

VICPAS Innovating Energy Technology

Programmable Operator Interface MONITOUCH

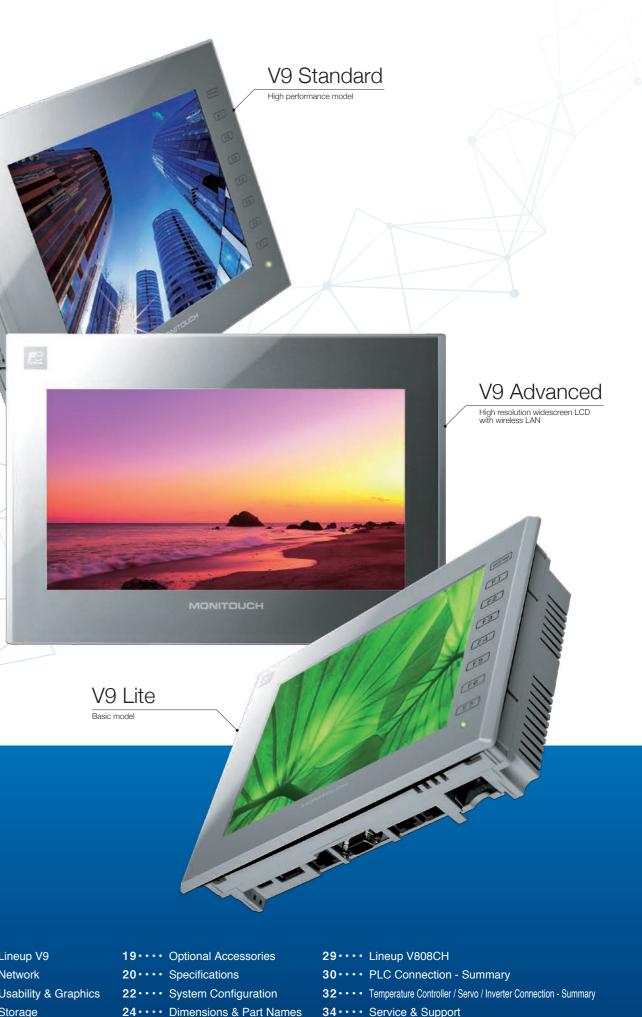

Satisfying, intuitive control Impressive ability to convey data. **Boosts efficiency in the field** through enhanced performance.

On its release in 1988 as the first ever programmable display*, MONITOUCH ushered in a new era of human-machine interface technology. It is now used as an information terminal for countless different purposes in production sites all over the world. The total number of shipments has reached around one million.

We have continuously pioneered the field of programmable displays through an impressive array of exciting new cutting-edge features specifically designed to meet the needs of our clients. MONITOUCH THE PREMIUM.

We are confident that this lineup will meet your requirements for all types of application. *According to our own research

Tablet PC

Google Pla

VNC Server

Remote Connection from Tablet PCs

All of the V9 family has remote monitoring/maintenance capabilities via Ethernet, thanks to its VNC feature.

*1 Wireless LAN compatible products only

VNC App: Simple Remote

By installing Simple Remote on your Android device, you can get connected remotely right away. The app is available for free on Google Play.*2

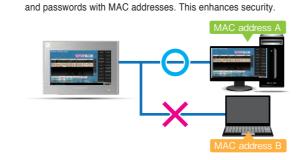

*2 Android, Google Play and the Google Play logo are trademarks of Google LLC.

DHCP Server*3 / DHCP Client

Easy Communication with DHCP

The information required for network connectivity can be acquired from a server as a DHCP client or can assign to a client as a DHCP server.

For PC client connection authentications, it is possible to prevent

connections from unspecified devices by supplementing usernames

Selecting Priority for VNC Connections When using a single MONITOUCH unit to remotely monitor and

connection, the client will not change suddenly.

Authentication by MAC Address for

VNC Connections

control more than one client device, you can choose the priority

First connection

Later connection

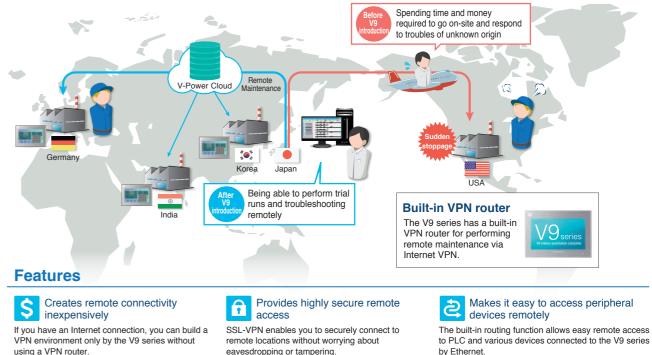

as either priority-first or priority-last. If you have a priority-first

Web Machine Interface

VPN Remote Access / Cloud Data Utilization Solution

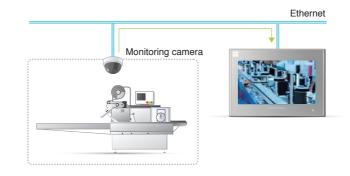

The Web Machine Interface is a solution service that makes remote monitoring safe, easy, and inexpensive, It consists of two services: "VPN Remote Access Service" which enables secure remote monitoring by VPN and "Cloud Data Utilization Service" which can receive various types of data via a cloud server. By performing remote maintenance, it is possible to check for signs of abnormality in advance and ensure proper maintenance of the machine. It also helps to reduce the number of sudden stoppages and implements preventive maintenance.

Network Camera Compatible

Real-time Monitoring of Remote Site

By connecting to a network camera, it is possible to display camera images in real time on the V9 series screen. It is especially useful for monitoring and checking the inside of clean rooms.

Remote Desktop

Control the PC Screen from the V9 series

By connecting to Ethernet, you can display the screen of the PC directly on the V9 series. You can view work instructions and manuals located on PCs even at manufacturing sites that do not allow you to carry in PCs. It improves the efficiency of maintenance.

*3 The DHCP server is only available for wireless LAN-compatible products

to PLC and various devices connected to the V9 series by Ethernet

FTP Compatible

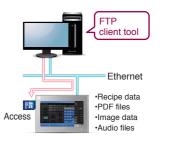

Easily Retrieve Files in Storage from Remote Locations

FTP Server Function

Files in a storage media inserted in a V9 can be read out and written using a PC.

FTP Client Function

Files on an FTP server can be read and written using the V9 series

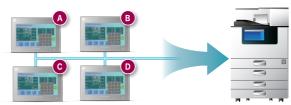

Network Printer Compatible^{*4}

Share Printers with Multiple V9 series

Printing jobs from multiple V9 series can be shared via a single network printer. Network printer connection supports both wired and wireless LAN, and that helps to achieve space and cable savings.

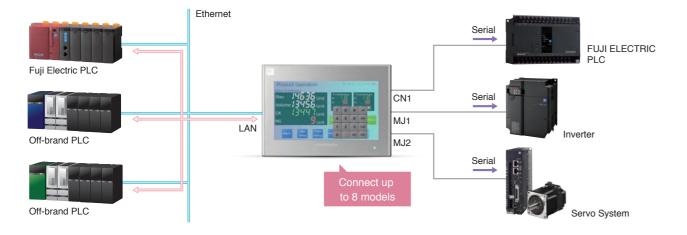

*4 Compatible only with EPSON ESC/P-R. Wireless LAN connection is possible for wireless LAN compatible products.

8-Way Communication

Connection and Data Transmission with Multiple Devices

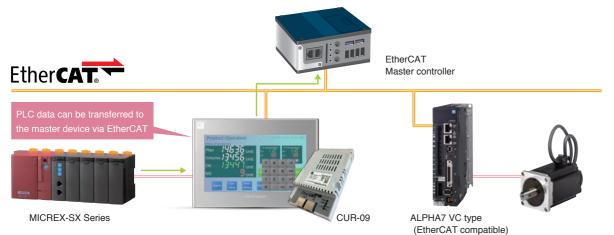

You can connect up to eight different models, off-brand PLC and other peripheral devices at the same time via both Ethernet and serial connection.

Supports EtherCAT^{*1} Connection

EtherCAT (Slave) Connection

The "CUR-09" communication unit for EtherCAT connection allows for general connection to EtherCAT compatible models. It can also serve as a gateway between devices connected to the V9 series and the EtherCAT master equipment.

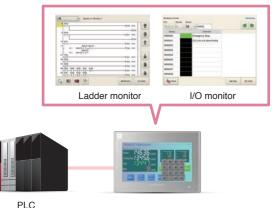

*1 EtherCAT® is a patented technology and registered trademark licensed by Beckhoff Automation GmbH (Germany).

Ladder Monitoring Function

Enable PLC Monitoring

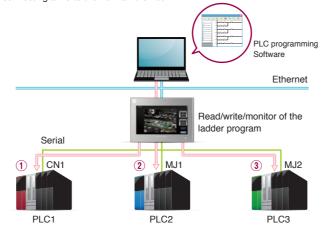

PLC ladder monitoring is available on the V9 series screen. It is possible to search for the target address freely or to switch programs during RUN mode in case there are multiple programs

Path-through Programming

Ladder Program Transmission (3-way)

Up to 3 PLCs are accessible to monitor and revise PLC programs by connecting a PC to the V9 via Ethernet.

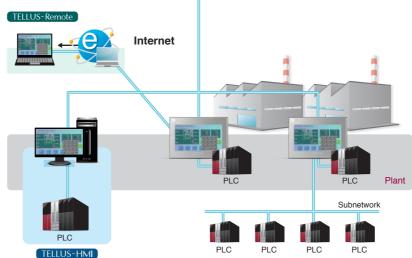

TELLUS and V-Server

Remote Monitoring and Operation Solutions

This application software connects remotely located V9 series to office computers in order to provide on-site information and to monitor and control equipments.

You can allocate jobs based on the operation conditions of the line, respond quickly to trouble, and achieve more efficient and cost-effective production.

MES^{*2} Interface Features

Operation Monitoring and Production Management Solutions

Various types of information such as aggregation of production results, number of defects and stoppage factors are sent to the database using SQL statements from the V9 series through the V-Server. Communication with the database can be accomplished without a gateway PC or cumbersome programming.

Programming not required

By simply specifying the data to be stored in the database on V-SFT, you can communicate with the database without the need for programming.

Prevents data loss

If transmission fails, it will produce an error log, so you do not have to worry about losing important data.

Reduces system load

When various conditions are fulfilled, data can be transmitted from the V9 series. It reduces the load on the system by eliminating the need for constant monitoring on the higher-level side.

*2 MES: Manufacturing Execution System

This "Manufacturing Execution System" has been designed to optimize quality, production volume, delivery time, and cost as a management and production control system for manufacturing sites.

V-Server

Real-time collection of on-site information

- ·Data can be collected in real time by capturing site status and production information.
- ·It can be linked with databases such as SQL Server. Or save data in CSV or Excel format.
- ·It supports operations suited to the site via various operation directives based on event monitoring.

TELLUS-Remote

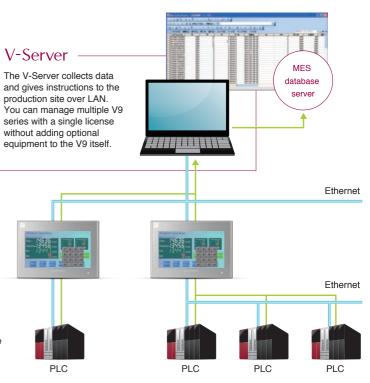

Easy, low-cost monitoring and operation from remote locations

- ·You can use the same screen data as the on-site V9 series, eliminating the need to create a new remote monitoring screen.
- •Multiple startups allow you to monitor and operate more than one V9 series via a single PC.

TELLUS-HMI

Use V9 series features directly on your PC

- ·Display and operation can be performed on your PC instead of on the V9 series.
- •It enables you to easily connect to peripheral devices such as printers. There is no need to worry about selecting peripheral devices.

Usability & Graphics

Render overwhelming beauty and outstanding visibility to the finest detail

Smooth Operation with Your Fingers

Zooming In and Out with Two Fingers

The displayed image can be magnified up to 200% by pinching out the screen¹. It can be reduced to its original size by pinching it in.

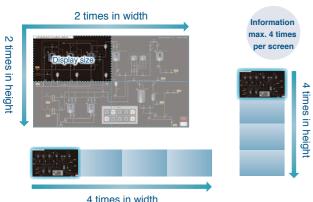

Pinch in

*1 Images can be scaled up and down by double tapping when using V9 Standard/Lite.

Abundant Quantity of Information

Displaying Four Times the Screen Size First in industry

The whole area of a large image can be confirmed easily by scrolling the screen without the need of switching it. The navigation window helps you to recognize the current displayed position instantly.

Widescreen LCD

Scrolling Magnified Images

)

V9 Advanced models are equipped with a high-precision, high-resolution widescreen (16:9). Greater volume and variety of information can be displayed on the screen.

You can view a particular

part of a magnified image

in close-up while scrolling

around the screen.

Expression and Beauty

7-segment Fonts for Realistic Expression

7-segment fonts allow for realistic, highly visible expression of measuring instruments. Non-illuminated segments can be shown in a subtle color.

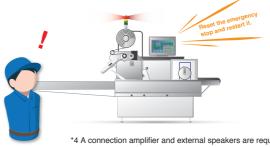

TrueType Font as Standard

TrueType font has been added to the standard fonts. Smoother display is possible via antialiasing. Furthermore, space can be reduced relative to Windows fonts, thus enabling you to work without worrying about screen data memory.

Audio Playback Function^{*}

It comes standard with an output port for audio playback that allows you to play audio files saved to storage without any optional units.

*4 A connection amplifier and external speakers are required. *5 V9101iW/V9 Standard only

Extended Datasheets

It also supports PDF output in addition to standard printer output. By converting various forms such as daily reports to PDF, the printer is no longer needed. It helps to achieve paper and space savings. PDF files saved on storage can be transferred to PC in office using FTP server/client functions, which allows you to check data without having to go to the production site.

Images can be laid out four times the screen size in height or width according to your needs. *2 According to our own research.

Compatible with Vertical Placement

The screen can also be displayed and edited while the panel is placed vertically (by left or right turning).

V9101iW

V9100iS

Video/RGB Input-Output

By attaching an optional unit, videos and RGB images can be displayed on the V9. Also, images displayed on the V9 can be sent to external displays.

*3 For displaying pictures, 3D parts, video, and RGB input (excluding high-speed mode) only. Other parts are displayed in 65,536 colors.

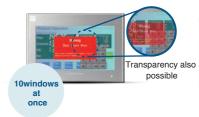

Dimmer Function

Fine-grained adjustment is possible via 128-step setting. Even at night or in dark places, the screen is easy to see and not too dazzling, thus enabling smooth operation.

Overlap Function

Up to 10 pop-up windows can be displayed on the screen at the same time. All of them can be displayed transparently without limiting the overlap size of each window. You can also use overlap screens as subscreens or check them by scrolling without switching to the main screen.

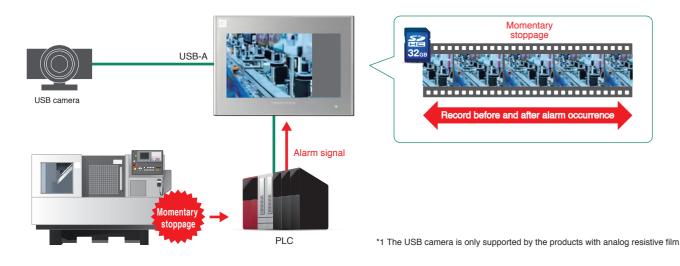

Easily check different screens by scrolling

Compatible with Event Record Functions

Instantaneous Video Recording and Playback

By using a commercially available USB camera⁻¹, you can record video before and after alarm occurrences, such as those due to momentary stoppages, and save it in an SD card to support cause investigation and improve the operating efficiency of equipment.

Equipped with Video Player

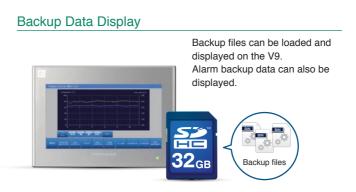

Play Video Data Saved to Storage

By playing videos used for troubleshooting at time of abnormalities, operators can easily learn how to react to the issues quickly. In addition to viewer initiated playback from the system menu, video can also be played via switch and PLC controller commande. It supports MP4 (MPEC 4)

played via switch and PLC controller commands. It supports MP4 (MPEG-4) video files to ensure high compression and high quality.

Trend Data Display

Easy Creation of Backup Files

By using the scheduler, backup files are automatically created at scheduled timings.

Alarm Display

Scrolling of the Alarm Messages

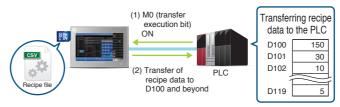

The entire alarm message can be displayed by scrolling the screen with touch and drag.

Scrolling the alarm messages

Recipe

Global Control Function

It is possible to read and write to specified files and record data, regardless of the screen displayed, by turning on or off a bit.

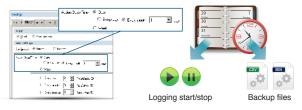

Filter Settings

The required data can be easily extracted using the recipe selection list dialog to narrow down file and record searches.

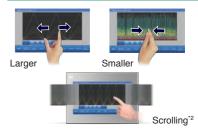

Coordination with the Scheduler

Operations such as bit output and execution of macro programs can be scheduled on a specific date and time. Also, start and stop of logging, and data saving can be conducted by setting the logging conditions.

Zoom In and Out of Graphs

You can zoom in and out on the vertical and horizontal axes of trend graphs. You can also scroll² by touching and dragging zoomed-in graphs.

*2 Supports only horizontal scrolling.

Running Emergency Messages

Alarm messages run automatically at a specified position when alarms are occured.

Convenient tools for scrolling

PDF Viewer Function

PDF Viewer Function

PDF files stored on an SD card can be displayed. PDF instruction manuals can be used for troubleshooting.

Fast navigation to the desired page, using bookmarks.

Security

Various setting functions for improving usability

Operation Log

Improved Operation Log Viewer

Search Function

Operation log can be searched for by specifying an operator or date and time.

Filter and sort can be set for displayed items.

Filter/Sort Settings

-106

Display Item Settings

It is possible to select items to display in the operation log.

Security Features

Security Level Setting

A security level between 0 and 15 can be set for each screen. You can create a high-level security environment by restricting features based on security level.

Switch Interlock

A security level can also be set for a switch. Only users who log in at the authorized level will be able to operate the switch.

Local Screen Settings

Transmission Setting

Transmission settings with connected devices can be modified on the V9.

Communication Setting

Buzzer Setting

Buzzers settings can be modified on the V9.

Buzzer Setting

E-mail Setting

E-mail addresses and SMTP IP addresses can be modified.

E-mail Setting

Backlight Setting

Backlight settings can be modified on the V9.

Backlight Setting

Network Query

Ethernet network status and IP redundancy within the network can be verified.

Network Test

RGB Adjustment

It displays the frequency of the connected device as a real value. Frequencies that cannot be displayed on the screen are displayed in red, so you can check the availability of a connection at a glance.

Configuration of Easy-to-view Screens

Wider Range of Parts

The number of real world icons has been increased, and the icons with simple design have been added. Pick from the wide range of ready-made icons for sophisticated representation.

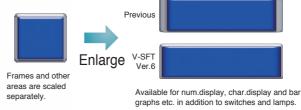

3D parts can be scaled up and down without changing the widths of

frames. Frame size can be modified by batch, or individually according to

the item type.

Improved 3D Parts Scaling Function

* For the V9 series square picture icons and 3D parts with frames (excluding some icons and parts)

Copy/Paste of Microsoft Office Data

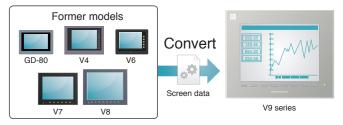

Graphics created in Microsoft Office Word, Excel and PowerPoint can be copied and pasted into V-SFT files by converting them to pictures, patterns or parts.

*Administrator privileges are required for installation

Compatible with Program from Legacy Products

Screen data from previous models created in an older version of V-SFT can be converted as is to data for the current model. This allows anyone to leverage their screen data assets from previous models.

Simple Icons

A wide range of modern icon designs reminiscent of smartphones have been added

Line Width Setting

Real World Icons

V-SFT adds more real world icons.

The line widths of graphic items and trend items (graph lines, reference lines) can now be set in eight steps. Effective screens can be created using a variety of drawing tools and graph representations.

* Excluding thick lines

Pasting of an Image File

It is possible to paste a PNG file directly onto the screen. JPG, BMP and GIF formats are also supported as image files, allowing you to create whatever visually impressive screen you choose.

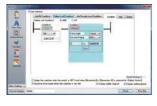

Upgraded Operability

Integration of Search Menu

The search menu, which used to be displayed separately, has now been integrated for easy operation.

Enhanced Interlock Setting

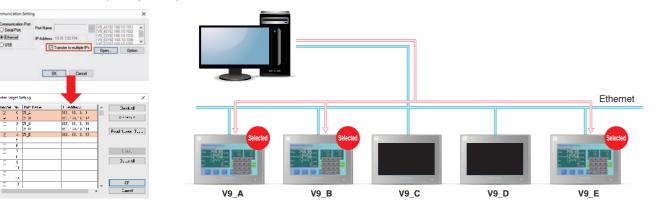

Interlock can be set with a ladder drawing screen. The condition settings are easy to understand and convenient even when setting multiple conditions. It is possible to set interlocking for keypad indication conditions in addition to s witch conditions. Up to five conditions (AND or OR) for a bit device, word device or security level can be set, which is suitable for setting complicated conditions.

Data Batch Transfer Function

Screen Data Batch Transfer (Ethernet)

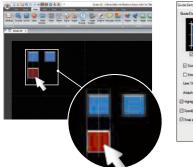

Screen data can be transferred sequentially to multiple V9 series selected from the network.

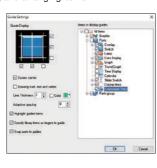

V-SFT Ver.6 New Functionality

Guideline Function

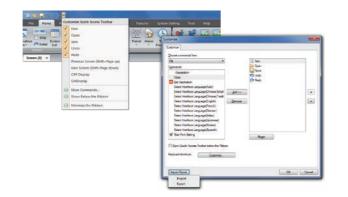

After arranging the items, this function displays guidelines by detecting surrounding items as you move and scale them. It enables user customization, such as whether to show or hide guidelines on an item-by-item basis, in order to increase your efficiency when aligning and arranging items.

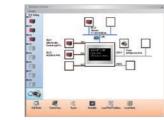

Quick Access Toolbar

Quick Access toolbar is displayed at the top of the toolbar. The display icons can be freely customized by the user, as well as exported and imported. Therefore, they can be edited in the same environment even when switching or replacing computers.

Intuitively Grasp the Connection Device Configuration

The improved hardware setting screen makes it easy to grasp exactly how devices are connected together in the system

Character String Table

Text for switches, lamps and other parts can be managed centrally using the character string table. Frequently used text can be registered in the table for easy reference and batch modification. When a change occurs, you can make bulk changes simply by changing the string table.

* Switches, lamps, text and multi text only.

Optional Accessories

Expansion Units

GUR-00 (Video input 4ch) Displays images from video cameras on V9 directly.

GUR-01 (RGB input 1ch) Displays RGB input on V9.

GUR-02 (RGB output 1ch) Displays images of V9 on a monitor.

GUR-04 (Video input 1ch) Displays images from video cameras on V9 directly.

GUR-10 (Video input 2ch + RGB input 1ch) Displays images from video camera and RGB input on V9 simultaneously.

GUR-11 (RGB input 2ch) Displays RGB images such as PC images through two channels on V9 simultaneously.

Communication Units

CUR-00 OPCN-1	CUR-06 SX Bus
CUR-01 T-Link	CUR-07 DeviceNet
CUR-02 CC-Link	CUR-08 FL-net
CUR-03 Ethernet	CUR-09 EtherCAT

CUR-04 PROFIBUS-DP

Other Accessories

V-I/O (Serial expansion I/O unit) This is an expansion I/O unit that connects to the MONITOUCH modular jack. Maximum 16 points can be used for both input and output.

V9-BT A replacement lithium battery for V9 series. * Excluding the V907xiW and V9060iTD.

V9xxx-GS/V9xxx-GSN10 Protection sheets for panels. N10 is a non-glare type sheet. (5 sheets per set). See P.27 for details.

Panel adapter (PAD-Vxxx) Used when fitting V9 into V4/GD-80/GD-65/GD-64 panel cutout Contact our technical helpdesk for details.

V9080C-PW

This is an AC to DC power converter for the V9080iCD. It can be used to replace existing GD-80E and V609E30M AC power supply models with the V9080iCD without having to change to a DC power supply.

*1 PLC connection cables other than those listed above are also available. For details, please contact our technical helpdesk *2 It may not be available depending on the hardware version of your CPU. A separately available D9-FU-SPHCPU- M cable is required. Please contact us for more details. *3 Optional unit DUR-00 is required.

*1 Only V808(i)CH4 comes with a-contact and 2 circuits. V808(i)CH2,3 only have 1 circuit. *2 187500 bps only applies to Siemens MPI/PPI connections.

FO MO

TS2060

2.5M 128K *1 "DUR-00" or "CUR-xx" is mountable.

Specifications								
		TS2060	TS2060i					
Screen Memory (FROM)		2.5Mbyte	10.5Mbyte					
Backup Memory (SRAM)		128Kbyte	512Kbyte					
Stroke Font		- Compatible						
Display	Display Device	TFT color						
	Resolution W:H (dots)	320 :	× 240					
	Display Size	5.7 inch	(QVGA)					
	Display Colors	65,536 colors(The software is compatible with displays	in 32K colors, 256 colors, 128 colors and monochrome.)					
	Backlight	LED						
	Backlight Life	50,000 hours						
Touch Switch	Туре	Analog res	sistance film					
Function Switch	Quantity	6						
External Interface	D-Sub 9-pin ^{*2}	RS-232C/RS-422/RS-485, asynchronov Data length: 7, 8 bits, Parity : odd, ever Stop bit: 1, 2 bits, Baud rate: 4800, 960 19200, 38400, 57600, 76800, 115200 b						
	Modular 8-pin(MJ1/2)		synchronous type, Data length: 7,8 bits, Parity: even, odd, none 0, 38400, 57600, 76800, 115200, 187500' ⁴ bps					
	SD Card	-	One card slot provided as standard (SD/SDHC card)					
	Ethernet	-	1ch, Baud rate: 100Mbps, 10Mbps					
	USB	Type mini-B(Ver. 2.0)	Type A, Type mini-B (Ver. 2.0)					
	Communication Units	-	CUR-xx compatible					
Power Supply	Permissible Range of Voltage	24V D0	C ± 10%					
	Power Consumption (max. rating)	13W (or less					
Physical Environment	Ambient Temperature	0°C to	+50°C'5					
	Ambient Storage Temperature	-10°C to	0 +60°C⁺⁵					
	Ambient Humidity	85% RH or less (witho	out dew condensation)*5					
	Ambient Storage Humidity	85% RH or less (witho	out dew condensation)*5					
	Operating Altitude	2,000m	n or less					
	Operating Atmosphere	Not exposed to corrosive gas or exc	cessive dust (free of conductive dust)					
	Contamination Level	Contamina	ation level2					
Installation Conditions	Grounding	Grounding resistance: Less t	han 100Ω, FG/SG separation					
	Protective Structure	Front panel : Compatible with IP65 (when gas	ket is used), Rear cover : Compatible with IP20					
	Cooling System		air cooling					
	Dimensions W×H×D		.8 × 45.8mm					
	Panel Cutout		nt to V806/V606e/S806/V706/V606)					
Standard		CE (EN61000-6-2, EN61000-6-4, EN50581), KC, UL61010-1, UL61010-2-201 (E313548)						
Case Color		Black						
Battery		Built-in button battery / Battery life :	5 years (ambient temperature 25°C)					

*2 Only when mounting the optional unit (DUR-00) to the TS2060i. *3 Only MJ2 is compatible with 4-wire system. *4 187500 bps only applies to Siemens MPI/PPI connections. MPI/PPI supports only MJ2. *5 Use at a wet-bulb temperature of 39°C or less because higher temperatures may cause failure.

¹¹ For V9 and TS2060i, a communication unit *CUR-xx* is required. For V8, a communication unit *CU (N)-xx* is required. *2 A communication unit *CU (N)-03-x* is required. It does not support TCP/IP connection. *3 For V907xW, V906 and TS2060i, an optional unit *DUR-00* is required. *4 For V806, an optional unit *DU (N)-10* is required. *5 An optional unit *DUR-00* is required when connecting V907xW, V906, or TS2060i using RS-232C. *6 RS-232C connection is not supported. *7 An optional unit *DU (N)-10* is required when connecting V806 using RS-232C.

Operations

To the purchasers:

The warranty of this product is as follows, unless there are special instructions that state otherwise in the quote, contract, catalog, or specifications at the time of the quote or order.

distributor from which you purchased the product, or Fuji Electric / Hakko Electronics for further information. management and maintenance of the product prior to accepting it.

1 Period and Coverage of the Warranty

1-1 Period

1-2 Coverage

- the warranty does not apply to the following cases:
- instruction book or users' manual.
- 2) The malfunction is caused by factors that do not originate in the purchased or delivered product.
- 3) The malfunction is caused by another device or software design that does not originate in a Fuji Electric / Hakko Electronics product. 4) The malfunction occurs due to an alteration or repair that was not performed by Fuji Electric / Hakko Electronics. 5) The malfunction occurs because the expendable parts listed in the instruction book or catalog were not maintained or
- replaced in an appropriate manner.
- the time of purchase or delivery.
- 7) The malfunction occurs because the product is used for a purpose other than that for which it is intended. 8) The malfunction occurs due to a disaster or natural disaster that Fuji Electric / Hakko Electronics are not responsible for.
- (2) The warranty is only applicable to the single purchased and delivered product.
- (3) The warranty is only valid for the conditions stated in (1) above. Any damage induced by the malfunction of the purchased or delivered product, including damage or loss to a device or machine and passive damage, is not covered by the warranty.

1-3 Malfunction Diagnosis

The initial diagnosis of malfunction is to be made by the purchaser. The diagnosis can be conducted by Fuji Electric / Hakko Electronics or our delegated service provider with due charge upon the request of the purchaser. The charge is to be paid by the purchaser at the rate stipulated in the rate schedule of Fuji Electric / Hakko Electronics.

2 Liability for Opportunity Loss

Regardless of the time of occurrence, Fuji Electric / Hakko Electronics are not liable for damage caused by factors that Fuji Electric / Hakko Electronics are not responsible for, opportunity loss on the part of the purchaser caused by the malfunction of a Fuji Electric / Hakko Electronics product, passive damage, damage due to a special situation regardless of whether it was foreseeable or not, or secondary damage, accident compensation, damage to products that were not manufactured by Fuji Electric / Hakko Electronics, or compensation towards other operations.

3 Period for Repair and Provision of Spare Parts after Production is Discontinued (Maintenance Period)

Discontinued models (products) can be repaired for seven (7) years from the date of discontinuation. Also, most spare parts used for repair are provided for seven (7) years from the date of discontinuation. However, some electric parts may not be available due to their short life cycle. In this case, it may be difficult to repair or provide the parts during the seven-year period. Please contact Fuji Electric / Hakko Electronics or our service providers for further information.

4 Deliverv

Standard products that do not entail application setting or adjustment are regarded as received by the purchaser upon delivery. Fuji Electric / Hakko Electronics are not responsible for local adjustments and test runs.

5 Service

The price of the delivered or purchased products does not include the service fee for the technician. Please contact Fuji Electric / Hakko Electronics or our service providers for further information.

6 Scope of Application

The above contents shall be assumed to apply to transactions and product use in the country where a Fuji Electric / Hakko Electronics product is purchased. Please consult your local supplier or Fuji Electric / Hakko Electronics for details.

- The purpose or area of use may be limited, and a routine checkup may be required depending on the product. Please contact the
- Please conduct inspection of the product promptly upon purchase or delivery. Also, please give sufficient consideration to

(1) The period of the warranty is effective until twenty-four (24) months from the date of manufacture printed on the plate. (2) The above period may not be applicable if the particular environment, conditions or frequency of use affects the lifetime of the product. (3) The warranty for the parts repaired by our service department is effective for six (6) months from the date of repair.

(1) If malfunction occurs during the period of warranty due to negligence on the part of Fuji Electric / Hakko Electronics, the malfunctioning parts are exchanged or repaired free of charge at the point of purchase or delivery. However,

1) The malfunction occurs due to inappropriate conditions, environment, handling or usage that is not specified in the catalog,

6) The malfunction occurs due to factors that were not foreseeable by the practical application of science and technology at

▲ Safety Considerations

- For safe operation, read the instruction manual or user manual that comes with the product carefully or consult the distributor from which you purchased the product, before using the product.
- Products introduced in this catalog have not been designed or manufactured for such applications in a system or equipment that will affect human bodies or lives.
- Customers, who want to use the products introduced in this catalog for special systems or devices such as for atomic-energy control, aerospace use, medical use, passenger vehicle, and traffic control, are requested to consult the Hakko Overseas Sales Section.
- Customers are requested to prepare safety measures when they apply the products introduced in this catalog to such systems or facilities that will affect human lives or cause severe damage to property if the products become faulty.
- For safe operation, wiring should be conducted only by qualified engineers who have sufficient technical knowledge about electrical work or wiring.

Notes to consider before purchasing

- Appearance and specifications are subject to modification without prior notice due to technical improvements.
- Colors in the catalog may differ from the actual colors due to printing inaccuracies.
- Consult your distributor or us for further information about products in this catalog.
