BQ PLUS MEDICAL Receives FDA 510(k) Clearance for IV Administration Set and Extension Set

Shanghai, August 20, 2021

BQ Plus Medical Co., Ltd., a professional medical device manufacturer focused on contract manufacturing of IV Administration and Extension Set, announced today that it has received 510(k) clearance for IV Administration Set and Extension Set from the U.S. Food and Drug Administration (FDA).

510(k) cleared IV Administration Sets and Extension Sets include 3-way Stopcock IV Administration Sets, Flow Regulator IV Administration Sets, Needle Free Valve IV Administration Sets, standard bore and microbore extension sets.

"We are pleased to have received 510(k) clearance", said Ronia Cao, BQ Plus Medical CEO, "BQ Plus Medical was founded in 2015, as a recombination of medical business from former Nelson Techno Medical Co., Ltd, which started medical production in 2005. We have been doing OEM manufacturing for US customers since 2016. With our own 510(k), we are looking forward to bring more reliable quality and cost effective IV Administration Sets for use in hospitals, alternative site settings and long-term care facilities."
