Data sheet

7KM4220-1BA01-1EA0

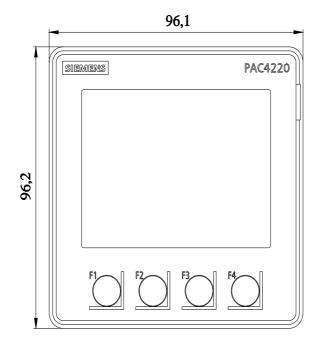

SENTRON PAC4220, Power Monitoring Device with color graphic TFT display PMD-III acc. to IEC61557-12 active energy class 0.2 (class 0.2S acc. to IEC62053-22) 96 x 96 mm, 3-phase, 45 - 65 Hz Ue rated: 690/400 V Ie rated: x/1A or x/5A DC extra-low voltage power supply unit 24 to 48 V +-25% screw terminal connection control panel instrument with measurement of electrical variables apparent / active / reactive energy / cos phi / THDu / THDi / even and odd harmonics per phase up to 64.

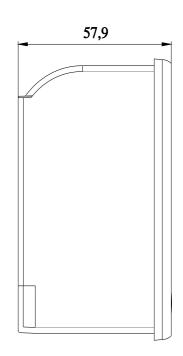

Model				
product brand name	SENTRON			
product designation	Measuring device for power system quality measurement			
product type designation	7KM PAC4220			
Measurements				
measuring procedure				
 for voltage measurement 	TRMS			
 for current measurement 	TRMS			
type of measured value detection	complete			
voltage curve	Sinusoidal or distorted			
measurable line frequency				
• initial value	45 Hz			
• full-scale value	65 Hz			
operating mode for measured value detection automatic line frequency detection	Yes			
operating mode for measured value detection				
• set at 50 Hz	No			
• set to 60 Hz	No			
Supply voltage				
design of the power supply	Extra-low voltage power supply unit			
type of voltage of the supply voltage	DC			
supply voltage at DC	18 60 V			
apparent power consumption of the power supply	9 VA			
Degree of protection protection class				
protection class IP on the front	IP65			
protection class IP of the terminal	IP20			
operating resource protection class when installed	Ш			
Suitability				
suitability for operation	Installation in stationary panels in closed rooms			
Product Functions				
product function				
voltage measurement	Yes			
current measurement	Yes			
active power measurement	Yes			
 reactive power measurement 	Yes			
 power factor measurement 	Yes			
 frequency measurement 	Yes			
 apparent energy/active energy/reactive energy 	Yes			
Display and operation				

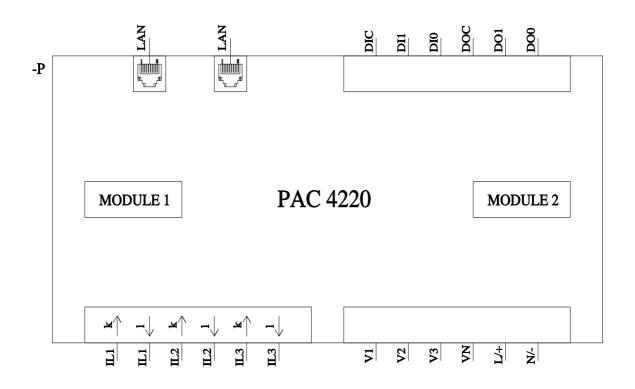

height of the display	54 mm		
width of the display	72 mm		
color of the background of the display	white		
illuminance of display backlight adjustable	Yes		
time-controlled reduction of the illuminance of display backlight possible	Yes		
display contrast adjustable	Yes		
national language on the display screen is supported	ger, en, fr, spa, ita, por, tur, rus, chi, pol		
number of keys	4		
Communication			
transfer rate minimum	10 000 kbit/s		
transfer rate maximum	100 000 kbit/s		
number of interfaces according to Fast Ethernet	2		
type of electrical connection of the fast Ethernet interface	2 x RJ45		
protocol at the Ethernet interface is supported	MODBUS TCP		
transfer rate 1 for Ethernet	10 Mbit/s		
transfer rate 2 for Ethernet	100 Mbit/s		
Fault limits			
reference condition for metering accuracy	according to IEC61557-12		
formula for relative total measurement inaccuracy			
 for measured variable voltage 	+/- 0.2 %		
 for measured variable current 	+/- 0.2 %		
 for measured variable apparent power 	+/- 0.5 %		
 for measured variable active power 	+/- 0.2 %		
 for measured variable reactive power 	+/- 0.5 %		
 for measured variable output factor 	+/- 0,5 %		
 for measured variable active energy 	Class 0.2 according to IEC61557-12 and/or class 0.2S according to IEC62053- 22		
 for measured variable reactive energy 	class 0.5 acc. to IEC61557-12 or IEC62053-23		
 for measured variable THD 	+/- 2 %		
Inputs Outputs			
number of digital inputs	2		
number of digital inputs design of the switching input	2 electronic, passive		
· · · · · · · · · · · · · · · · · · ·			
design of the switching input	electronic, passive		
design of the switching input type of electrical connection at the digital inputs	electronic, passive screw-type terminals		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply	electronic, passive screw-type terminals Yes		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum	electronic, passive screw-type terminals Yes 30 V		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs	electronic, passive screw-type terminals Yes 30 V 2		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at the digital output st DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital input external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at the digital output for signal <1> maximum • at the digital output sat DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital input external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals Measuring inputs	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes CATIII		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital input external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at the digital output for signal <1> maximum • at the digital output sat DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital input external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output for signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals Measuring inputs measurable supply voltage between (PE)N and L at AC	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes CATIII		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals Measuring inputs measurable supply voltage between (PE)N and L at AC maximum rated value	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes CATIII		
design of the switching input type of electrical connection at the digital inputs operating conditions for digital inputs external voltage supply input voltage at digital input at DC maximum number of digital outputs type of switching output digital output version operating voltage as output voltage at DC maximum permissible type of electrical connection at the digital outputs output current • at digital output with signal <0> maximum • at digital output for signal <1> maximum • at the digital outputs at DC limited to 100 ms maximum internal resistance at the digital outputs standard for pulse emitter pulse duration • initial value • full-scale value adjustable time period minimum switching frequency at digital output maximum property of the output short-circuit proof measuring category for digital signals Measuring inputs measurable supply voltage between (PE)N and L at AC maximum rated value	electronic, passive screw-type terminals Yes 30 V 2 electronic, passive switching or pulse output function 30 V screw-type terminals 0.2 mA 50 mA 130 mA 30 Ω according to IEC62053-31 30 ms 500 ms 10 ms 20 Hz Yes CATIII		

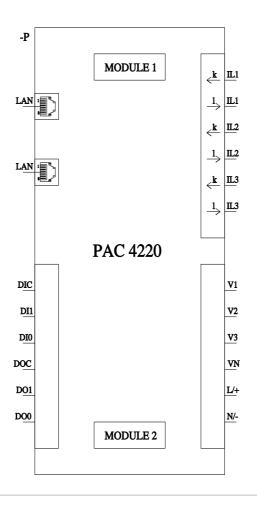

measurable supply voltage between the line conductors at AC	
• minimum	20 V
• maximum	828 V
voltage measuring range extension with external voltage transformers	yes
line conductors and neutral conductors internal resistance for voltage measurement	1.62 ΜΩ
measuring category for voltage measurement	CAT III
measurable current	
• 1 at AC rated value	1 A
• 2 at AC rated value	5 A
relative measurable current at AC	
• minimum	1 %
• maximum	120 %
current measuring range extension with external current transformers	Yes
zero point suppression for current measurement	0 10 %
apparent power consumption for current measurement	
 with measuring range 5 A per phase 	0.3 VA
measuring category for current measurement	CATIII
Connections	
type of connectable conductor cross-sections	
 at the measurement inputs for voltage solid 	1x (0.2 6 mm²), 2x (0.2 1.5 mm²)
 at the measurement inputs for voltage finely stranded with core end processing 	1x (0.2 4 mm²), 2x (0.5 2.5 mm²)
 at the measurement inputs for voltage for AWG cables solid 	1x 24 to 10
 at the measurement inputs for current solid 	1x (0.2 6 mm²), 2x (0.2 1.5 mm²)
 at the measurement inputs for current finely stranded with core end processing 	1x (0.2 4 mm²), 2x (0.5 2.5 mm²)
 at the measurement inputs for current for AWG cables solid 	1x 24 to 10
type of electrical connection	
 at the measurement inputs for voltage 	screw-type terminals
 at the measurement inputs for current 	screw-type terminals
Mechanical Design	
fastening method standard rail mounting	No
size of Power Monitoring Device	size 96
height	96 mm
width	96 mm
depth	56 mm
installation depth	51 mm
net weight	345 g
mounting position	vertical
Environmental conditions	
ambient temperature during operation	
• minimum	-25 °C
• maximum	55 °C
ambient temperature during storage	
• minimum	-25 °C
• maximum	70 °C
relative humidity at 25 °C without condensation during operation maximum	75 %
installation altitude at height above sea level maximum	2 000 m
degree of pollution	2
Certificates	
certificate of suitability as EC Declaration of Conformity	yes
Approvals Certificates	
General Product Approval	EMV

CE EG-Konf.	UK CA	<u>Confirmation</u>	c UL us	EAC	RCM	
other		Environment				
<u>Confirmation</u>	<u>Miscellaneous</u>	Environmental Con- firmations	Siemens EcoTech	Environmental Con- firmations
