VACUUM FILLER VF 612 H

The vacuum filler with lifting device for small-scale producers!

- ↘
1. Vane cell feed system
 2. Trend products by cutting unit
 3. Complete sausage range
 4. New diversity by round former
 5. Efficiency with holding device

The new VF 612 H vacuum filler from Handtmann is the perfect portioning and linking machine for small-scale producers that use meat trolleys for sausage meat production and transport. A filling capacity of 2,000 kg per hour and the arm lifting device meet all efficiency and economy requirements. With a filling pressure of 35 bar, sufficient power reserves are available even for highly-viscous product types, such as dry sausage.

Benefit from these advantages

- Cost control with every portion thanks to high portioning accuracy
- Excellent product quality thanks to the unique vane cell feed system from Handtmann
- Powerful portioning capacity of up to 450 portions per minute
- Easy operation on the 10" colour display and parameter storage device for 300 different products
- Low operating and maintenance costs thanks to long maintenance intervals
- Additional sales potential through auxiliary devices such as a holding devices, round former and cutting unit

The new VF 612 H.

Quality and performance for a versatile product range for small-scale producers!
