Strength supplier

one-stop manufacturer for
MACHINING PLASTIC PARTS

600 × 400 × 345mm

FOLDING STEP START

FOLDED

MATERIAL

- 100% virgin PP
- Can be recycled
- From SINOPEC-

The best supplier

PP

Polypropylene is a non-toxic, odorless and tasteless milky-white high crystalline polymer with a density of only 0.90 ~ 0.91g/cm³, which is one of the lightest varieties of all plastics at present. It is especially stable for water. Its water absorption in water is only 0.01%, and its molecular weight is about 9 in case of 100 thousand. It has good formability, but the shrinkage rate is large (15%~2.5%). Thermo-resistant products are easy to melt. For some parts with high dimensional accuracy, it is difficult to meet the requirements, and the surface gloss of the products is good.

100% VIRGIN PP
