

X20 Applications

Seeder Control

Variable Rate, Multiple Product Control

Simultaneously controls up to 5 bins or tanks including granular, liquid, and NH_3 .

- Integrated controller, guidance and steering assist console
- Single console reduces cabin clutter
- Variable Rate Control option on all bins and tanks
- Optional Blocked Head Monitor

X20 Seed Rate Controller - Variable Rate, Multiple Product Control

The X20 Seed Controller handles up to five different products including granular, liquid and NH3. This gives the X20 powerful multi-tasking ability to seed, provide steering assist with full guidance, variable rate control for all bins, as well as Autosection Control (ASC) with optional AgCam and Weather Station - all simultaneously from a single console.

Variable Rate Control

X20 Seed Controller provides optional Variable Rate Control (VRC) with Mapping. With this combination, the X20 can simultaneously apply from prescription maps, control and record all products, plus generate real-time application and log maps.

Mapping

Users can create exclusion zones, set application rates, and even lock-in these settings before the operator leaves the yard. Logs and application maps can be saved, printed or e-mailed using standard Windows® programs (additional hardware or software may be required). With the X20 you can also generate your own prescription maps matched to the field history and physical features of the land.

Versatile

The X20 Seed Controller provides control of electric motors, proportional and MFC hydraulic valves, hydraulic motors, and actuators.

Key Feature Summary

Controls up to 5 bins, including granular, liquid and NH3

Import prescription maps for precision farming

Single full color touch-screen console in cabin

Variable Rate Control option for all bins

Voice alerts for all functions

Simple to calibrate and use

Metric, US, or English units

Multiple fan monitoring

X20 bright, full-color, easy-to-use information - right at the operator's fingertips
