

High Temperature Muffle Furnace

Equipment Details

Can be widely used in plastic, rubber, packaging, apparatus, machinery and metallurgy, chemical industry etc, and apply for heating of industrial and mining enterprises, scientific research units for chemical analysis physics laboratory determination and the heating treatment of general small steel parts.

Standard Parameters

Model	DTK-805
Inner dimension (WxDxH)	300×500×200mm
Outer dimension (WxDxH)	580×850×590mm
Temperature range	Max. 1200°C
Temperature precision	+/- 5°C
Controller	Digital temperature controller
Voltage	Three-phase, 380V, 50Hz
Power	12kw
Weight	Approx. 185kg
