PowerStation Model P1H

Introducing the PowerStation P1H

Thank you for purchasing the PowerStation Model P1H. The P1H is a runtime-only workstation that comes with the following software installed:

- MS-DOS version 6.22
- MachineShop Shell
- Interact Application Manager (APM)
- Interact Panel Toolkit Module (PTM)
- Interact Networking

Adding Interact Modules

The P1H has only Interact APM and PTM modules installed. If you wish to add Interact Alarm Management (AMM) and Graphics Monitoring (GMM) modules to the P1H, you can do so by ordering the following from CTC Parker Automation:

- Core Module Enable Key P11-5160

Please contact CTC's Sales department at 513-831-2340 or sales@ctcusa.com.
