What is Vacuum Fried Taro Chips (VF taro chips)?

Vacuum fried taro chip (VF taro chips in short) is a kind of dried taro chips, keeps the original shape and color of fresh taro. As a kind of health chips, VF taro chips are more and more popular in global market.

VF taro chips are made from well-chosen superior IQF or fresh taro, using vacuum frying technology, the IQF taro turned into natural delicious chips after the oil bath. This kind of chips is very light, moisture less than 5%, taste crispy, except oil and sugar, without any other additives, much more healthier, natural and safe.

At the first, VF taro chips are popular in Japan market, recent years, it is more and more popular in America, Australia, Mid-East and Europe. More and more people would like to choose this kind of chips for their leisure time.

VF taro chips are up to the mustard of HACCP. All the original and end product are test at any time to ensure the quantity and safety.
