

PVC Embossed Board

PVC embossed board is developed from pvc celuka foam board and is designed for bathroom vanity.

After the pvc foam board is heated and softened at high temperature, the embossed pattern is pressed out of the surface of the pvc foam board through a press machine.

PVC embossed board is a natural wood substitute product. It is waterproof, mildew proof, non-toxic, odorless, and recyclable artificial board. Because of its feature to be used in a humid environment and its excellent processing performance (it can be easily sawed, CNC cut, planed, nailed, painted), PVC embossed board has become the most popular material for bathroom vanity.

Product Details

There are two thicknesses of PVC embossed board, 16mm and 18mm. The common sizes are 1220*800mm, 1220*600mm, 725*600mm, etc. Usually a PVC embossed board can be cut into one or more sets of bathroom vanity boards, or a board that can be cut optionally according to the size of your design. We have reserved pre-cutting lines for each module on the board, which is convenient for you to position and cut.

We have hundreds of molds, that is, we have a variety of embossing patterns for you to choose from. You can also customize your own unique embossed pattern. PVC embossed board can also be laminated with PVC film to make your bathroom vanity boards more diversified.

Compliance

ISO 17226-1:2021

RoHS compliant

REACH compliant

ASTM E84-17

ISO 27528:2009

ISO 1926:2009

GB 18580-2001

Advantage

Multiple designs

more than 200 sets of molds, multiple sizes and colors are available

Clean surface

all white without dirt, no impurities, pits or bumps

Quick assembly

pre-cut boards can be used directly or painted

Nail-holding strength

tighten the screws without slipping

Water-proof & mildew-proof

suitable for outdoor and humid environments

Fire performance

common pvc foam board is self-extinguishing, and fire-resistant enhanced boards meet ASTM E84 Class A

Easy to clean

it can be cleaned with ordinary detergents and rags

Processing performance

can be easily drilled, nailed, sawed, cut, planed, painted

Application

Bathroom vanity, kitchen cabinet, cupboard, etc.

What We Do?

Manufacturing, wholesale and custom processing

Boardway has been one of China's top professional manufacturers of plastic sheets since 2006. For 15 years, Boardway has devoted all its energy to the production of plastic sheets.

We have advanced research and development capability, a stable supply capacity, 8 extrusion production lines for foamed PVC board, which can not only meet the fast delivery, but also meet the orders in large quantity. We also have professional technical support and 24/7 high-quality service.

Custom processing is also what Boardway is good at. We provide customers with customized processing services for all plastic products.

For example, to provide customers in the building and decoration industry with CNC cutting, PUR laminating, sanding, chamfering, etc. Provide silk screen printing, UV printing and die cutting for customers in the advertising industry. Provide customers in the manufacturing industry with thermoforming of thermoplastic materials.

China has a large number of suppliers and different product quality, so how to choose a Chinese supplier? Boardway is willing to help you do supplier selection and resource integration.

We have a natural geographical advantage and can help you to confirm the product quality of each supplier, even visit their factory to check the authenticity. What we can do includes sourcing, prototyping, procurement, module assembly, product testing and improvement.
