Optical Control
Optical control function is supported by optional

If the fixture has РНОТО CONTROL function，the Photo Receptacle will be installed on the cover of fixture．See A．Fit the pins of Photo Sensor to Photo Receptacle，firmly insert and rotate Photo Sensor to proper position．

## ＜Verifying＞

Make sure all the connections done and photo control is well installed on the fixture， switch on the power supply and cover the window of photo sensor，wait for 5 seconds， the fixture will be turned on．

## Dimming Optional

Inventronics driver will be used if dimming func．on is requested．
Mul ple dimming func ons are integrated（ $0-5 \mathrm{~V}$ DC or 0－10V DC or PWM Signal or Timer）．
