

## Baby Swimming Pool Filter

### Filter Paper List

| Model No       | Exterior Standard(mm) |                       |                            | Cap material | Internal Tube material | Material                        | Precision (μm) | Area(m2) |
|----------------|-----------------------|-----------------------|----------------------------|--------------|------------------------|---------------------------------|----------------|----------|
|                | External diameter     | Inner/Dental diameter | Total Height               |              |                        |                                 |                |          |
| KTMT-1524-46.5 | φ150                  | φ46.5 Coarse thread   | 243 Coarse thread heigh:22 | Blue plastic | PVC(Round hole)        | White precision polyester fibre | ≤15            | 2.14     |
| KTMT-1524-46.5 | φ150                  | φ46.5 Fin thread      | 243 Fin thread heigh:40    |              |                        |                                 |                | 2.14     |
| KTMT-12335-54  | φ125                  | φ54                   | 335                        |              |                        |                                 |                | 2.20     |
| KTMT-12355-44  | φ125                  | φ44 Coarse thread     | 355                        |              |                        |                                 |                | 3.20     |

PS: The above product can be customized according to customer specifications to produce, if you are interested, feel free to contact us!

### Characteristic:

1. Large filter area and Purification largely water
2. High precision accuracy and Long working life
3. Strong Filter toughness
4. Can be reused after washing
5. Simple installation and convenience
6. Can use for all kind of baby swimming pool

### The scope of application:

1. Single or double filter plastic cover, and this filter use for scumming
2. All kind of baby swimming pool can be reused
3. Filter use for Hotel and SPA
