CARGO CONTROL NETS

Dump Truck Mesh Tarps

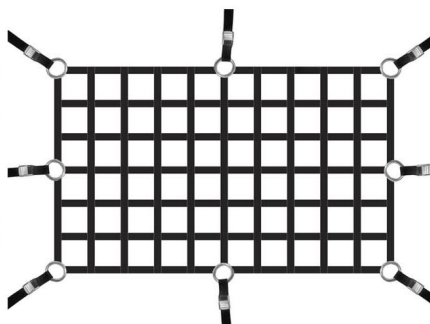

Woven from poly fibers that are coated with PVC resin, these tarps are designed to hold up under recurring and rugged usage. The mesh weave allows air to flow through the tarp, eliminating wind resistance that could cause tears or abrasions. Evenly spaced, rust-proof grommets on the end allow easy tie down and double needle lock stitching assures the strength and durability needed to secure and protect your load. Mesh tarps are best suited for hauling rock, sand, debris, plants, and other loads that need protection but do not require 100% waterproof or windproof conditions.
