

P1H Upgrade Instructions

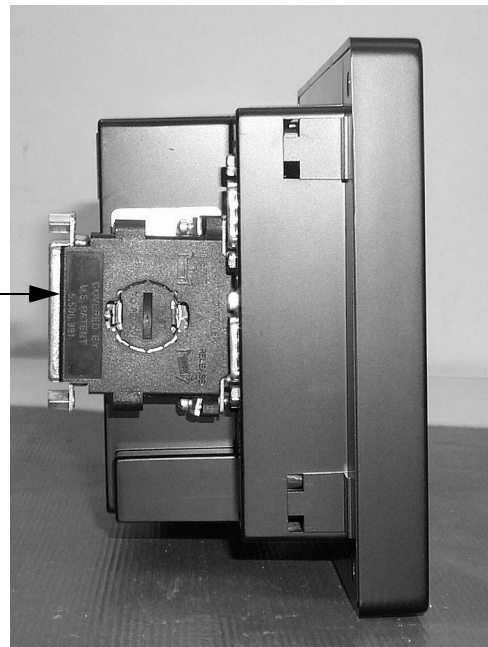

Installing the Core Module Enable Key

The PowerStation Model P1H comes with Interact Application Manager (APM), Panel Toolkit Module (PTM), and Networking installed. The Interact Core Module Enable Key (P11-5160) allows you to use Interact's Alarm Management (AMM) and Graphics Monitoring (GMM) modules in the P1H.

To install the Core Module Enable Key:

- Insert the key into the parallel port of the P1H, as shown in the following illustration.

Insert the key
into the P1H
parallel port

You now should be able to use Interact AMM and GMM in the P1H.
