

Transparent PVC Sheet

Transparent PVC sheet is a rigid transparent plastic sheet made of polyvinyl chloride (PVC) resin and produced by extrusion production technology.

It is highly recommended for applications that require visibility of the process or operation.

The feature of polyvinyl chloride is chemical stability, acid and alkali resistance, making transparent PVC sheet the most common material in the chemical industry. PVC sheet has good dimensional stability, it is suitable for thermoforming in the packaging industry.

Product Details

For the type of transparency, we have blue transparent PVC sheet and crystal clear PVC sheet. Both have high transparency and provide good visualization effects. For applications that need to be used outdoors, we recommend blue transparent PVC sheet, which has better yellowing resistance.

Blue Transparent PVC Sheet

Crystal Clear PVC Sheet

For the surface type of transparent PVC sheet, we have glossy surface, frosted surface and matte surface.

Compliance

RoHS compliant
REACH compliant
UL 94 V-0

Advantage

Dimensional stability

PVC thermoformed parts are not easy to shrink and deform after cooling

High transparency

good light transmission, no impurities, no crystallization, no flow line

Acid and alkali resistance

stable chemical performance and corrosion resistance

Antistatic

suitable for blister packaging of electronic products

Fire performance

common pvc sheets self-extinguishing, strengthened pvc sheets meet UL94 V-0

Low water absorption

can be used for all wet environments and wet processing equipment

Adsorption ink

good color fastness for printing

Easily fabricated or welded

Application

Printing & sign, thermoforming, blister packaging for commodity, electronic and cosmetics, fabricated parts, protective covers / screen, sight windows, sneeze guards, dust guards, desk dividers, stationery material, machine guards, clothes mould, inner lining, corrosion-resistant tanks for chemical engineering, fume hood, desiccator cabinets, etc.

Specification

Length	610mm, 1000mm, 2000mm, 2440mm, length can be customized
Width	610mm, 700mm, 915mm, 1220mm
Thickness	0.07mm - 30mm
Density	1.36 - 1.4 g/cm ³
Surface	Glossy, frosted, matte, textured
Color	Blue transparent, crystal clear

Additional Services

Protective film

Cover the board with protective film to avoid scratches. Transparent film and custom film with your logo are available. One side or both sides can be covered.

Custom packaging

Our packing materials are as follows, plastic film or PE bags for wrapping, fumigation-free wooden pallet, carton, metal pallet. Custom packaging is available.

Processing services

Cut to size, CNC routing, bevelling, chamfering, laminating, sanding, printing, hot bending, thermoforming, etc..

Options For Customers

For trader, wholesalers, manufacturers

We are glad to provide you with rigid pvc sheet of different grades and performance, such as common sheets, flame retardant reinforced sheets, pvc sheets for thermoforming, printing, folding box, and antibacterial pvc sheets. The size, thickness and density can be customized according to your requirements. Accept mixed specification shipments.

For designers, design companies

Supporting services of "products + processing" is our advantage. The rigid PVC sheet can be customized and produced based on your application requirements. We then process the sheets according to your needs, such as die-cutting, printing, vacuum forming etc., and help to test whether the boards meet your standards. Finally to the product proofing and mass production.

For designers, design companies

Supporting services of "products + processing" is our advantage. The rigid PVC sheet can be customized and produced based on your application requirements. We then process the sheets according to your needs, such as die-cutting, printing, vacuum forming etc., and help to test whether the boards meet your standards. What We Do?

Manufacturing, wholesale and custom processing

Boardway has been one of China's top professional manufacturers of plastic sheets since 2006. For 15 years, Boardway has devoted all its energy to the production of plastic sheets.

We have advanced research and development capability, a stable supply capacity, 8 extrusion production lines for foamed PVC board, which can not only meet the fast delivery, but also meet the orders in large quantity. We also have professional technical support and 24/7 high-quality service.

Custom processing is also what Boardway is good at. We provide customers with customized processing services for all plastic products.

For example, to provide customers in the building and decoration industry with CNC cutting, PUR laminating, sanding, chamfering, etc. Provide silk screen printing, UV printing and die cutting for customers in the advertising industry. Provide customers in the manufacturing industry with thermoforming of thermoplastic materials.

China has a large number of suppliers and different product quality, so how to choose a Chinese supplier? Boardway is willing to help you do supplier selection and resource integration.

We have a natural geographical advantage and can help you to confirm the product quality of each supplier, even visit their factory to check the authenticity. What we can do includes sourcing, prototyping, procurement, module assembly, product testing and improvement.
