# About Smarlean

## Integrated OEM/ODM Platform for Dispenser Systems

With In-House Dispenser Manufacturing and an Integrated Hygiene Supply Chain.  
Empowering Emerging and Regional Brands Worldwide.

### Company Overview

Smarlean is a one-stop OEM/ODM platform for commercial hygiene solutions, backed by 23 years of professional experience in manufacturing soap and paper dispensers and operating a stable, scalable supply chain covering compatible consumables and other professional hygiene products, serving global brands such as Kimberly-Clark and APP.

### Factory Strength

We are a full-service manufacturer, integrating R&D, design, production, processing, customization, sales, and export trade. Our 20-member R&D team ensures creative and innovative product design, while our factory spans 9,000 sqm with 6 assembly lines and 16 injection molds, providing high production capacity to meet global market demands. We operate a strict quality control system with 20+ QC procedures, including front cover drop tests, battery life tests, and carton drop tests, ensuring consistent and reliable product performance.

## Product Portfolio

Smarlean offers 5 main dispenser series — Silk, Neat, Slim, Disinfect, and Center-Pull — totaling 20+ high-quality units. Each works seamlessly with compatible paper, forming a complete Paper + Dispenser system. With 20+ certifications and 30+ patents, we provide OEM/ODM customization for dispensers and paper, empowering brands with integrated hygiene solutions.

## Global Partnership

Proven by long-term leadership in China's demanding market, Smarlean is a best-selling provider of center-pull dispenser systems and medical-grade H1/H2 dispensers. Our platform has been successfully replicated internationally, with OEM/ODM partnerships in Mexico, Poland, and Russia, helping local brands build competitive, scalable hygiene product lines. Smarlean selects qualified regional exclusive distributors, offering commercial support, brand empowerment, and operational guidance. By combining product engineering, supply chain integration, and low-MOQ customization, we help brands shorten time-to-market, reduce sourcing risk, and compete globally.

### Partnership Models:

1. Dispenser OEM/ODM Only (Basic)
2. Dispenser + Consumables System OEM/ODM (Recommended)
3. Full Commercial Hygiene Solution OEM/ODM (One-Stop Entry)

### Smarlean Global Distributor Network

 Exclusive distribution products:  
H1,H3, H4, A4, G1  
Cooperation term: 7 years

 Exclusive distribution products:  
H1,H3, H4, A4, G1  
Cooperation term: 6 years

 Exclusive distribution products:  
H3,H4  
Cooperation term: 1 year

### Smarlean Exclusive Partnership Process

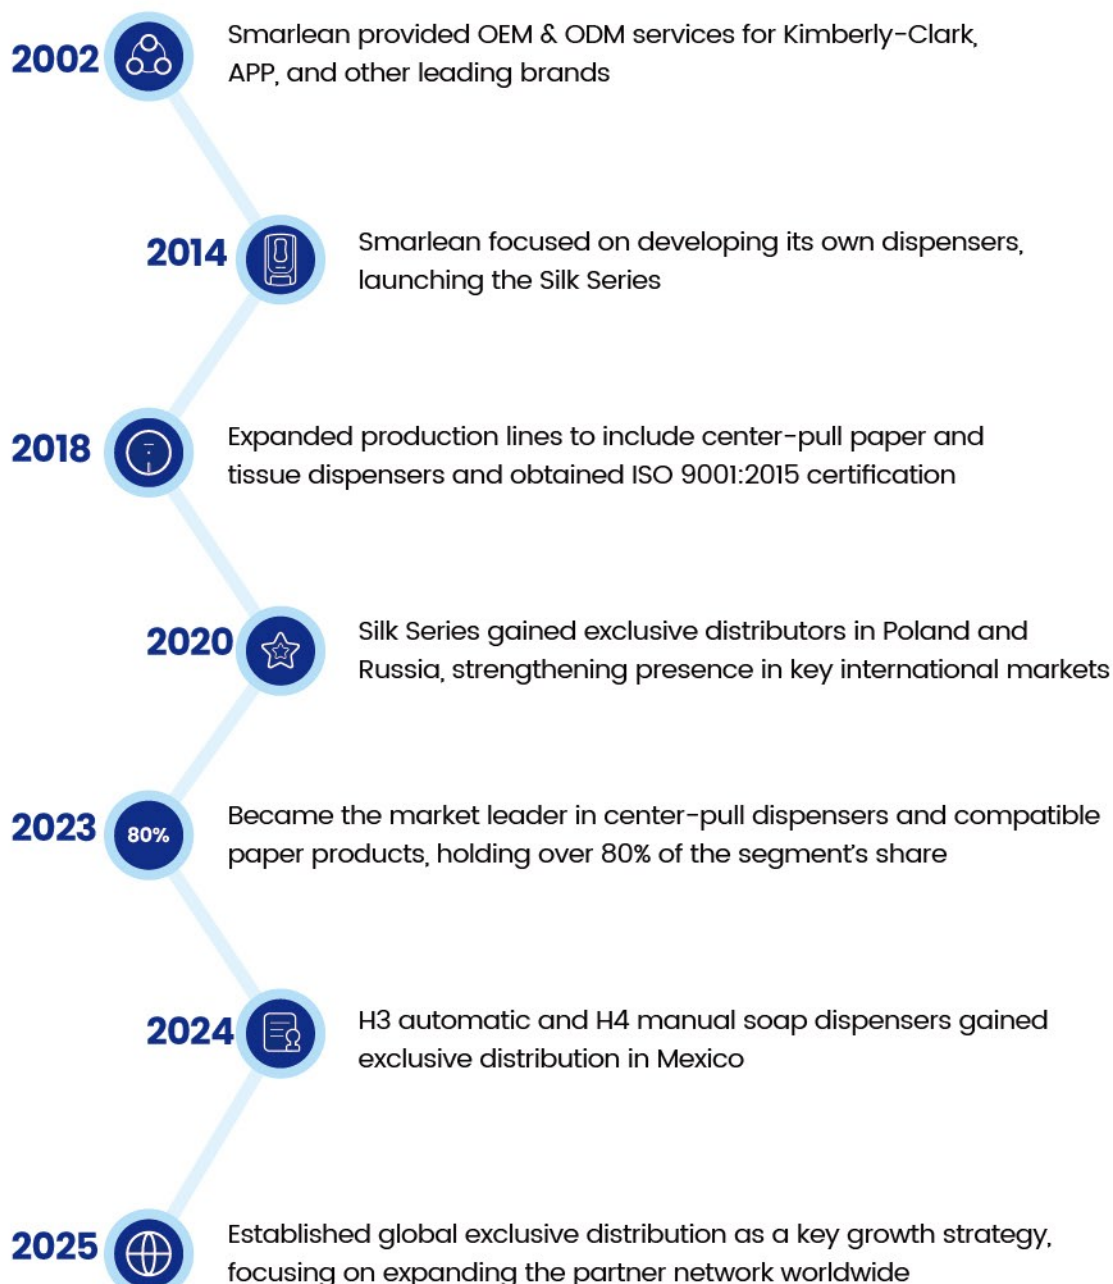

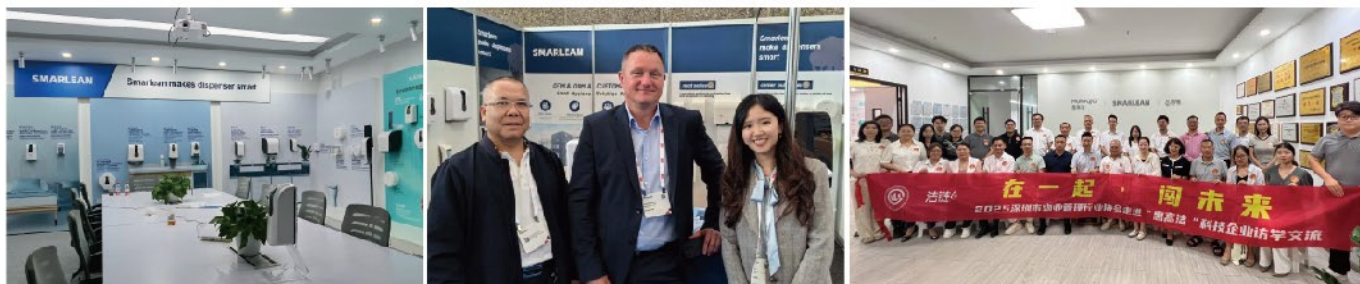

We provide a clear and transparent partnership framework, tailored to different regional markets. Our goal is to ensure every exclusive distributor achieves success while enjoying long-term stability. The Smarlean Exclusive Partnership process is as follows:

- 01** Market Evaluation: assess potential market demand, distributor capabilities, and regional sales potential.
- 02** Agreement & Targets: define exclusivity scope, cooperation term, and annual sales targets (flexible by market size).
- 03** Onboarding & Launch: provide product training, marketing materials, and initial stock support.
- 04** Growth & Support: ongoing technical, marketing, and operational support to boost sales performance.
- 05** Performance & Renewal: annual review of results, with priority renewal for successful partners.

# Company History

Since its founding in 2002, Smarlean has been committed to delivering high-quality commercial hygiene solutions, partnering with our clients to reduce environmental impact, improve public hygiene, and enhance business performance.

# Corporate Culture

## VISION

To be the world's most trusted one-stop OEM/ODM platform for commercial public hygiene, partnering with global brands to create cleaner, safer, and smarter public spaces.

## MISSION

We develop reliable, high-quality, and sustainable hygiene solutions, enabling partners to reduce environmental impact, enhance hygiene standards, and grow their business.

## CORE VALUES

### Integrity

Building long-term partnerships based on honesty and mutual trust

### Innovation

Continuously improving product design and technology to meet evolving market needs.

### Quality

Ensuring every product delivers consistent performance and durability

### Sustainability

Committed to eco-friendly materials and reducing waste throughout the supply chain

### Partnership

Growing together with distributors, brand owners, and end users worldwide

# Global Partner Types & Key Benefits

## Together, We Build Smarter Hygiene Systems

Smarlean partners with global distributors, hygiene brands, and industry professionals to deliver reliable and innovative hygiene dispensing solutions for public and commercial environments — from airports and hospitals to hotels, schools, and shopping malls.

## Nine Major Partner Types

### 01 Dispenser Wholesalers / Distributors

**Main Role:**

Supply commercial hygiene equipment and distribute to resellers

**Key Benefits:**

- Factory-direct pricing ensures higher margins
- Reliable quality minimizes complaints
- OEM/ODM options strengthen local branding

### 02 Liquid Soap / Sanitizer Manufacturers

**Main Role:**

Produce and sell soap, sanitizer, and cleaning liquids

**Key Benefits:**

- "Liquid + Dispenser" solution enhances brand value
- 3-in-1 pump fits foam, liquid, or spray
- Builds customer loyalty through exclusive pairing

### 03 Paper Mills / Tissue Suppliers

**Main Role:**

Produce and distribute tissue rolls, folded towels, and center-pull papers

**Key Benefits:**

- "Paper + Dispenser" combo boosts sales
- Compatible with multiple tissue sizes
- Adds professionalism and brand stickiness

### 04 Project Contractors / Facility Integrators

**Main Role:**

Handle large-scale construction and facility installations

**Key Benefits:**

- One-stop dispenser supply for projects
- Durable ABS ensures long lifespan
- Fast delivery & technical support

## 05 Cleaning & Facility Management Companies

### Main Role:

Provide cleaning, maintenance, and hygiene services

### Key Benefits:

- Easy refill and inspection
- Reduces maintenance time
- Compatible with multiple liquids and papers

## 06 Hotel Supply Distributors

### Main Role:

Supply hotel amenities and guestroom products

### Key Benefits:

- Modern, elegant design
- Delivering a better experience for hotel end users
- Hygienic and durable for daily use

## 07 Government & Public Sector Buyers

### Main Role:

Manage procurement for public institutions

### Key Benefits:

- Certified, compliant, reliable products
- Long-term framework cooperation
- Easy maintenance & vandal-resistant design

## 08 Retail & Private Label Brands

### Main Role:

Launch and sell their own dispenser brand

### Key Benefits:

- Complete ODM service
- Cost-effective mold use
- Flexible MOQ & quick sample

## 09 International Trading Companies / Importers

### Main Role:

Source and resell hygiene products to local markets

### Key Benefits:

- Full product line from one factory
- Reliable export & logistics support
- Competitive pricing for redistribution

## Shared Advantages Across All Partners

### Advantage 01

#### **Stable Quality**

Smarlean dispensers are made from 100% virgin ABS with precise molding and strict quality control. Verified by durability tests and global market performance, they ensure long-term stability and reliability in every use.

### Advantage 02

#### **Comprehensive Product Line**

Our full range of commercial hygiene dispensers includes automatic and manual soap dispensers, paper towel dispensers, and toilet tissue dispensers, along with compatible paper products. This complete lineup enables flexible product combinations and meets the diverse needs of hotels, airports, offices, hospitals, shopping malls, and other public spaces.

### Advantage 03

#### **High Compatibility Design**

Smarlean soap dispensers support three refill systems—disposable bag, disposable bottle, and refillable bottle—and work with foam, liquid, and spray pumps. The H2 Hospital model adapts to almost all bottle types used in medical and hygiene industries, providing maximum flexibility for liquid manufacturers and brand owners.

### Advantage 04

#### **OEM/ ODM Support**

We offer comprehensive OEM and ODM solutions, including custom dispenser colors, packaging, logos, and components. Using our existing molds, we maintain the dispenser's structure while creating a custom exterior that reflects your brand or market needs, reducing costs and lead time.

## Advantage 05

### Low Maintenance Design

High-capacity design, durable materials, and easy-to-clean surfaces minimize refills and reduce cleaning effort. Modular components and a reliable dispensing mechanism ensure quick servicing and consistent performance, saving time and operational costs.

## Advantage 06

### Reliable Supply Chain

With trusted suppliers, scalable production, efficient logistics, and rigorous quality control, Smarlean ensures timely delivery and consistent product quality for partners worldwide.

## Advantage 07

### Marketing Assistance

We provide ready-to-use promotional materials, product images, and online campaigns to help partners boost brand visibility, attract customers, and drive sales in any market.

## Advantage 08

### Technical & Installation Support

We offer installation guidance, training, and maintenance support to ensure smooth deployment, especially for engineering contractors, building integrators, and hotel facilities management.

## Advantage 09

### Regulatory Compliance & Certification Support

Smarlean provides international standard certifications (e.g., CE, ROHS, FCC, FSC, ISO, ADA) and documentation, helping partners meet regulatory requirements and facilitate market entry.

## Advantage 10

### Flexible Ordering & Logistics Solutions

Our logistics and ordering systems support small-batch, multi-product combinations as well as large-scale project orders, ensuring partners can meet diverse business needs efficiently.

# Commercial Napkin

SMARLEAN™

Hygienic

Eco-Friendly

Cost-Effective

Hygienic single-sheet dispensing, food-safe softness and strength, and cost-effective performance for high-traffic foodservice venues.

# Folded Toilet Paper – JAF602, JAF632

**Compatible Dispenser : AF2, AF6**

- Water-soluble design ensures safe and quick disintegration in plumbing systems.
- Soft, strong, and comfortable, delivering a pleasant user experience.
- Compressed by 50% for double storage and transport efficiency.
- Easy to refill, reducing maintenance time and operational costs.

Compatible Dispenser: AF2, AF6

## Centrefeed Napkin – JA301

**Compatible Dispenser : A3 on table**

**JA301**

- Hygienic One-at-a-Time Dispensing.
- Soft, Food-Contact Safe Material.
- Strong and Highly Absorbent.
- Cost-Effective for Busy Foodservice Environments.

Compatible Dispenser : A3 on table

Model	Quality & Feature	Colour	No. of Plies	Finished basis weight	Outer diameter (cm)	Width (cm)	Sheets/ Length (cm)	Sheets/ Roll	Rolls/ TRP

# Smarlean Application Scenarios & Solutions

SMARLEAN™

Tailored Hygiene Solutions for Every Commercial Space

**Perfect  
Match**

**Cost-  
Effective**

**Eco-  
Friendly**

**Reliable  
Performance**

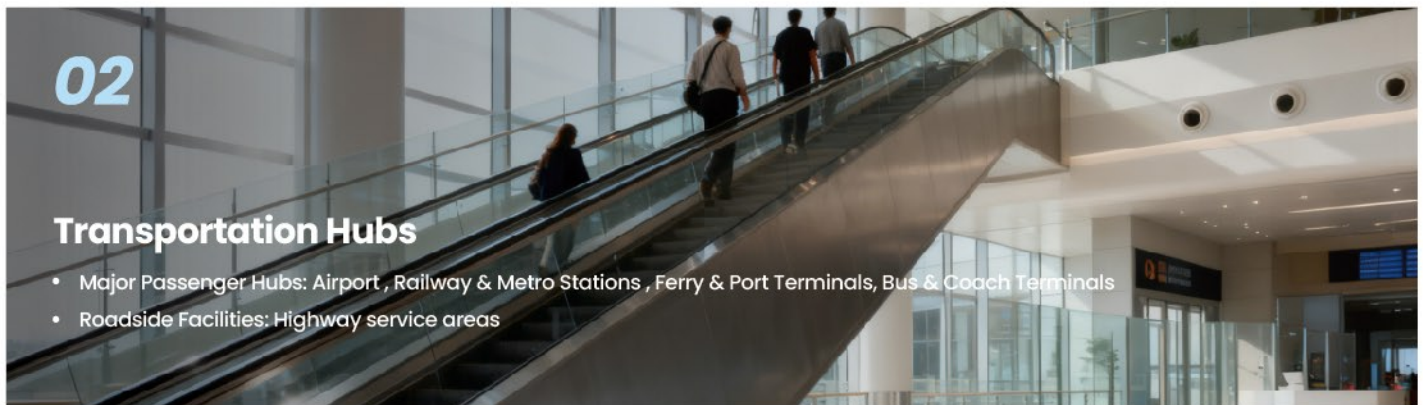

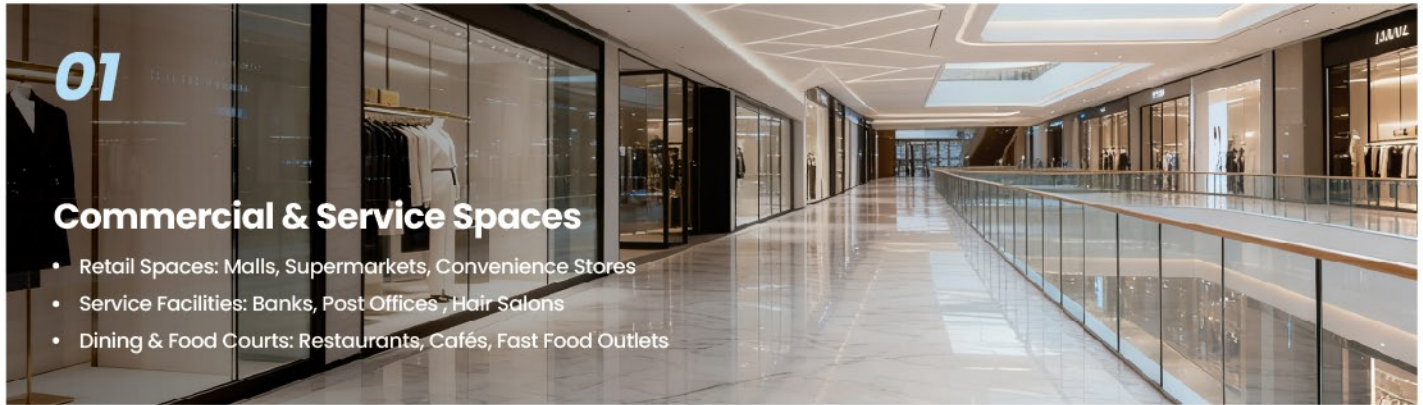

# Where Smarlean Works

01-04/08

While these eight application scenarios cover the full range of commercial and public environments, hygiene requirements vary significantly across them.

# Where Smarlean Works

05-08/08

05

## Culture & Entertainment

- Cultural Venues: Libraries, Museums, Art Galleries, Science Centers
- Performance Venues: Theaters, Concert Halls, Cinemas, Comedy Theaters
- Entertainment Venues: Nightclubs, Bars
- Parks & Attractions: Urban Parks, Zoos, Botanical Gardens, Amusement Parks

06

## Offices & Government Facilities

- Public Service Centers, Shared Office Spaces, Corporate Offices

07

## Sports & Fitness

- Sports Venues: Gymnasiums, Swimming Pools, Basketball/Football Fields, Track & Field
- Public Fitness Areas: Community Fitness Parks, Ski Areas
- Commercial Fitness: Gyms, Yoga Studios, Dance Studios

08

## Religious & Memorial

- Religious Sites: Churches, Mosques, Temples (public areas)
- Memorial Sites: Monuments, Memorial Parks

To guide customers toward the most suitable dispenser solutions, Smarlean groups these environments into five hygiene demand levels

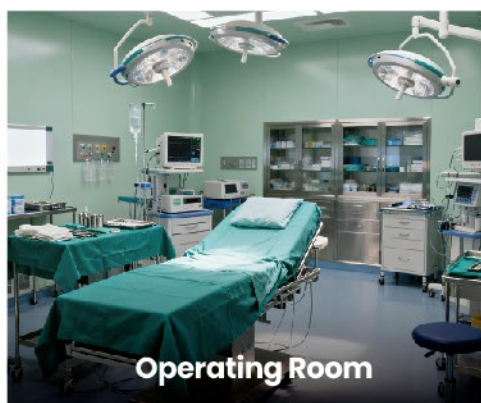

# Ultra-High Hygiene Spaces

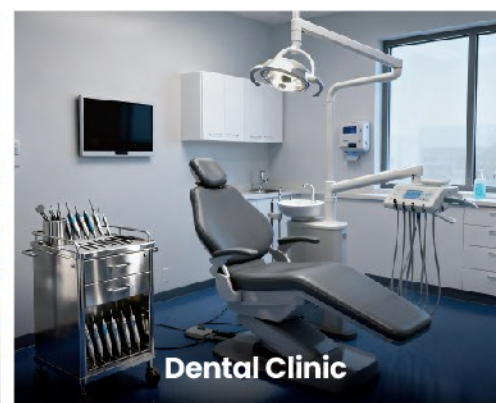

01/05

Laboratory

Operating Room

Dental Clinic

- **Core Needs:** Touch-Free · Absolute Sterility · Medical-Grade Compliance
- **Applicable Scenarios:** Medical & Healthcare Facilities, Laboratories, Operating Rooms, ICUs, etc.
- **Pain Points:** Cross-contamination risk, strict certification, device failure impact

## Recommended Standard Solution:

H3

G1

A1

H7

JG111

JA101

## Recommended Advanced Solution:

H1/H2

G2

A4

HFI

JG201

JA401

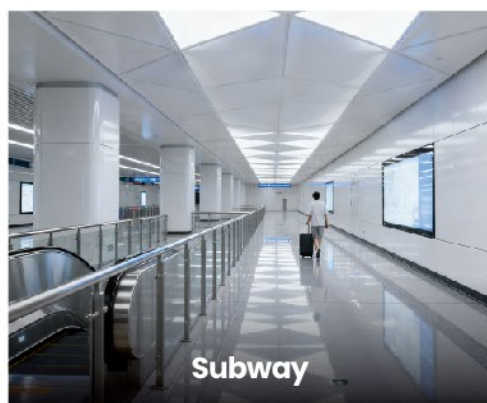

## Smarlean Advantages:

- **Market Leadership in China:** H2 dispenser covers 80% of China's hospital market, widely adopted in ICUs, operating rooms, clinics, and laboratories.
- **Touch-Free Infrared Sensor:** Minimizes cross-contamination and supports hygienic operation.
- **Medical-Grade Compliance:** CE, FCC, ROHS, ADA certified, meeting strict regulatory standards.
- **Anti-Contamination Design:** Compatible with 80% of existing hospital bottles, ensuring safe and seamless integration.
- **Reliable & Durable:** Designed for continuous use in critical environments, reducing device failure risk.
- **Co-Branding & System Solutions:** Supports integration with liquid suppliers for full-system tendering.

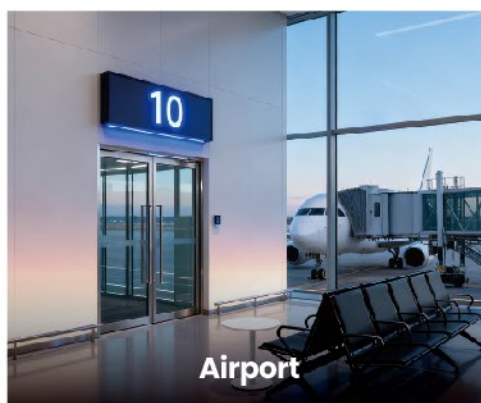

# High-Traffic Public Spaces

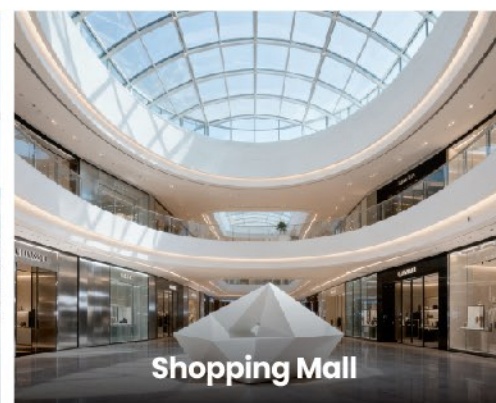

02/05

Subway

Airport

Shopping Mall

- **Core Needs:** High Capacity · Extreme Durability · Low Maintenance
- **Applicable Scenarios:** Transportation Hubs, Stadiums, Theme Parks, etc.
- **Pain Points:** High labor cost, paper waste, equipment failure

## Recommended Standard Solution:

## Recommended Advanced Solution:

## Recommended Premium Solution:

## Smarlean Advantages:

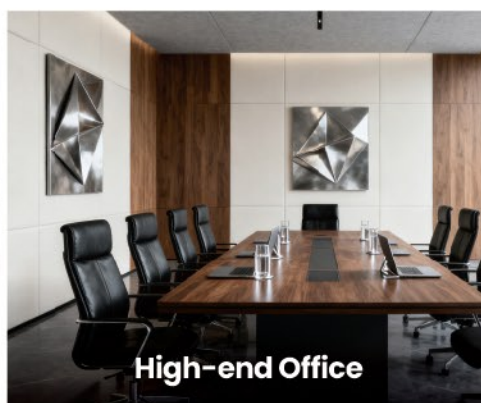

- **Market Leadership in China:** Dominates 80% of the Chinese center-pull paper dispenser & refill market, trusted by public facilities nationwide.
- **High-Capacity Design:** Supports heavy user traffic, reducing refill frequency and labor costs.
- **Industrial-Grade Durability:** Tested for millions of cycles; withstands high-traffic public environments without failure.
- **Paper-Saving Technology:** Single-sheet and center-pull options reduce paper consumption by up to 40%.
- **Low Maintenance:** Easy to refill, clean, and operate, minimizing operational downtime.
- **Co-Brand Tender Ready:** Can integrate with liquid suppliers for full-system solutions in public facilities.

# Brand Experience Spaces

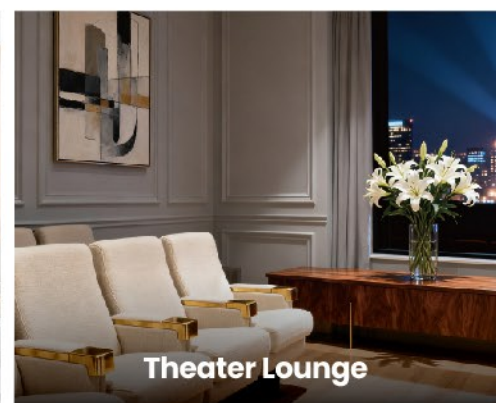

03/05

Luxury Hotel

High-end Office

Theater Lounge

- **Core Needs:** Aesthetic Design · Quiet Operation · Brand Customization
- **Applicable Scenarios:** Luxury Hotels/Clubs, Premium Offices, Theaters & Concert Halls
- **Pain Points:** Ruins aesthetic, poor user experience, lack of brand identity

## Recommended Dispensers:

## Recommended Refills:

## Smarlean Advantages:

- **Aesthetic & Premium Design:** Sleek, minimalist designs with optional custom panels, enhancing the elegance of luxury hotels
- **Brand Customization & Professional ODM/OEM Expertise:** Over 20 years of experience providing OEM/ODM services for Kimberly-Clark, offering extensive and professional customization of color, logo, panel, and functional design to meet client-specific brand requirements.
- **High-Quality Materials:** Made from durable, antibacterial, and chemical-resistant ABS, maintaining luxury aesthetics while ensuring hygiene

# Standard Commercial Spaces 04/05

School

Standard Office

Religious Memorial Sites

- **Core Needs:** Cost-Effective · Reliable · Easy Maintenance
- **Applicable Scenarios:** Malls, Banks, Schools, Standard Offices, Religious & Memorial
- **Pain Points:** Limited budget, complex maintenance, vendor lock-in

## Recommended Dispensers:

## Recommended Refills:

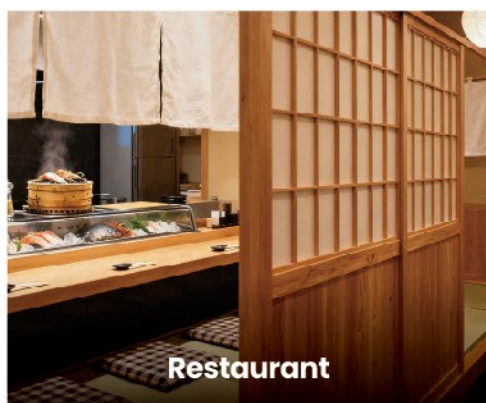

## Smarlean Advantages:

- Designed to meet tight budgets without compromising quality; reduces overall total cost of ownership through durable materials and efficient paper usage.
- Quick and simple refill process; intuitive design reduces labor costs and downtime for facility staff.
- Single-sheet or center-pull options help reduce paper waste by up to 40%, optimizing consumable usage.
- H4 and H5 soap dispensers are compatible with most liquid soaps, sanitizers, and detergents available in the market, providing flexible options for facility managers.

# Dining & Food Spaces

05/05

Restaurant

Canteen

Food Processing Plant

- **Core Needs:** Food Safety · Waterproof & Corrosion-Resistant · Easy to Clean
- **Applicable Scenarios:** Restaurants, Cafeterias, Food Processing Plants, Hotel Kitchens
- **Pain Points:** Sanitation dead spots, failure in harsh environments, workflow impact

## Recommended Products:

A3 on table

G4

JA301

JH1800

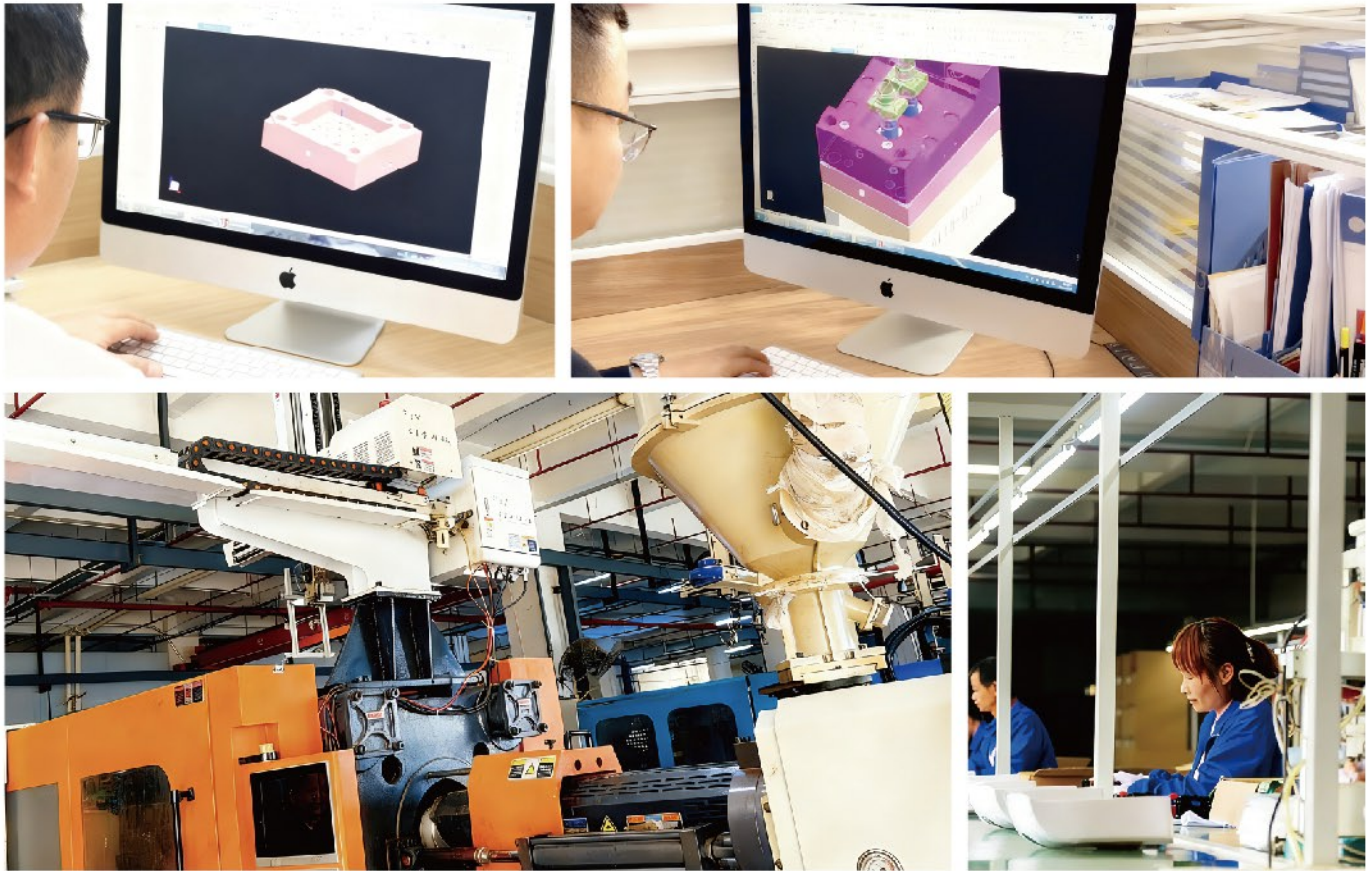

## Smarlean Advantages:

- Developing TAD Kitchen Paper with Full Control of Core Capacity.
- Smooth surfaces and modular design allow quick cleaning and refills, reducing operational downtime.
- Single-sheet dispensing helps to reduce waste and lower operational costs.

# OEM & ODM Service

Customized Hygiene Solutions Engineered for Global Brands

**In-House R&D & Tooling**

**Integrated Manufacturing**

**APQP-Based Development Process**

**Flexible Customization Options**

**Welcome to customize your exclusive dispenser**

**Create Your Customized Dispenser System with Smarlean**

# Smarlean OEM & ODM Customization Services

## Customized Hygiene Solutions Tailored to Your Brand

Smarlean provides full-scale OEM & ODM solutions for global hygiene brands, liquid suppliers, paper manufacturers, and facility solution providers. Leveraging over 20 years of customized manufacturing experience for Kimberly-Clark and other leading brands, we transform your concepts into market-ready dispensers and hygiene systems with speed, precision, and unmatched reliability.

## Core Capabilities

### Tailored R&D & Tooling

Complete design, engineering, and mold development performed in-house, with experience delivering over 20 years of customized solutions for Kimberly-Clark

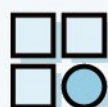

### Integrated Manufacturing

Injection molding, assembly, and testing under Smarlean control for consistent quality

### APQP-Based Development Process

Structured workflow from concept → design → prototype → validation → mass production

### Flexible Customization Options

Full OEM & ODM customization: branding, colors, press plates, pump systems, packaging, exclusive molds

## Customization Models

### Existing Product-Based ODM

Modify Smarlean's existing dispensers to match your brand quickly and cost-efficiently.

<b>Key Advantages:</b>	Fast to market, low-risk, cost-efficient	
<b>Customizable Options:</b>	Logo & Branding, Colors & Surface Finishing, Press Plate / Front Panel, Semi-structural Adjustments (window, cover details), Packaging & Labeling	
		
	MOQ: 200 pcs	MOQ: 2000 pcs
Custom Logo	Custom Color	Custom Packaging
		
MOQ: 1000 pcs		

### Full New-Product OEM

Develop a fully new dispenser or hygiene product from concept to production.

<b>Key Advantages:</b>	Exclusive design, full brand differentiation, highly flexible
<b>Customizable Options:</b>	Product Architecture & Exterior Design, Functional System Customization, Engineering & Structural Development, Brand Customization & Packaging, Mold & Prototype Development, Validation & Testing

MOQ: 5000 pcs

23+ Years of OEM Expertise · 100+ Successful Custom Developments

## Cooperation Workflow & Smarlean APQP Management

Total Development Timeline: ~14–17 weeks (standard ODM/OEM projects)

### 01 Requirement Submission

🕒 Time: 1 week

#### Workflow:

- Customer provides ODM/OEM requirements.
- Smarlean sets up a project team and evaluates feasibility.

#### APQP Key Activities:

- Collect specifications: type, capacity, dispensing mode, material, color, application scenario.
- Record special requests: branding, packaging, functional requirements.
- Confirm delivery schedule and quantity.

**Key Deliverables:** Requirement Sheet, Feasibility Assessment

### 02 Solution & Quotation

🕒 Time: 1 week

#### Workflow:

- Propose concept, development plan, timeline, and initial quotation including design or tooling costs.

#### APQP Key Activities:

- Feasibility assessment.
- Cost, material, and time evaluation.

**Key Deliverables:** Concept Proposal, Initial Quotation

### 03 Design Confirmation

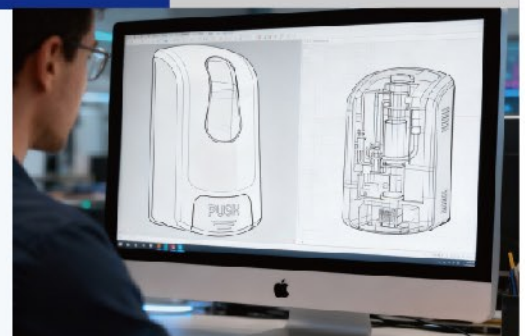

🕒 Time: 2–3 weeks

#### Workflow:

- Confirm appearance, structure, and electronic design (if needed).
- Finalize specifications before prototype development.

#### APQP Key Activities:

- Industrial design: appearance, ergonomics, interface.
- Structural design: mechanism, cartridge compatibility, durability.
- Engineering feasibility: cost, material, time assessment.

**Key Deliverables:** Concept Design, 3D Model, Cost & Time Assessment

## 04 Prototype & Testing

🕒 Time: 5–6 weeks

### Workflow:

- Create prototype.
- Functional testing, simulation testing, user–scenario evaluation to ensure performance reliability.

### APQP Key Activities:

- Functional prototype creation.
- Durability, dispensing accuracy, water resistance, and user safety testing.
- Usability evaluation and optimization.

**Key Deliverables:** Prototype, Functional Test Report, Optimized Design

## 05 Tooling & Pilot Run

🕒 Time: 3–4 weeks

### Workflow:

- Mold design and fabrication.
- Pilot production to verify structure, appearance, and manufacturability.

### APQP Key Activities:

- Mold/tooling design for dispensers.
- Pilot production to verify manufacturability and assembly efficiency.
- PFMEA to identify process risks.

**Key Deliverables:** Mold Validation, Pilot Production Sample, Process Assessment

## 06 Mass Production & Shipment

🕒 Time: 2 weeks

### Workflow:

- Mass production after pilot approval.
- Packaging and QC inspection.
- Final shipment.

### APQP Key Activities:

- Measurement System Analysis (MSA) to ensure consistent quality.
- PPAP submission for customer approval.
- Confirm readiness for mass production, QC, and packaging.

**Key Deliverables:** Approved PPAP, Mass Production Plan

## 07 Customer Feedback & Continuous Improvement

🕒 Time: Ongoing

### Workflow:

- Collect feedback from first batches in commercial environments.
- Monitor performance and resolve post–launch issues.
- Update design/process for next production cycle if necessary.

### APQP Key Activities:

- Customer feedback collection.
- Corrective action and continuous improvement.
- PFMEA to identify process risks.

**Key Deliverables:** Customer Feedback Report, Corrective Action Plan

# Trusted Quality Engineered for Excellence

SMARLEAN™

**Global Standards · Proven Quality · Trusted Innovation**

Smarlean ensures every dispenser and consumable meets the highest standards of quality, safety, reliability, and compliance for demanding commercial environments.

ISSA  
Member

20+  
QC Procedures

20+  
Certifications

30+  
Patents

## Quality Control (20+ QC Procedures)

We operate a strict quality control system with over 20 inspection procedures, covering all stages from raw material checks to final product verification. These tests guarantee that all Smarlean dispensers and consumables perform reliably and durably in demanding commercial environments.

### Functional Tests

- Dispensing consistency – stable output of soap or paper
- Multiple-use testing – simulating high-frequency commercial usage
- Sensor sensitivity (automatic dispensers) – reliable touchless operation
- Refill compatibility – testing various cartridges, bottles, and paper rolls
- Lock and hinge operation – smooth opening and closing

### Durability & Mechanical Tests

- Drop tests – resistance to handling and transport impacts
- Press plate / actuator durability – long-term operation of buttons and levers
- Cover and body strength – prevent cracks or deformation
- Hinge/lock lifespan – repeated opening/closing reliability
- Repeated actuator cycles – ensuring consistent operation

### Safety & Compliance Tests

- Electrical safety (automatic dispensers) – short circuit, overload, leakage protection
- Battery life testing – low battery warning verification
- Sharp edges / pinch point check – safe for users
- Material safety / flame retardancy – non-toxic, compliant plastics

### Environmental & Reliability Tests

- Temperature & humidity tests – functionality under extreme conditions
- Waterproof/IP rating tests – e.g., IPX7 verification
- Corrosion and chemical resistance – withstand cleaning agents
- UV / sunlight exposure test – plastic aging resistance

### Packaging & Logistics Tests

- Carton drop test – simulating shipping conditions
- Vibration and stacking tests – ensuring transport durability

## Certifications (20+ Global Certifications)

Smarlean products are backed by 20+ international certifications required by major markets. These certifications ensure our products are globally compliant, safe, and professionally recognized.

### Key Certifications:

#### ISO9001:2015

Quality Management System

#### ISO14001:2015

Environmental Management System

#### CE, RoHS, FCC, FSC

Global compliance standards

#### ISSA Member

Recognized by the global cleaning & hygiene industry

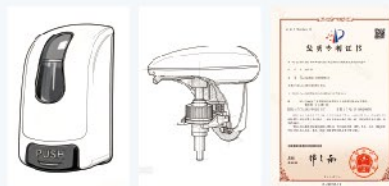

## Intellectual Property & Patents (30+ Patents)

Smarlean owns over 30 patents, covering key technical innovations such as:

### H1, H2

#### Adjustable dosage mechanisms:

Reduce waste and optimize dispensing efficiency

### A1, A2, A3, A5, A6, A11

#### Center-pull anti-collapse structures:

Smooth tissue operation and prevent jams

### H2

#### Patented bottle compatibility system:

Ensures seamless use of existing different refill bottles

#### Clip-in Bottle System:

Easy installation and maintenance of refill bottles

### G2

#### perforation line detection technology:

Automatically detects and stop dispensing at the paper perforations lines, allowing precise tearing, preventing jams and paper waste

Our IP portfolio protects our technical advantages and supports partners with strong market differentiation and higher entry barriers.

## Local Compliance Support (Joint Certifications & Patents)

To help partners enter local markets smoothly, Smarlean provides comprehensive compliance support. Certifications and patents can be jointly applied with partners, or independently applied by Smarlean, depending on the market requirements.

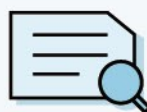

### Support Services:

Joint applications for local certifications

Full engineering documentation & test reports

Technical support for local testing agencies

Sample preparation and modification guidance

Joint international patent applications (PCT or country-specific patents)

Smarlean-initiated patents to ensure the product meets local legal requirements

### Outcome for partners:

Faster and smoother market entry

Stronger competitiveness in government and public tenders

Exclusive protection in the local market

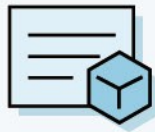

Long-term supply chain stability and partnership trust

## Why It Matters to Our Partners

Our integrated system of QC + Certifications + Patents + Local Compliance ensures:

Higher trust and credibility among B2B clients

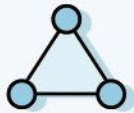

Stronger competitiveness in public and commercial tenders

Better product reliability and long-term performance

Legal protection and reduced market-entry risks

More stable, exclusive, and long-term cooperation

Integrated system of QC + Certifications + Patents + Local Compliance

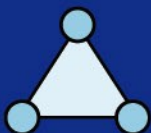

### Product reliability & legal protection

Better product reliability and long-term performance /  
Legal protection and reduced market-entry risks

### Higher trust & Stronger competitiveness

Higher trust and credibility among B2B clients /  
Stronger competitiveness in public and commercial tenders

### Stable, exclusive, long-term cooperation

More stable, exclusive,  
and long-term cooperation
