

Product Details

PVC Abalone Culturing Sheet

PVC abalone culturing sheet is a transparent PVC sheet with good antibacterial properties and environmental protection. It is used in the growth stage of baby abalone in abalone culturing. The baby abalone grows by attaching to the PVC board.

Polyvinyl chloride (PVC) has good chemical performance, is resistant to acid and alkali, and is not corroded by sea water. Compared with common PVC sheet, PVC sheet with enhanced antibacterial properties can reduce the increase of microorganisms and give abalone babies a healthier growth environment.

In order to ensure a more suitable living environment for baby abalone, it is generally recommended to replace the culturing sheet in 3-4 years.

Compliance

RoHS compliant
REACH compliant

Advantage

Anti-bacterial

give baby abalone a healthier growth environment

Good surface

clean and smooth surface, no impurities, spots and pits

Corrosion resistant

suitable for mariculture and incorrosive

Safety material

non-toxic and odorless, compliance with RoHS and REACH

UV resistant

slow aging for outdoor use and extend the service life

Easily fabricated or welded

heating to melt welding, or welding with PVC welding rod

Additional Services

Cutting services

Cut to size, CNC engraving, hot bending, welding, thermoforming, etc.

Supporting services

Including prototyping, sourcing accessories, module assembly, test and improvement.

Custom packaging

Packed by PE bags and plywood pallet. Custom packaging is available.

What We Do?

Manufacturing, wholesale and custom processing

Boardway has been one of China's top professional manufacturers of plastic sheets since 2006. For 15 years, Boardway has devoted all its energy to the production of plastic sheets.

We have advanced research and development capability, a stable supply capacity, 8 extrusion production lines for foamed PVC board, which can not only meet the fast delivery, but also meet the orders in large quantity. We also have professional technical support and 24/7 high-quality service.

Custom processing is also what Boardway is good at. We provide customers with customized processing services for all plastic products.

For example, to provide customers in the building and decoration industry with CNC cutting, PUR laminating, sanding, chamfering, etc. Provide silk screen printing, UV printing and die cutting for customers in the advertising industry. Provide customers in the manufacturing industry with thermoforming of thermoplastic materials.

China has a large number of suppliers and different product quality, so how to choose a Chinese supplier? Boardway is willing to help you do supplier selection and resource integration.

We have a natural geographical advantage and can help you to confirm the product quality of each supplier, even visit their factory to check the authenticity. What we can do includes sourcing, prototyping, procurement, module assembly, product testing and improvement.
