities or sharp edges and minimized horizontal surfaces. This allows easy, fast and efficient cleaning.

Connect your scale via Ethernet, WLAN or USB for easy data-transfer. Add a barcode reader or other peripheral for secure material identification.

## Configurations for Wet Environments

ICS689, ICS469, ICS449, ICS439 and ICS429 bench and compact scales are the perfect solution for any application in wet and harsh environments. These terminals and platforms offer rugged stainless-steel design with excellent ingress protection, which helps to guarantee long product life despite frequent intensive cleaning.

# BBA236 Bench Scale Series

## Durable – Reliable – Economical

The BBA236 stainless steel scale is a robust and easy-to-operate all-in-one solution. It is a perfect fit for basic applications in dry and short-time wet industrial environments. The user-friendly terminal promotes fast operation and measurably improve production efficiency.

► [www.mt.com/BBA236-eu](http://www.mt.com/BBA236-eu)

In addition to five tactile and responsive standard keys, the scale features two freely definable function keys. This allows fast and easy switching between functions and ensures quick set-up and easy use.

### Highly Visible Display

For excellent readability under any light condition, the BB236 scale features a large, 60 mm high LCD display with an adjustable white backlight.

### Versatile Usage

The scale includes an RS232 interface, which allows communication with a printer or PC. Its stainless steel enclosure is both stylish and functional.

### Rugged and Easy to Clean

The IP65 protected platform, with its open, sturdy and straightforward design, allows efficient cleaning and helps to reduce possible bacterial contamination.

# ICS226 Compact Scale Series

## Mobile – Ergonomic – Compact

The ICS226 Compact Scale is a portable scale for weighing and portioning in food production and packaging applications. This full stainless-steel scale is IP65/IP67 protected and a good fit in any light wash-down application with a need for ruggedness and durability.

[www.mt.com/ICS226](http://www.mt.com/ICS226)

**Manufacturing Flexibility**  
Removable handles and a high-quality Ni-MH rechargeable battery make the ICS226 a fully portable and mobile scale for flexible operation everywhere in your facility.

**Ergonomic and Rugged Keypad**  
The high-quality membrane keys and the duplicated Zero/Tare buttons provide long life and convenient operation.

**Bright, Easy-Read Display**  
The ICS226 compact scale includes a large and highly visible LCD display and an intuitive graphic checkweighing indicator for easy readability.

# PBK989 Bench Platform Series

## For Precision in Any Environment

For applications that require high reliability with industry leading metrological performance, PBK989 high-precision bench platforms, with resolutions of up to 750,000 divisions, are the right choice. Their unique platform construction makes them suitable for a variety of challenging environments, including areas with high humidity, that need regular cleaning or are classified as hazardous.

[www.mt.com/PBK9](http://www.mt.com/PBK9)

The Monobloc load cell at the core of the PBK9 weighing platform guarantees the highest precision and reliability. The robust load-cell housing features integrated overload protection and durable mechanical interfaces for many years of intensive use.

**Increased Throughput for Fast Processes**  
Industry-leading stabilization times make the platforms suitable for high-speed weighing processes.

**Safe in Hazardous Environments**  
The platforms are approved for top performance in gaseous, dusty environments - Category 3/ Division 2.

**Direct Connectivity for Safe Processes**  
PBK9 APW weighing platforms can be directly connected via plug-in cables to many process-control systems.

# PBA430(x) Bench Platform Series

## When Cleanliness Really Matters

For wet and harsh applications that require high weighing reliability, the PBA430 full stainless steel platform series, featuring a hermetically sealed load cell is the right choice. Easy to clean, it supports internal quality management systems in the food, pharmaceutical and chemical industries. The PBA430x can also be used in hazardous areas.

[www.mt.com/PBA430](http://www.mt.com/PBA430)

PBA430(x) weighing platforms are manufactured according to recognized EHEDG and NSF guidelines. They can be used in hygienically sensitive areas with HACCP requirements and when working to meet GMP standards.

### Fully Protected Load Cell

The high performance, hermetically sealed stainless steel load cell grants a protection of IP68/IP69k. It can withstand any harsh wash down procedure.

### Rugged and Reliable

The PBA430 design features a seamless welded construction and optimally placed overload stops to provide the best possible protection against load cell damage.

### Safe in Hazardous Environments

These platforms are approved for top performance in gaseous and dusty environments – Category 2 and 3.

# PBA429(x), PBA426(x) & PBA226 Platforms

## For the Most Flexibility

These platform series offer solutions for a wide range of weighing tasks in anything from light wet to harsh washdown environments. They are a perfect fit in any food, chemical or pharmaceutical processing application in which there is a need for durability and cleanliness. The PBA429(x) and the PBA426(x) can also be used in hazardous areas.

[www.mt.com/PBA429](http://www.mt.com/PBA429)

This stainless-steel platform series was designed according to hygienic standards. The open, sturdy and straightforward mechanical design allows access to any part of the platform for efficient cleaning.

**Hermetically Sealed Load Cell**  
This load cell makes the PBA429(x) series the perfect choice for applications in extremely harsh conditions. It withstands steam and high pressure washdown.

**Stainless-Steel Load Cell**  
This load cell makes the PBA426(x) series a good choice for any light washdown application. It features excellent resistance against water and humidity.

**High-End Aluminum Load Cell**  
This load cell makes the PBA226 series applicable for light hose-down applications. It features moderate protection against water and humidity.

# Scales and Platforms

## For Dry and Dusty Environments

These series offer a wide range of scales and platforms designed to integrate easily into your weighing process, whether you need checkweighing, counting or quality-assurance applications. Select your optimal combination and raise your throughput. At the same time, you will increase process security and improve product quality.

► [www.mt.com/bench-scales](http://www.mt.com/bench-scales)

Save time and money with our smart colored display. colorWeight® makes completeness checks, portioning, classifying and counting simple and fast while reducing error risk. The display indicates at-a-glance if weight or count is below, within or above target.

### Optimize Your Processes

Speed counts in today's competitive environment. Manufacturers are expected to produce error-free, high-quality products in record time. METTLER TOLEDO scales and platforms provide solutions for fast and accurate weighing, mixing, counting and checkweighing to increase your throughput.

Built not only to offer superior weighing performance, these instruments are designed for a long working life in rugged dry and dust-contaminated environments.

Intuitive user menus and available data-management systems allow proven traceability of your weighing processes, capturing everything from definition of articles and tolerances to tare values.

The intuitive user menus and the superior weighing performance increase the throughput and allow for fast and accurate results.

#### Premium & Advanced

Obtain accurate counting and checkweighing results in dust-contaminated environments. Benefit from full-graphic display technology, an alphanumeric keypad and multiple interfaces.

#### Industrial Basic Series

Industrial basic scales feature quality at attractive prices. They are suitable for basic food, chemical or manufacturing applications in dry and dusty environments.

#### Weighing Platforms

Solutions are available from 0.6 to 600 kg and thanks to innovative measuring technology, accuracies as low as 1mg can be reached.

# ICS Bench Scale Series

## When Productivity and Flexibility Counts

The ICS685, ICS465, ICS445, ICS435 and ICS425 bench and compact scales series can be used for a variety of applications including counting, over/under checkweighing, classifying and filling. The rugged design makes these scales suited for dry and dust-contaminated environments in a variety of industries, such as metal fabrication, plastic molding and electronics.

► [www.mt.com/dry-bench-scales](http://www.mt.com/dry-bench-scales)

When verifying inventory, packaging or production quantities, every part or piece is important. The ICS689 & ICS4\_5 scale family provides solutions to make parts-counting applications fast, accurate and cost-effective.

### colorWeight® Speeds Up Production

Save time and money with the smart colored display that makes weighing applications faster and less error-prone.

### Mobile Operation for Flexible Processes

An optional WLAN interface and long lasting Li-Ion battery pack allows flexible operation anywhere in the facility.

### Fast, Secure Data Management

The embedded database stores up to 5,000 articles and 300,000 weighing records for secure traceability and compliance.

## The Right Solution Tailored to Your Specific Needs

The ICS685, ICS465, ICS445, ICS435 and ICS425 product family is a highly modular product range consisting of a large variety of terminals and platforms to best fulfill your specific requirements. From simple weighing to integrated solutions with multiple components including third-party devices, a wide range of configurations are possible.

Connect your scale via Ethernet, WLAN or USB for easy data-transfer. Add a barcode reader or other peripheral for secure material identification.

# ICS Bench Scale Series

## Configurations for Dry Environments

ICS685, ICS465, ICS445, ICS435 and ICS425 compact scales are the perfect fit for your applications in dry or dusty environments. Whether you need a scale for simple weighing, advanced counting or quality control applications, you will find the perfect solution for your specific needs.

# BBA231 Bench Scale Series

## Fast – Versatile – Economical

The BBA231 bench scale is a cost-effective, easy-to-operate one-for-all solution and a perfect fit for basic applications in dry and dust-contaminated environments. The user-friendly terminal with its highly visible display promotes quick operation and can measurably improve production efficiency.

► [www.mt.com/BBA231](http://www.mt.com/BBA231)

In addition to five tactile and responsive standard keys, the scale features two free definable function keys. This allows fast and easy switching between functions and ensures quick set-up and easy use.

### Highly Visible Display

For excellent readability under any light condition, the BB231 scale features a large, 60 mm high LCD display with an adjustable white backlight.

### Versatile Usage

The scale includes an RS232 interface which allows communication with a printer or PC. Its plastic enclosure is both stylish and functional.

### Robust Construction

The rugged platform construction ensures durability and accurate weighing results. Overload stop protects the load cell from damage.

# ICS241 Compact Scale Series

## Convenient – Smart – Efficient

The ICS241 is a versatile counting and simple-weighing scale for various industrial environments, including production, warehouse & logistics, packaging and quality control. It offers an easy-to-use interface with an intuitive LCD display and alphanumeric keypad for easy, fast operation.

► [www.mt.com/ICS241](http://www.mt.com/ICS241)

The ICS241 offers configurable soft keys for fast access to key functions, such as sampling and counting. The numeric keypad allows for fast input of tare or sample weights.

### Smart Database Management

The transaction database can save each counting/weighing result and up to 30,000 entries via SD card for traceability.

### Batteries for Mobile Operation

The ICS241 features an easily accessible battery compartment with six D-size dry or rechargeable batteries for self-contained operation.

### Intuitive LCD Display

The large graphic LCD display shows text and graphics for excellent operator guidance. All relevant information is shown on one screen.

# PBK987 Bench Platform Series

## For Precision in Dry Environments

For applications that require high reliability with industry-leading metrological performance, PBK987 high-precision bench platforms, with resolutions of up to 750,000 divisions, are the right choice. Their unique construction makes them suitable for a variety of challenging environments, including heavily dust-contaminated areas.

[www.mt.com/PBK9](http://www.mt.com/PBK9)

The Monobloc load cell at the core of the PBK9 weighing platform guarantees the highest precision and reliability. The robust load-cell housing features integrated over-load protection and durable mechanical interfaces for many years of intensive use.

**Increased Throughput for Fast Processes**  
Industry-leading stabilization times make the platforms suitable for high-speed weighing processes.

**Accurate Counting**  
Instead of using a separate reference scale for counting applications, one PBK9 with a fitting terminal (e.g. ICS685) can be used for the entire process.

**Direct Connectivity for Safe Processes**  
PBK9 APW weighing platforms can be directly connected via plug-in cables to many process-control systems.

# PBD655 and PBA655(x) Bench Platforms

## For Reliability in Dry Environments

The digital PBD655 and analog PBA655(x) bench-scale platform-series are designed for durability and reliability. They are the perfect choice for dry and dust-contaminated environments, such as receiving, inspection, manufacturing and warehousing. The platforms feature resolutions of up to 60,000 divisions.

[www.mt.com/PBD655](http://www.mt.com/PBD655)

The PBD655 platform series is a rugged digital device designed for simplicity and dependability. It features an approvable resolution of OIML 6,000e. This provides optimal accuracy while still being cost-effective.

### Ready to Operate in Seconds

The PBD655 platform is a true digital, pre-calibrated device designed for simplicity. Plug the platform into a suitable terminal and start weighing.

### High Durability

The extremely robust platform design features an approvable resolution of OIML 6,000e for optimal weighing and counting precision.

### Damage Protected

The PBA655 platform features several overload stops to ensure the best possible load cell protection and long life.

# Floor Scales and Platforms

## For Dry, Wet and Harsh Environments

Our versatile floor and platform scales provide you with the highest precision, reliability and durability for a variety of heavy-duty applications in industrial environments. Easy to clean and move, they can be configured for ground or pit weighing.

► [www.mt.com/floor-scales](http://www.mt.com/floor-scales)

METTLER TOLEDO floor and platform scales are durable and reliable in industrial settings thanks to rocker-foot suspension and an installation frame that transfers vertical load. Their hygienic design includes a lift deck, making these scales extremely easy to clean, while a low profile and wheel set enables easy handling and flexibility.

### Built for Your Specific Applications

Our versatile platform structures are a great fit for applications that require easy cleaning, moving and loading. They are designed for heavy-duty, high-precision weighing in food, pharma, chemical and manufacturing settings.

- Models in stainless and painted mild steel
- Smooth and patterned surface options
- Rocker-foot suspension
- Low profile lift deck; optional wheels for mobility
- Hermetically sealed load cell rated IP68 / IP69k
- Hygienic design
- MonoBloc weighing cell and hybrid leveling system
- Also available as pallet and pallet truck scales

#### Advanced Technology

A MonoBloc load cell and hybrid platform allow high-precision weighing with resolutions up to 30,000e in weights from 300 kg to 30,000 kg.

#### Hygienic Design

These scales are ideal for hygienic applications and quick wash-down due to smooth surfaces, washout areas, a lift deck and an IP69k rating.

#### Low-Profile Lift Deck

Easy to load, lift and clean, these scales enable mobile weighing for greater flexibility and productivity.

# Ultra-Low Profile Platforms

## Quick, Safe, & Easy Loading

Our ultra-low profile weighing platforms are designed for easy loading and cleaning in a space-saving construction with no pit required. They offer reliable weighing performance in dry, wet/wash-down and hygienic environments depending on platform structures, materials and finishes.

# VFS120 Forklift Scale

## Unbeatably Robust

Designed for tough industrial environments, METTLER TOLEDO forklift scales set the standard for reliability, safety and accuracy in heavy-use applications. Whether your business is freight logistics, shipping or warehousing, on-board weighing can significantly speed up your processes.

[www.mt.com/VFS120](http://www.mt.com/VFS120)

3-point suspension stabilizes loads for accurate weighing, even when they are uneven. This promotes repeatable measurement and reduced need for regular calibration.

### Onboard Pallet Weighing

#### VFS120 Forklift Scale

The VFS120 forklift scale can be installed on any Class II forklift truck and is an ISO-approved accessory compatible with any other ISO-approved accessories.

Capacity	1,500 / 2,000 / 3,000 / 5,000 kg 3,000 / 5,000 / 7,500 / 10,000 Lbs
Resolution	1,000~1,500e
Stable Weighing Time	1-2 seconds
Angular Compensation Range	Pitch $\pm 5^\circ$ , Roll $\pm 3^\circ$
Overload	Safe overload: 150% / limited overload: 300%
Capacity Loss	~15% of forklift capacity
IP Protection	IP65 for electric parts
More Information	<a href="http://www.mt.com/VFS120">www.mt.com/VFS120</a>

#### Accuracy Over Time

Experience consistently high weighing accuracy without the expense and hassle of frequent adjustment. VFS120 holds calibration for 12 months.

#### Rugged and Reliable

The heavy-use scale carriage enables you to keep working when other scales break down. Minimal maintenance and a long lifespan ensure low cost of ownership.

#### Designed for Safety

The scale has a high-visibility window, making it easy for the forklift operator to see loads, position forks for lifting and avoid accidents.

# BBA242 Scale Family

## The Right Shade from the Start

Improve your paint-mixing efficiency and accuracy. BBA242paint and BBA242form bring a new level of comfort and functionality into the automotive body shop. An RS232 interface allows you to download up to 20 recipes from a PC. Graphics guide you through mixing. Automated correction modes can be accessed in case you overshoot. BBA242paint offers all the features you need for PC-based mixing control. BBA242form adds formula mode.

► [www.mt.com/BBA242](http://www.mt.com/BBA242)

The easy-to-use graphic display allows operators to mix a formula by following guided steps. The appropriate color code and required quantity will be displayed for a precise match. Each downloaded recipe is easy to access and process.

### Full Graphic Display

The backlit graphic LCD display allows full text and multi-language communication, guiding you through paint mixing with ease.

### True Industrial Design

BBA242 has been developed for the ruggedness of the automotive body-shop environment.

### Extensive Connectivity

With RS232, USB and WLAN connection options, BBA242 scales integrate into almost any IT environment.

# ADI856 HD Touchscreen System

## The Right Color at Your Fingertips

With a large HD color touchscreen display, ADI856 gives you the ability to mix paint using your PC more easily than ever before. You can control the entire process from the solvent-resistant touchscreen display. The touchscreen display comes standard in an easy-clean, stainless-steel housing. ADI856 works with all standard PCs and is compatible with all paint and office-software packages.

► [www.mt.com/ADI856](http://www.mt.com/ADI856)

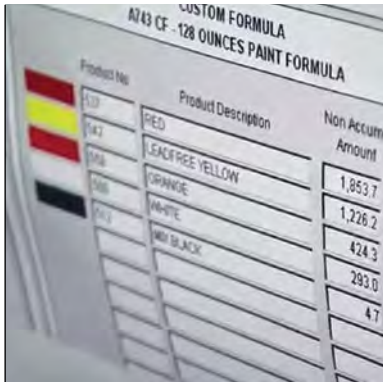

In the refinishing industry, obtaining the perfect color match for the job is critical. Even the smallest drop can make a difference. The ADI856 HD touch-sensitive display mirrors the information from your remote PC, allowing you to control the formulation software from the mixing room. This provides quick and accurate results.

**Large HD Touchscreen Display**  
The 15.6" HD color display is easy to read and can be adjusted to avoid glare. The bright color display allows you to easily select the right formula for your job.

**True Industrial Design**  
ADI856 is simple to install and works with all standard PCs. It has been developed for the ruggedness of the automotive body-shop environment.

**Direct Scale Integration**  
Our intrinsically safe BBA242 paint scales can be connected directly to the ADI856, providing complete control of the scale and paint-mixing software.

# BC Scale Family

## Perfect for Letters and Parcels

BC scales are designed to provide postal, carrier and express applications with faster processing, better accuracy and easier set-up. BC scales feature analog and digital load cells with advanced compensation and multi-interval capabilities. They are simple to set up and operate thanks to USB connectivity, an intuitive display menu and an easy-to-use boot-up wizard. The wizard facilitates initial installation by prompting for required parameters.

### Communications to Meet Connectivity Requirements

BC scale supports Carrier serial protocols, plug and play USB, OPOS drivers, Ethernet for cloud or server based applications and Bluetooth for wireless mobility communication.

### Flexible Configuration

Scales are adaptable with special capacity and increment sizes, multiple display options and special platter designs to allow faster parcel processing.

### Processing Letters and Parcels in One Self-service Kiosk Scale

Kiosk scales are utilized with no display or a remote mounted display. All functions including calibration can be done through the scale communications.

## Rugged and Reliable Design

BC scales offer high durability and long life due to all-metallic frames and heavy-duty overload protection. A single scale can weigh light envelopes with high precision, while robust overload protection allows the same scale to handle the shock of heavy parcels.

# APR Printers

## For Industrial Weighing Applications

APR printers are ideal for when clear and accurate label printing is required in industrial environments. With the lowest total cost of ownership in their class, a compact footprint and multiple connectivity options, these models pack the power of an industrial printer into an easy-to-service, modular design.

#### APR310

Fast, Compact, Flexible

- **Blazing Fast Ticket Printing**  
Fast ticket and/or slip printer for printing multi-part documents up to 42 columns in width.
- **Easy to Use**  
Simple to operate control panel makes the printer ideal for applications in scale houses, offices or at shipping and receiving docks.

#### APR510

Compact, durable label printer

- **Economical Operation**  
Stationary print head and economical high-capacity ribbons keep cost of ownership low. Labels print individually, reducing waste.
- **Easy to Use**  
Simple operator interface and quick-loading media make for trouble-free use. Wired and wireless connection options support easy setup and integration.

#### APR710

Rugged, high-speed industrial printer

- **Simple Interface**  
Easy to navigate, menu-driven LCD displays indicate printer status and facilitate operator input. Side window provides instant visual assessment of label stock.
- **Easy Set-Up**  
Straightforward media loading and routing. A variety of options available including a peel-and-present mechanism, cutter and tray ensemble, and an internal re-wind kit.

# Multi-Purpose Weigh Modules Right the First Time

Tank weighing made easy. SWB505 MultitMount and SWC515 PinMount weigh modules are designed to fulfill broad application requirements for process tanks, storage silos and conveyor weighing. Suitable for high-precision requirements, they are available in resolutions up to OIML C6/NTEP 10,000 d. Three material selections allow use in various environments.

► [www.mt.com/compression-wm](http://www.mt.com/compression-wm)

360-degree checking is a key for superior safety. Independent of weigh module orientation, maximum safety ratings are achieved.

## Superior Safety

High mechanical safety, 360° checking, drop down protection and lift-off protection keep the tank in place.

## Easy Integration

Safelock avoids load-cell overload during shipping and installation.

## Helpful Accessories

Agitators, hot tanks, vibration and shock loading, the right accessories are available for even extreme cases.

## Fully Specified Safety Ratings

Silo and tank scales are critical in terms of safety. Tipping can lead to human injury, product loss and financial damage. To support mechanical safety calculations, METTLER TOLEDO weigh modules are fully specified to normal, yield and ultimate limits. All values are verified by real physical testing (picture). Yield limits are typically used for dimensioning against infrequent events such as heavy-wind loads, while ultimate limits are used for one-off events such as severe earthquakes.

# Multi-Purpose Weigh Modules Right the First Time

SWB505 MultiMount and SWC515 PinMount provide broad application capabilities for silo, tank, hopper and conveyor scales. With the right accessories, they cope with agitators, hot contents, vibrations and shock loading.

# PowerMount Weigh Modules Know What's Ahead

PowerMount Weigh Modules use PowerCell technology for its superior performance and diagnostic features. Each PowerCell is monitored on its performance and an alarm is created if problems occur. This makes manufacturing more reliable by making sure failures do not go unrecognized and cause inaccurate weigh results.

► [www.mt.com/ind-powermount](http://www.mt.com/ind-powermount)

## RunFlat

In the rare case of load cell failure, RunFlat allows simulation of the faulty load cell. Operation can continue until the problem is solved. This reduces down-time as much as possible.

## Superior Safety

High mechanical safety, 360° checking, drop down protection and lift-off protection keep the tank in place.

## No Junction Box

PowerMount uses a daisy-chain network and thus does not need junction boxes, which is a great improvement in terms of reliability.

## Helpful Accessories

Agitators, hot tanks, vibration and shock loading, the right accessories are available for even extreme cases.

## OIML C10 Accuracy

When accuracy really matters, PowerMount Weigh Modules are available in C10 accuracies three times better than usual. This is possible because PowerCell is more than a digital load cell. PowerCell load cell errors are actively compensated by an inbuilt  $\mu$ -processor. Other errors – unavoidable in analog systems due to cables and junction boxes – are fully eliminated. Electromagnetic impacts are also under control with PowerMount.

# PowerMount Weigh Modules

## Know What's Ahead

SWB605 and SWC615 PowerMount weigh modules allow you to control processes and predict potential trouble before serious costs occur. They are available in superior accuracy up to OIML C10, NTEP 10,000 d. CalFree™Plus provides the most accurate calibration method without the use of test weights.

# Specific-Purpose Weigh Modules Cope with Extremes

When standard weigh modules are not suitable, these special products provide solutions. Low-profile, ultra-high capacity, redundant weighing or suspended hoppers – they cover them all. METTLER TOLEDO sales experts can help you find the best solution to your individual situation. Professional installation and calibration is provided by our service team.

► [www.mt.com/weigh-modules](http://www.mt.com/weigh-modules)

## Redundant Weigh Module

For very critical applications where wrong weighing results can cause significant follow-up costs, redundancy should be considered. Two completely independent load cells in one weigh module allow online comparing of results and action in case of failure.

## Low Profile

These modules' 60–100 mm (2.3–4 inch) height can be integrated even when space is tight.

## Tension Weigh Module

These modules convert suspended hoppers into reliable weighing devices, with all necessary features for easy implementation and accuracy.

## Heavy Capacity

For storage silos beyond 200 t, METTLER TOLEDO supports design and integration.

## Weigh Module Systems Handbook

Selecting the right weigh module requires know-how and experience. The METTLER TOLEDO Weigh Module Systems Handbook for engineers deals with all aspects of designing safe and accurate tanks scales. Get a free copy:

# Value Line Weigh Modules Economical Solutions

For general-purpose weighing when the next dollar counts, our value line weigh modules provide excellent solutions for the cost. Our dual-ended beam and cantilever-bending-beam weigh modules are built to last and perform in tough environments.

► [www.mt.com/weigh-modules](http://www.mt.com/weigh-modules)

## Value Line Weigh Modules

Value Line weigh modules offer good value for general-purpose weighing of tanks, hoppers, conveyors, and OEM machinery. They use cantilever-bending-beam or dual-ended-beam load cells to deliver accurate and repeatable weighing. We offer economic weigh modules suitable for static loading in applications where thermal expansion/contraction occurs as well as applications that have minimal lateral movement. Mounting hardware is available in zinc-plated carbon steel, painted carbon steel, and stainless steel to stand up to a variety of environments.

## Load Cells

The cantilever-bending-beam load cells in the SWB220 are hermetically sealed for IP68 to IP68/IP69K protection. The dual-ended-beam load cells in the SWD440 and VLM3 are designed with potted seals for IP67 protection.

## Suspension

SWB220 has a rigid suspension designed for minimal lateral movement. SWD440 and VLM3 have a bearing-pin suspension designed to allow the top plate to slide laterally to compensate for thermal induced movement

## Multipurpose

Suitable for general-purpose weighing of tanks, hoppers, conveyors, and OEM machinery.

## On-demand Webinars

# Weigh Module Accessories

## Match the Application

We have the right accessories to match weigh modules to tanks that require mixers, high temperatures or strong vibration/shock loading. Dead stands allow use of passive legs for economic level-control solutions. Precision junction boxes connect analog load cells as accurately as possible.

## Load Cells

### When Accuracy Matters

**METTLER TOLEDO load cells are made with the most modern equipment according to global quality standards. Our internal teams work closely together to help ensure that you are always able to access the highest quality load cell technology available.**

► [www.mt.com/loadcell](http://www.mt.com/loadcell)

**Fully approved**

METTLER TOLEDO load cells are fully approved to global standards. Hazardous approvals come standard with load cells, so there is no need to order options, greatly simplifying logistics.

## Superior Accuracy

Accuracy up to OIML C6, NTEP 10,000d allows you to build the most accurate scale for your needs and keep processes under control.

## Stainless Steel

Many load cells are made from stainless steel and laser welded for highest reliability even in harsh environments.

## Accessories

The right load-cell accessory is crucial for achieving the highest possible load-cell accuracy and lifetime.

## ISO 9001 Development/Manufacturing

METTLER TOLEDO's load cell manufacturing facility has been ISO 9001:2015 certified. Load-cell development follows strict standards. All 100A cells must pass an 11-step testing procedure that includes reviews for metrology, IP-rating and shock absorption. During manufacture, full data collection allows optimization for product reliability and accuracy.

# Single-Beam Load Cells

## Convert Structures to Scales

Beam load cells are used in multiples in floor scales, belt weighers, weighing systems, pallet scales, conveyor scales, and more. Most METTLER TOLEDO beam load cells are fully approved to OIML, NTEP, FM and ATEX as a standard so they can be used in legal weighing systems globally.

# Single-Point Load Cells

## Easy System Integration

Single-point load cells are used individually in scales, hopper scales, process control systems, conveyor weighing, packaging machines and check-weighing systems. Moment-insensitive single-point load cells allow for eccentric loads and simplify weighing system design, as the load cell copes with all occurring forces and moments without losing performance.

# WMS High-Precision Weigh Modules

## Robust Precision Weighing

The WMS family is designed for high-precision automated weighing in instruments, machines and isolators. It features models with readabilities from 0.1 mg to 10 mg with weighing capacities from 120 g to 6,200 g. The compact design means that installation is straightforward and space-saving. Rugged stainless steel housing and wash-down features make it the ideal choice for integrated weighing in analytical and production applications.

[www.mt.com/WMS](http://www.mt.com/WMS)

### Integrated Calibration Weight

The module can be checked at any time with the internal calibration weight. Adapters on the weighing pan do not have to be removed for calibration if they weigh less than 50% of full load.

### High Precision

Designed to meet the most demanding customer specifications, the WMS is a high-speed high-accuracy weigh module with readability up to 0.1 mg.

### Rugged Design

The 316L (1.4404) stainless steel housing with FDA-compliant seals and a rugged industrial plug connector with IP67 protection ensure high levels of reliability.

### Flexible Platforms

Customer-specific adapters can easily be fixed to the square shaped weighing platform which is rigidly connected to the weigh module by means of a patented locking device.

# WMF High Precision Weigh Modules

## Direct Automation Interface

The very high resolution of the weigh module – up to 2 million digits – enables the weighing of different container sizes on the same weigh module. The modules' very compact design includes power supply and industrial Ethernet connectivity without additional control cabinet space.

[www.mt.com/WMF](http://www.mt.com/WMF)

### Plug & Communicate with Most Common PLC Systems

WMF is dedicated for use in automation. Connectivity via Ethernet/IP or PROFINET IO RT is incorporated in the space saving, compact unit. Fully engineered and comprehensive Device Description Files make PLC integration easy. The transferred weight value is ready to be used in the PLC program.

### Comprehensive Overload Protection Assures Uptime

WMF weigh modules are designed to have a long service life because of their innovative overload protection against forces from all directions. This protects accuracy of the weigh module during normal operation but also in the event of malfunction.

### Test Functionality and Accuracy at Any Time

The production process does not need to be interrupted for calibration with an external reference weight, since the module's internal weight can be used to check functionality.

### Protection Allows Liquid Rinsing for Clean-in-Place

Stainless steel housing (316L), FDA compliant sealing and the optional IP65 wash-down feature allow in-place cleaning procedures with water or liquid chemicals.

# WKC High Precision Weigh Modules

## Compact Precision Weighing

WKC weigh modules offer a compact and cost-effective solution for on-board weighing in automated applications where high resolution is needed. Standard M12 connectors and fully integrated electronics minimize integration efforts and enable quick and easy installation.

[www.mt.com/WKC](http://www.mt.com/WKC)

### Compact Design

Fully integrated electronics help to save space in the machine/instrument design. No additional unit is needed for communication. Weigh modules can be integrated in machines/instruments with tight space requirements.

### Easy Configuration

A computer-based software for parameterization, diagnostics, and data backup makes getting started easy. This allows the WKC weigh module to be customized for virtually any application.

### Robust

Stainless steel housing and coated connection cable protect the weigh module against external physical and electromagnetic influences. This ensures reliability of weight values and extends product life.

### Quick Functionality Test

Thanks to the internal weight, it is possible to check correct functioning of the weigh module at any time, even with preloads. This saves calibration time and reduces down-time.

# WMC High-Precision Weigh Modules

## The Smallest Footprint in Automation

The innovative WMC weigh module is the perfect combination of compactness and high accuracy. It exceeds the performance required for such modules and enables new applications, thus introducing new capabilities into the weighing technology field.

[www.mt.com/WMC](http://www.mt.com/WMC)

### Small in Size, High in Performance

An innovation clearly differentiates itself from known solutions by offering a novel combination of function and design, which can in turn trigger new developments. The WMC weigh module is innovative because it combines high accuracy with minimum space requirements, allowing it to be installed almost anywhere along a production line.

**Extremely Small and Compact**  
The ultra-compact WMC weigh module is ideal for integration into instruments and machines. Its very small width of 25 mm helps to keep overall dimensions of test and filling devices smaller than ever.

**Very Fast Weighing**  
The low mass of the WMC weigh module protects against vibration. It enables very fast and accurate weighing with 92 filtered weight values sent via RS232 or Fieldbus to the control system.

**High IP Rating**  
With the optional wash-down module, the unit has an IP54 rating when weighing and an IP56 rating during wash-down. Thus, it becomes possible to weigh in a dusty environment and use a wash-down cleaning process.

# WX High-Precision Weigh Modules

## Maximum Precision for Automation

The WX family is designed for high-precision automated and manual weighing in instruments, machines and isolators. It features models with readabilities from 0.1 µg to 0.1 mg with weighing capacities from 22 g to 220 g. Compact design means that installation is straightforward and space-saving. The comprehensive overload protection and rugged plug-in connections are designed for use in analytical processes and production applications.

► [www.mt.com/ind-WXS](http://www.mt.com/ind-WXS)

**Integrated Calibration Weights**  
Functionality, linearity, and precision can be checked at any time with two integrated calibration weights. Customer-specific adapters on top of the weighing pan do not need to be removed for calibration if they are less than 25% of full load.

**Adaptable Weighing Pan**  
The weighing pan has 3 holes to fasten customized adapters to hold vials or tubes. Adapters may weigh 1/3 of the capacity without restricting weighing range.

**Flexible Layout and Assembly**  
The electronic unit can be installed separately from the weighing cell. The devices can be located up to 5 m apart. A set for optional DIN rail mounting is supplied with the modules.

**Below-the-Module Weighing**  
An optional adapter allows weighing suspended loads below the weigh module. Overload protection is still assured in all directions.

# PBK9 Weighing Platforms

## High Resolution in Harsh Environments

Accurate weighing helps you manage raw materials, ensure compliance with regulations and improve your product quality. For bench and floor scale applications that require reliability with the best accuracy available, PBK9 Weighing Platforms provide outstanding performance. A range of platforms with capacities from 0.6 to 300 kilograms and resolutions of up to 750,000 divisions are useful for many applications.

[www.mt.com/PBK9](http://www.mt.com/PBK9)

### Outstanding Accuracy

Thanks to its innovative measuring technology, PBK9 Weighing Platforms ensure industry-leading metrological performance. With a resolution of up to 750,000 divisions, the weighing platform is ideally suited for all weighing processes in which quality is critical and tolerances need to be minimized.

### Smart Load-Cell Technology

The Monobloc technology load cell is at the core of PBK9 Weighing Platforms. Advanced technology guarantees the highest precision and reliability.

### Reliable Process

PBK9 sensors always deliver reliable and exact results – even in the most difficult environments. This ensures you are always on the safe side when running formula, dosing and quality check applications.

### Direct Connectivity

PBK9-APW weighing platforms can be directly connected to any automation system via RS422 or RS485 and serviced with an additional RS232 interface.

# SLP85xD Load Cells

## Designed for Fast Filling Processes

To be ready for a competitive future, production equipment requires intelligent, high-performing measurement technology. SLP85xD load cells provide fast filling of liquid foods and chemicals. They also enable quick sorting and grading. Real-time status information sent to a PLC can help operators avoid unplanned downtime by allowing necessary preventive maintenance.

► [www.mt.com/SLP85xD](http://www.mt.com/SLP85xD)

### Plug & Communicate with Most Common PLC Systems

SLP85xD is dedicated for use in automation. Connectivity via PROFIBUS DP, EtherNet/IP or PROFINET IO RT is incorporated in the space saving, compact unit. Fully engineered and comprehensive Device Description Files make integration with a PLC easy.

**Comprehensive Overload Protection Assures High Uptime**  
SLP85xD family load cells have a robust, integrated overload protection which protects them against upward and downward forces of up to 100 kg.

**Cleaning with High-Pressure Water Jets and Chemicals**  
A robust stainless steel load cell body and high ingress protection with hermetic sealing according to IP69K permit aggressive disinfection procedures which are typical in the food processing industry.

**Diagnostic Features for Quality & Performance Assurance**  
The load cell monitors its status and forwards information to the PLC to alert operators to issues which might cause unreliable weight values or future equipment failure.

## Designed for Your Business

**METTLER TOLEDO protects your business by supplying you with accurate and reliable truck and rail scale solutions designed to thrive in any work environment. Whether your concern is a high volume of traffic, hazardous area, extreme weather, or all of the above, we offer the right fit based on your needs.**

► [www.mt.com/vehicle](http://www.mt.com/vehicle)

Our comprehensive design, analysis and testing program enables us to deliver scales proven to meet the demands of your weighing application. No other company tests weighbridges this thoroughly.

### Design

Throughout more than 20 years of CAD modeling, we have refined our designs to offer the best weighbridges available. Our engineers continue to innovate and build on the success of previous designs.

### Testing

METTLER TOLEDO is the only manufacturer that performs true lifecycle testing on all weighbridge models. Our unique Module Masher applies 20 years of traffic in 6 to 8 weeks.

### Analysis

Finite-element analysis shows how a weighbridge design should perform under various loading conditions. Analyzing all areas of the weighbridge allows for improvements in design.

## Keep Your Business Moving

A vehicle scale will have a long-term impact on your operation. In many cases, it is vital to your ongoing productivity and profitability. With a full range of weighbridges/truck scales and railroad scales, METTLER TOLEDO can work with you to find the right weighing solution to keep your business moving.

With industry-leading load-cell technology, software, and services – METTLER TOLEDO is your one stop shop for all things vehicle scale.

# Truck and Rail Scale Models

## Durability You Can Trust

METTLER TOLEDO vehicle scales are manufactured to the highest quality by a team of skilled engineers and welders, and then subjected to true lifecycle testing. The resulting scales are ruggedly dependable weighing machines that are made to perform.

### Remote Displays

#### For Weight Results from a Distance

Remote displays allow truck drivers and other personnel to see weights at locations other than where the scale terminal is mounted. The bright LED display is easy to read day and night. Three sizes are available with viewing distances of up to 80 m. Options include a built-in red/green traffic light and wireless communication between the display and the scale terminal. A durable aluminum enclosure makes the remote displays suitable for indoor and outdoor use.

# POWERCELL® PDX® Load Cells

## Protect Your Profits

POWERCELL® PDX® load cells have revolutionized vehicle weighing. With their unique design, they eliminate the weak link in any vehicle scale: the junction box. This simple improvement pays off with lower maintenance bills and less downtime.

► [www.mt.com/NoJunctionBoxes](http://www.mt.com/NoJunctionBoxes)

Failed load cells can cost you tons in maintenance and repair. Avoid these headaches by investing in a more reliable load cell – POWERCELL® PDX® load cells.

**Simplified Network**  
POWERCELL® PDX® load cells connect to one another in a simple network that transmits individual load cell signals to the terminal, eliminating the need for a junction box.

**Testing**  
A built-in diagnostics system gives you real-time data about the condition of each load cell, including weighing errors, environmental conditions, overloading, network health and voltages.

**Environmental Protection**  
With lightning protection tested to 80K amperes and an LC system that is completely waterproof, there is no denying the versatility of the POWERCELL® PDX® load cell system.

**Simplified Network**  
POWERCELL® PDX® load cells connect to one another in a simple network that transmits individual load cell signals to the scale terminal, eliminating the common problems caused by junction boxes.

### Proven Accuracy

POWERCELL® load cells have demonstrated their ability to weigh more accurately than all types of analog load cells. If you buy and sell goods by weight, increased accuracy can be crucial to your profitability.

- Calibration tests from thousands of real-world truck scales prove that POWERCELL® load cells are significantly more accurate than analog load cells. What makes them more accurate:
- Ability to calibrate to a high level of accuracy
  - Use of digital compensation to maintain accuracy

# Vehicle Scale Software

## Manage Smarter

**METTLER TOLEDO integrated software solutions save you time and money by giving you complete control of your weighing operation. DataBridge™ software along with industry-leading terminal options allow you to process transactions quickly and accurately to keep traffic moving.**

► [www.mt.com/DataBridge](http://www.mt.com/DataBridge)

### Integrated Scale Technology

Integrating data management software with your terminals and load cell system can improve your processing speed, inventory tracking, site connectivity and overall ease of operation. With a highly graphical and intuitive interface, DataBridge™ by METTLER TOLEDO is user friendly and adaptable to any operation. Special features include tare weight storage, weight curve capture, advanced transaction history and reporting, and the ability to sync with accessories such as lights, gates, loops and more.

### Why Use Data Management Software

Even if you have an extremely durable and accurate scale, without good data-management software, profits could be slipping through the cracks. Protect your business with DataBridge™ technology by METTLER TOLEDO.

### Improved Connectivity

DataBridge™ technology improves all aspects of connectivity for your business. Breach detection technology alerts you at the first sign of a problem. Share information between locations within an efficient and secure interface.

### Unattended Solutions

DataBridge™ unattended software enables truck drivers to complete their own weighing transactions in seconds, reducing cost by eliminating the need for a round the clock operator. Ideal for scales in remote locations and facilities with multiple scales.

### Benefits of DataBridge™:

- Better tracking of inventory and profits with reporting functionality
- Streamlines operations by going paper free
- Faster transaction times to weigh more vehicles per day
- Options for customized application design

# Dynamic Weighing

## Integrate into any Sorting System

**METTLER TOLEDO dynamic parcel scales are designed for seamless integration into any conveyor or sorting system. Choose from a variety of sizes, configurations and accessories to meet your individual operational requirements.**

► [www.mt.com/dynamic-parcel](http://www.mt.com/dynamic-parcel)

A flexible weighing point can increase scale throughput by up to 30%. The weighing time is determined based on parcel length to optimize parcel gapping.

### Plug and Play Integration

Dynamic scales offer seamless integration with dimensioners, barcode readers and conveyors. Choose from a selection of standard interfaces or request a customized protocol.

### Flexible Design

Tailor-build your system based on a number of standard designs. Choose weighing-only or a turn-key dimensioning, weighing and scanning system.

### Fast Data Communication

A real-time controller ensures high-speed data communication with the sorter. The data drop-point can be configured based on sorting requirements.

## Smart Filter Technology

METTLER TOLEDO dynamic scales use state-of-the-art load-cell technology to achieve top weighing accuracy at any speed, in all conditions.

Advanced technology filters out environmental disturbances such as vibrations from motorized systems which can negatively impact results.

Combined with a rugged, robust design, this feature works to ensure high precision and reliability in tough conditions including mezzanine installation or installation within a high-speed sorting system.

# Dynamic Dimensioning

## See More Revenue

With the ability to accurately obtain dimensions of difficult-to-measure packages of any shape at high speeds and in mass-flow sorts, METTLER TOLEDO dimensioners provide read rates and revenue recovery that others cannot match.

[www.mt.com/dimensioning](http://www.mt.com/dimensioning)

With larger optics that let in more light and a wider dynamic range, METTLER TOLEDO dimensioners provide the best read rates in their class.

**Industry-Leading Read Rates**  
Measure black, blue, glossy or bright parcel surfaces with precision for maximum revenue recovery and fewer rejects.

**Highest Accuracy and Precision**  
Achieve high accuracy and repeatable results on any type of package. Every millimeter counts when it comes to invoicing.

**Any Application**  
Whether you measure in a high-speed sorting line or a mass-flow induction line, we have a dimensioner for any application.

# CSN810 TableTop™

## Improve Manual Operations

The CSN810 TableTop™ can be easily set up in any type of parcel handling operation. The compact workstation captures parcel dimensions, weight and ID in low-to-medium throughput operations or the hospital area of an automatic sorting system.

► [www.mt.com/CSN810](http://www.mt.com/CSN810)

When built into the hospital area of an automatic sorting system, the CSN810 TableTop offers the ideal solution for capturing data on rejected parcels.

**Fast, Paper-Free Measuring**  
Improve productivity by automating the measuring process. Simply scan the barcode and capture dimensions and weight automatically.

**Simple Integration**  
Simple set-up and seamless communication to IT systems means the CSN810 is easily incorporated into existing processes.

**Easy to Use**  
A user-friendly graphical interface and ergonomic system design requires little operator training. Accurate, reliable results are guaranteed.

### Static Dimensioning, Weighing & Scanning

#### CSN810 TableTop™

The CSN810 TableTop is supplied with either a flat or roller table. It also comes in an extra-large version where the flexibility to measure larger goods is required. Specifications vary depending on the model selected.

Dimensioner Accuracy	± 5 mm
Dimensioning Range (LxWxH)	Min. object size: 50 x 50 x 50 mm Max. object size: 1,200 x 900 x 900 mm

# CSN840 Pallet™

## Profitable Pallet Handling

Robust pallet measuring solutions calculate the dimensions and weight of pallets in one step for correct classification, pricing and invoicing. Mounted overhead and out of the way of forklift traffic – and with a measurement time of just three to four seconds – the CSN840 pallet helps to maintain efficient operations.

► [www.mt.com/CSN840](http://www.mt.com/CSN840)

OCTO ImageCapture™ takes a picture of each shipment for proof of condition, content and measurement using a legal-for-trade system.

**Any Shape, Any Surface**  
Three measuring heads see pallets from all angles for accurate measurement of any shape. Large optics let in enough light to handle any surface, even black plastic.

**Flexible Design**  
Overhead mounting keeps the system clear of forklift traffic. Choose from a ceiling or wall mount and interface with your choice of floor or forklift scale.

**Robust and Reliable**  
No moving part protects the system from wear and tear. Little maintenance is required, and the robust design ensures low cost of ownership and long life.

### Pallet Dimensioning

#### CSN840 Pallet™

The CSN840 Pallet is fully approved by global weights and measures authorities and offers high accuracy for all pallet shapes and surfaces.

We approach your unique application with years of experience building custom weighing solutions including OEM applications, automation, In-Motion weighing, hazardous area systems, and more. Systems arrive ready to go complete with engineering drawings and installation instructions.

► [www.mt.com/service](http://www.mt.com/service)

METTLER TOLEDO custom systems are designed to fit your unique application. We design hazardous area systems, custom terminal hardware/software solutions, in-motion controllers, batching & filling controllers, bulkweighing controllers, I/O assembly, TaskExpert® programs, C++ and C# programs, and scale to PLC communications.

## Hazardous Area Solutions

Custom class and division rated hazardous solutions fulfill a number of regulatory requirements to fit unique needs in any industry. Options include purged enclosures, intrinsically safe barriers, explosion proof lights, and many more.

## Custom OEM Solutions

Meet OEM specifications with and IND780 with a custom TaskExpert application, integrated PLC, and EtherNET/IP communication.

## Custom Packaged Controllers

Customize IND570/780 packaged controllers with indicating lights, pushbuttons, selector switches, relays, PLC's, opto modules, heaters/fans, cord grips and conduit hubs, enclosure type and material.

We offer a quick ship option for five of the most common custom packaged terminals. These preconfigured options can be shipped faster than standard custom system orders. They include:

- IND570 Analog w/ 2 operators and E-stop
- IND570 Analog w/ 2 operators and E-stop
- IND570 Analog w/ EZ-clean lift deck controls
- IND780 Analog w/ no operators
- IND780 Analog w/ 4 operators and E-stop

# Solve Your Filling Solution Needs With Drumfillers

**METTLER TOLEDO offers drumfilling solutions with customizable options to suit your needs. Solutions are engineered to order and are capable of single drum, single tote, and multi-drum. In addition, purge, safe area, and standard panel controller options are available depending on your needs.**

► [www.mt.com/service](http://www.mt.com/service)

METTLER TOLEDO drumfillers are designed to fit your needs. We offer a variety of drumfiller options designed to fill single 55 gallon drumfillers, 275 & 330 gallon totes, and sets of (4) 55 gallon drums on pallets and totes.

## Single Drum

We offer a simple single 55 gallon drumfiller as our most basic solution. The unit is a fill-by-weigh system that can be set for top fill or subsurface fill. A conveyor option is offered as well.

## Single IBC or Tote

Intermediate bulk containers (IBC) or totes up to a maximum of 330 gallons can be filled with these units.

## Multi-Drum

The easy-to-operate swivel arm allows the operator to adjust the lance over each drum opening. A breaking system holds the arm in place when set. Also capable of filling totes.

**The Automatic Vision System is our most advanced offering. It is configurable with multiple conveyors and will run as long as there is an empty container on the scale. A photo eye makes sure the containers are correctly located on the scale and indexes the pallets to the next location on the conveyors. This allows operators to tend to other duties while the filler is running.**

# Providing Service Solutions Across Your Value Chain

Whatever the application, we provide you with a tailor-made service solution independent of industry, environment or regulation based on our four values: **Uptime, Performance, Compliance and Expertise**. We support you in mastering your daily challenges. This helps you guarantee product quality, on-time deliveries, regulatory compliance and appropriate user competences.

► [www.mt.com/service](http://www.mt.com/service)

Our instruments meet the highest technical standards.

Are you aware of your most important performance-assurance needs?

**Are fast intervention and turn-around times crucial to meet your shipment & delivery dates?**

## Uptime

You require every minute of up-time. This means guarding against equipment breakdown, parts failure and "wear and tear" issues.

**Are your measurement results meeting productivity, quality and regulatory requirements?**

## Performance

With periodic preventive maintenance, you achieve consistently accurate results, avoiding unexpected downtime and saving money.

**Does the accuracy of your measurement equipment meet your quality requirements?**

## Compliance

Whether you operate under ISO 9001 or strict pharmaceutical regulations, you require documented testing procedures and an accepted calibration certificate.

**Do you know how to apply metrological concepts, safety procedures and food and pharma standards to optimize your process?**

## Expertise

Ensure you get trained and consulted on measurement technology, regulations and applications.

## Over 5,000 Factory-Trained Service Specialists Worldwide

### Global Presence

We serve our customers worldwide with one of the largest sales and service networks in the industry to assist you in increasing the efficiency, cost-effectiveness, safety and reliability of your operational processes. Our geographically-focused market organizations ensure close relationships with users. These organizations have the flexibility to adapt support and service offerings to different user requirements.

Our factory-trained and authorized service technicians help guarantee:

- Continuous operational manufacturing quality and maximized uptime.
- Comprehensive, audit-proof and fully traceable electronic certificates.
- Consistency in procedures and certified, traceable tools.
- Highest operational performance for your compliance needs with combined equipment installation and qualification.

# A Complete Service Offering For the Entire Product Life Cycle

We support and service your equipment throughout its entire lifecycle, from installation, preventive maintenance and calibration to equipment repair. Our experience across these areas helps us offer you high-quality service. Through efficient practices, we minimize costs throughout the service call – an important feature that distinguishes us from our competitors.

► [www.mt.com/service](http://www.mt.com/service)

## Lifetime Peak Performance

With METTLER TOLEDO, you selected the most precise and reliable equipment possible and we want to ensure your absolute satisfaction over the lifetime of your equipment. Discover more about our service expertise and the benefits we can provide to you through all stages of the product's life cycle.

## Installation, Qualification and Warranty

With the combination of professional installation, setup, configuration, user training and documentation, we ensure the highest operational performance possible.

## Maintenance

With three different types of Care Packages, you achieve consistently accurate results, avoid unexpected downtime and save money over the life of the equipment.

## Calibration

Calibration is the key to quality. Gain confidence in your measurements with our industry-leading metrology expertise.

## Knowledge

Operating your equipment at optimal performance requires knowledgeable and well-trained operators, traceable and standardized documentation, and tools for quality assurance.

## Repair & Support

Fast intervention and turn-around times are key to minimizing downtime. METTLER TOLEDO's large field force, original spare parts, and remote technology all come together to provide maximum uptime.

## Service Selection Made Simple

METTLER TOLEDO provides you with the confidence to enhance your efficiency, performance and productivity by providing products based on our service values. Select the package that fits your operational needs to maximize your investment.

# Installation and Extended Care

## Ensure a Perfect Start

You expect your new equipment to fulfill all requirements right from the start. Our factory-trained service engineers install your instrument according to the manufacturer’s requirements and carry out practical operator training. A safe, routine operation is ensured so you can meet quality and regulatory standards from the beginning.

► [www.mt.com/service](http://www.mt.com/service)

**StarterPac**  
The StarterPac is designed for professional product installations and solid user familiarization in low-regulation or unregulated industries.

**IPac**  
The IPac is designed for regulated industries with the need for ensuring that products are safe and of a consistently high quality.

### Extended Care - Reliable Results, Secured Uptime and Full Cost Control

The first year of equipment operation is essential to ensure ongoing performance. The Extended Care Program protects your investment beyond the limited scope of the legal warranty with regular testing and maintenance, priority on-site service and technical hotline assistance.

“The correct equipment setup and user training improve your productivity.”

- Save time and be safe right from the start! METTLER TOLEDO installation ensures:
- ✓ Measurement accuracy thanks to expert installation and initial qualification
  - ✓ Proof of optimum equipment performance
  - ✓ Avoidance of out-of-specification measurements
  - ✓ Assurance of conformity by documented test results
  - ✓ Improved productivity through professional user training

# Equipment Qualification

## Peace of Mind on Test Results

Our qualification services can help you go the extra mile to ensure your equipment is running optimally and in a safe and compliant manner. We also ensure your environment is suitable for the equipment's intended purpose and that operators are trained on equipment functions, cleaning procedures and basic diagnostics.

[www.mt.com/service](http://www.mt.com/service)

Professional equipment qualification offers you:

- Documented performance through application of standardized calibration and performance verification procedures
- Cost savings in testing thanks to optimized qualification protocols
- Expert support for test development providing confidence that the equipment consistently performs according to process requirements
- Routine operational support protecting your investment and ensuring long-term data safety and full budget control

### Benefit from Qualification Services

Thanks to METTLER TOLEDO's equipment qualification services, you can be sure that your equipment consistently returns accurate and precise results in its dedicated working area.

**Software Validation**  
Software validation service conducted by factory-trained service technicians provides evidence that all software requirements have been implemented correctly and completely, delivering traceable results according to your system's requirements.

**Calibration & Performance**  
We carry out initial calibration and performance verification to confirm optimal equipment setup and fulfillment of your process requirements, standards and regulations.

**Globally Accepted Protocol**  
Our Installation Pacs provide documentation of the original state of the equipment as well as on-going calibration and maintenance activities. This provides a complete historical data set on your equipment performance throughout the life cycle.

# Preventive Maintenance

## For Proven Precision and Reliability

You need to rely on your equipment; it has to be fully operational and provide correct results at all times. Your processes, equipment and documentation also have to comply with regulations. METTLER TOLEDO offers various maintenance packages to fit your specific requirements, helping you reduce costs and offering peace of mind regarding measurement quality.

### Protect Your Equipment Against Downtime

Performance Issues and Unexpected Material Costs

Our ComprehensiveCare Package ensures maximum uptime and optimum performance at a fixed price. It gives you privileged access to our extensive expertise by offering a single solution for maintenance, consulting and reliability with full budget control. The package offers:

- Equipment inspection to help avoid unexpected downtime
- Equipment testing that confirms accuracy to ensure optimum performance
- Preferred service intervention to eliminate wait time for repairs
- Labor and spare parts coverage to ensure full cost control

“Periodic maintenance guarantees accurate measurements and optimal equipment performance.”

Increase accuracy, reliability and process efficiency with regular maintenance from METTLER TOLEDO Service:

- ✓ Optimum equipment performance
- ✓ Reliable operating procedures
- ✓ Traceable measurement accuracy
- ✓ Proactive protection against equipment failure
- ✓ Higher testing throughput

# Compliant Under Any Circumstances With Calibration and Verification Services

You hold yourself to the highest standards of product quality. Your measurement equipment is the centerpiece of your quality system and you want to measure safely and avoid the cost and inconvenience of inaccurate measurements. You expect your measurement results, processes, equipment and documentation to meet any and all internal and external requirements.

► [www.mt.com/service](http://www.mt.com/service)

METTLER TOLEDO Service knows what it takes to stay compliant. Our service offerings ensure that you can relax and focus on your operations without worrying about your measurement results. We offer a variety of calibrations, specialized calibration tools and professional certificates to help you get accurate results and pass audits at all times.

## Compliance and Quality

Achieve and maintain compliance through consistent procedures and adherence to local and global regulations and standards such as: ISO 17025, EURAMET, GLP and GMP, NIST Handbook 44, OIML, and Measuring Instruments Directive (MID).

## Reliable Process

The METTLER TOLEDO calibration and certification software system ensures that 100% consistent, step-by-step testing procedures for METTLER TOLEDO equipment are followed by our service technicians globally. Within this process, we generate comprehensive and fully traceable electronic certificates. These electronic certificates are stored and archived in our highly secure database.

## Direct Connectivity

With the ACC, you calibrate your weighing process, not just your scale. The unique GWP Annex ensures you are always weighing in a safe range to:

- Improve product quality
- Reduce waste
- Increase productivity and profit
- Pass all internal and external audits

“Competence in regulatory compliance helps us to pass audits.”

Be accurate and compliant with METTLER TOLEDO's calibration & certificate service:

- ✓ Regulatory compliance by using certified and accredited calibration procedures
- ✓ Professional, easy-to-read certificates
- ✓ Audit-proof documentation
- ✓ Reliable measurement results thanks to regular instrument calibration
- ✓ Avoidance of inaccurate measurements and their cost potential

# Calibration Certificate Management For Compliance and Beyond

Would you like to receive globally harmonized documents on service work performed on your equipment? MiraCal™, the proprietary calibration and certification system of METTLER TOLEDO, provides total consistency by guiding our service technicians through globally applicable standard operating procedures.

► [www.mt.com/service](http://www.mt.com/service)

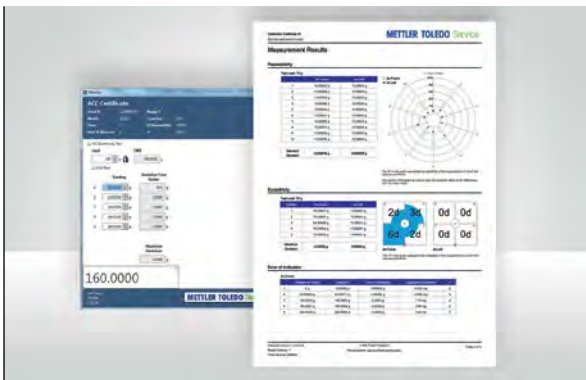

Our proprietary calibration engine generates:

- Comprehensive and audit-proof certificates
- Fully traceable electronic documentation
- Certificates retrievable on-demand from a secure database
- Optional appendices according to your requirements

### Globally Standardized Procedures

All our service teams use the same document generator to provide you with professional, standardized paperwork for installation, equipment qualification, preventive maintenance, verification and user training. In addition, this tool ensures that all technicians follow the same protocol for their work, thus ensuring uniformity independent of location and technician.

### Comprehensive and Consistent Certification

METTLER TOLEDO Service provides a wide range of high-quality certificates and reports in both weighing and non-weighing categories. Our certificate competence combined with high-quality customer service ensures each certificate will be compliant with regulations.

### Software-Driven Calibration Service

MiraCal™ certificates ensure accurate calculations and elimination of written errors. MiraCal guides our service technicians through defined operating procedures for calibrating both METTLER TOLEDO and third-party weighing equipment.

### Traceable Information

Each calibration certificate has a unique certificate number traceable back to the calibration event and service technician. All test equipment is traceable to national or international standards.

### Electronically Archived Documentation

Our proprietary calibration and certification system enforces globally applicable standard testing procedures. MiraCal provides full traceability of your certificates and paperless delivery, thus significantly supporting your efforts toward achieving an environmentally sustainable workplace.

# User Training and Application Support Confidence and Know-How

Get the most out of your equipment. Our comprehensive training courses provide you with all the skills you need to use your equipment effectively on a day-to-day basis. Profitability, compliance, and equipment longevity are fundamental to a company's success. At METTLER TOLEDO, we believe that training plays an integral part in sustaining this process and maximizing efficiency.

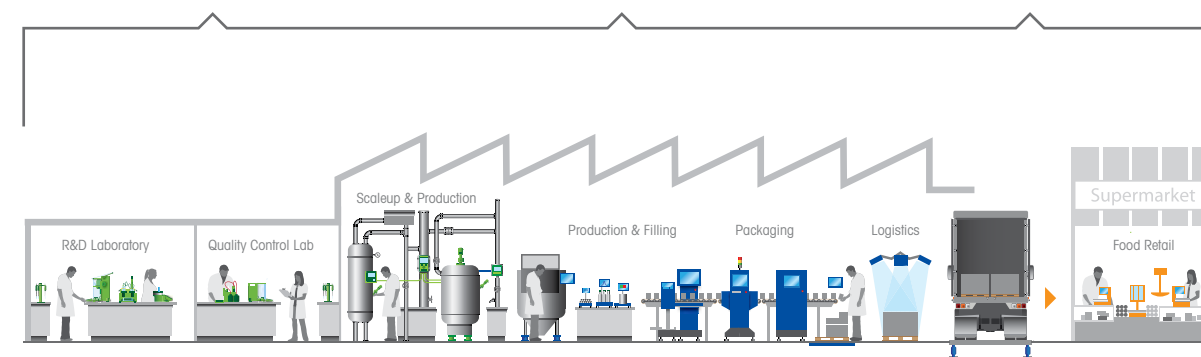

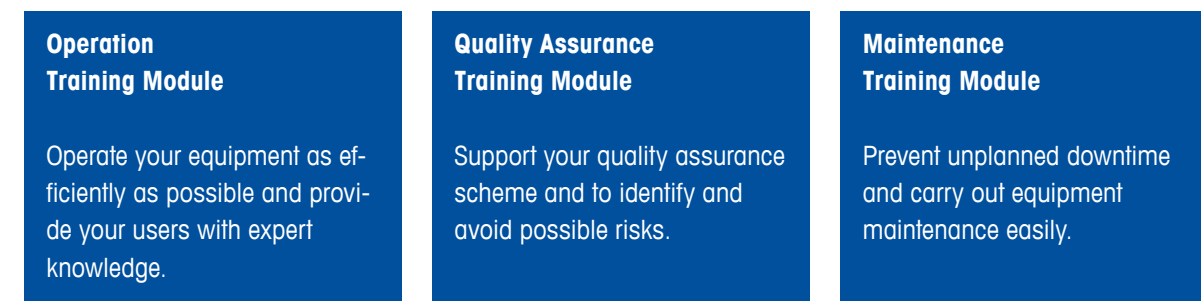

► [www.mt.com/service](http://www.mt.com/service)

## Training Tailored to Your Needs

Our experts have developed a range of different training modules for specific equipment types and audiences to help participants gain a comprehensive understanding of their instrument and keep their processes running at maximum performance.

### Training Module Contents:

- General introduction and technical basics
- Functional hands-on training in operational area
- Practical tests on respective systems and processes

# Good Measuring Practices Five Steps to Quality Improvement

The five steps of all Good Measuring Practices programs start with an evaluation of the measurement needs of your processes and their associated risks. We also take into account regulatory requirements and norms relevant to your industry. With this information, the program provides straight forward recommendations for selecting, installing, calibrating and operating measurement equipment and devices.

► [www.mt.com/service](http://www.mt.com/service)

The five steps of Good Measuring Practices cover the entire lifecycle of your equipment and deliver practical guidance for implementing optimal quality assurance measures. This may significantly reduce the total cost of ownership of your equipment while safeguarding process quality.

## 1 Evaluation

Analyze your process flows and their associated criteria to consistently ensure the highest quality-application and data.

## 2 Selection

Choose the ideal combination of instrument and measuring technology to best match your process needs.

## 3 Installation & Training

Have confidence in your new device and master it with full professional skills from day one.

## 4 Calibration & Qualification

Trust the manufacturer-trained METTLER TOLEDO service technicians when it comes to calibrating and qualifying your instruments.

## 5 Routine Operation

Benefit from tangible recommendations for optimal performance verification, calibration and maintenance.

## Your Benefits at a Glance:

- Safe audits
- Optimized cost
- Guaranteed quality
- Minimized process risk
- Compliance with regulations
- Contribution to sustainability

# Uptime – Repair and Support Rely on the Manufacturer's Competence

Your instruments are often subject to tough environments and high utilization in critical processes. Equipment uptime is crucial to productivity. When equipment fails, immediate action is required – either onsite or at our repair center.

► [www.mt.com/service](http://www.mt.com/service)

METTLER TOLEDO Service provides fast intervention to minimize downtime using proprietary tools and safe and standardized work procedures. Our repair services help you restore your equipment and gain the uptime that is critical for your productivity.

- **Onsite repair** – Fast response times from a factory-trained and certified field force using proprietary tools and original spare parts.
- **Service center repair** – Fast turnaround times for cost-effective diagnostics and repair returning equipment to factory-specifications.

## InTouch™ Remote Services

Remote services empower you to manage equipment performance more efficiently and economically. You gain:

- Quicker response to technical issues
- Increased equipment availability
- Remote diagnosis & repairs
- Product alert & alarm monitoring
- Predictive/proactive maintenance
- Equipment utilization reports

## Spare Parts & Kits

Our original spare parts and kits fulfill your highest expectations for quality. You can rely on our extensive inventory to meet your needs. You gain:

- Parts factory-tested to our specifications
- The most reliable parts available
- Continuous trouble-free operation
- Ensured ongoing compliance

## Manufacturer's Competence

Certified METTLER TOLEDO service technicians perform fast, reliable repair services using advanced skills, tools and original spare parts. This ensures:

- Diagnostics isolate the root error cause
- Problems fixed correctly the first time correctly the first time
- Productivity is restored

Maximize the uptime of your equipment. METTLER TOLEDO offers you:

- ✓ The largest service force in the industry
- ✓ Fast response times
- ✓ Factory trained and certified engineers
- ✓ Proprietary tools and spare parts
- ✓ Testing to factory specifications

“Fast reaction times, reliable service and highly competent technicians helped us reduce our costs significantly.”

# Test Weights for Unrivalled Expertise To Meet Tough Requirements

METTLER TOLEDO is the world's leading precision instrument manufacturer. We supply innovative weight products and balance testing methods that move beyond current technology boundaries. Thanks to an established global network of accredited calibration laboratories, we also offer short turnaround for related calibration services. Our extensive portfolio covers weights from 0.05 mg to 5 tons in all accuracy classes and includes a variety of shapes for nearly any testing application.

► [www.mt.com/weights](http://www.mt.com/weights)

## Innovation and Competence in Balance/Scale Testing to Ensure Compliance

### Cost Savings from the Start

METTLER TOLEDO CarePacs® let you securely test balances of up to 8 kg capacity using just two weights – 5% and 100% of the capacity of each balance – for a significant reduction in test-weight inventory and associated maintenance and calibration costs.

### Secure Traceability in Balance Testing

WeightLink™, a unique weight identification system, works with balance firmware to cross-check a test weight against its calibration certificate, making it impossible to use the wrong weight for air-tight accuracy and traceability.

### Regulatory Compliance Guaranteed

Topnotch technology and comprehensive expertise position our ISO/IEC 17025-accredited calibration laboratories including our heavy-capacity lab in Béthune FR among the best in Europe.

## Grip-Handle and Heavy Capacity Weights For Safe and Efficient Scale Testing

As with laboratory balances, industrial scales and weighing platforms are also subject to regulations that ensure measurements are reliable and meet legal requirements. Regular testing with adequate test weights is essential. METTLER TOLEDO's grip-handle and heavy capacity weights are suitable for any application in all types of industrial environments. Choose the weight that best suits your needs out of our wide range of stainless steel and coated cast iron weights from a nominal value of 1 kg up to 5,000 kg. To gain traceability, documented weight calibration results are delivered in calibration certificates with details of conventional mass correction, uncertainty and traceability according to ISO/IEC 17025.

# Grip-Handle Test Weights

## For Safe and Convenient Scale Testing

While traditional knob weights do not allow safe stacking, cylindrical and rectangular weights assure better safety – an important aspect when testing higher-capacity balances. Grip-handle weights are available for multiple applications and environments. Choose between polished, glass bead blasted or painted weights for applications in wet, dusty, harsh or clean-room areas.

► [www.mt.com/industrial-weights](http://www.mt.com/industrial-weights)

### Select the Right Weights

Do you know which test weights match your measuring, compliance and quality requirements? If not, request a free GWP Recommendation and Sample Verification which will give you the right weight class, calibration and routine testing frequencies with test SOPs that allow you to pass any audit.

# Cast Iron Weights from 50 kg to 5 t

## Top Performance through Genius Design

From many years of experience, METTLER TOLEDO knows that handling heavy capacity weights to test scales always poses certain risks. To minimize manual handling, METTLER TOLEDO has designed weights that enable safe lifting, including four-side and top access by fork lifts, cranes and hoists. This helps with safe operation and limits unnecessary costs. Your personal safety is our priority.

► [www.mt.com/industrial-weights](http://www.mt.com/industrial-weights)

Swiss-engineered evaporative-pattern casting technology leads to smoother surfaces than ever before. A two-component coating rejects dust and dirt and protects the weight from corrosion and scratches.

### Safe Stacking

Our innovative design approach allows combining and stacking weights of different sizes. For crane lifting, straps are looped through handles-making it a "fail-safe" system.

### Safe Moving and Handling

Weight dimensions fit all common pallet jacks and fork lifts and allow access from all sides. Heavy-duty, stainless steel handles facilitate the lifting of single weights or stacks by hoists and cranes.

### A Cost-Cutting Approach

Weights are designed to fit on standard pick-up trucks or trailers. Lower maintenance and gas costs compared to a full-size commercial truck result in economic benefits.

# Heavy-Duty Stainless Steel Weights

## Meet Strict Industry Requirements

If greater measurement accuracy or environmental compatibility are requested, as is often the case in regulated industries or testing labs, stainless steel weights are preferred. METTLER TOLEDO's heavy-capacity stainless steel weights satisfy the maximum permissible error standards for OIML classes F1 and F2 and are available in rectangular or cylindrical shapes from 100 kg up to 2,000 kg.

► [www.mt.com/industrial-weights](http://www.mt.com/industrial-weights)

Rectangular, heavy-capacity weights are provided with a specially designed tool for safe and precise handling. The tool is removable for space-saving storage.

### Top Quality

METTLER TOLEDO puts the highest demands on the quality of its products. Each step in production is strictly controlled, from the original steel billet to the finished weight.

### Impeccable Finish

A mirror-polished surface makes the weights easy to clean and provides the best possible corrosion resistance. This ensures near-perfect stability over the weight's life span.

### Laser Markings

The high-specification polished stainless steel surface is marked in accordance with OIML guidelines using the latest laser technology. Customer-defined marking is also available.
