Model	SR30
Motor Power kW	3
Chamber mm	300*310
Dia*thickness mm	Φ170*10
No. of blades pcs	30
Rotating speed rpm	18
Dimensions mm	1070*890*1820
Power supply	Customization
Weight kg	350
Output range kg/h	200

Hard Drive Shredders

Deleting important files isn't enough. The best way to make sure that no one will ever be able to access confidential information on old hard drives is to destroy them. HARDEN hard drive shredders do just that. Electronic device become a part of life to the human being, they upgrade very fast, so more and more electronic waste generate each days. Computer hard drive are main of them. And most of them have store confidential information, someone will use software to erase the data, but as to know, this way just delete the directories but the actual data will remain, the information can be restored. So shredding is the only 100% secure way to destroy from hard permanently.

Harden now offers mobile computer hard drive shredder with different capacity to meet the growing need for destruction of hard drive. The computer hard drive shredder are also available for other electronic devices, such as cell phones, backup tapes, DVD's and assorted e-waste Shredding is the most effective.

Model	HDS300
Motor Power kW	2.2kw
Cutting Chamber mm	180x50
Working noise bel	≤80
Power supply	Customization
Weight kg	900
Output range pcb/h	90-120
Machine size mm	940*650*1204
Cutter Thickness mm	≤30*50 (mm)
