GPBOTTLES, CREATING IN CHINA

GP Bottles specializes in providing ready stock perfume bottle solutions for niche perfume brands and startup companies. We understand the limitations of traditional trading models, so we innovatively launched the ready stock inventory model to solve the actual needs of small batch customers.

Our mission is to empower small and medium-sized perfume brands by offering high-quality, readily available packaging solutions, coupled with flexible ordering and fast delivery. We aim to be your reliable partner in bringing your unique fragrances to market efficiently.

Your Trusted Partner for Perfume Bottles Solutions

To empower niche perfume brands and small businesses by providing accessible, high-quality, and innovative perfume packaging solutions.

About Us

Our Story: From Factory Floor to Global Partner

Over the past 10 years, Mr. Ben has worked extensively in a leading glass bottle factory, gaining invaluable insights into the intricate world of perfume packaging. His role involved serving major brand perfume companies, collaborating with their in-house design teams, and managing the production of large-scale orders for sophisticated perfume packaging solutions.

During his tenure, Ben frequently observed a recurring challenge: numerous emerging and niche perfume brands, despite their innovative fragrances, often struggled with original packaging designs. This limitation significantly constrained their brand growth and market differentiation. Recognizing this unmet need, Ben envisioned a solution to empower these brands.

Since 2016

Our Story: Our Journey, Our Values, Your Success

In 2016, driven by a passion for design and a commitment to supporting burgeoning businesses, Ben, alongside his trusted partners Bryan and Dexter, founded GP Bottles.

Their mission was clear: to bridge the gap between high-quality, unique packaging and the specific requirements of smaller order quantities, making exceptional perfume packaging accessible to all.
