Power Base X20-B is a high voltage battery system acquired flexible modular design with no extra cables, which provides optimized safety, life span and performance. They are perfect batteries for all applications.

Each set of Power Base Mate contains up to 5 battery module PBL-2.56 in series connection and achieves usable capacity between 5.12 to 25.6 kWh.

PLUG&PLAY

Convenient and flexible

FLEXIBLE

Modular rack design for easier installation and smaller landscape

INTELLIGENT BMS

Intelligent BMS to ensure a safe reliable operation

SAFE AND RELIABLE

Adopt high safety, long life, excellent performance LiFePO4 prismatic cells

LONG LIFE SPAN

Over 4000 times of cycle life

INTERCONNECTION

Multiple communications including RS485, CAN

ECO FRIENDLY

No outgassing and zero ambient emissions

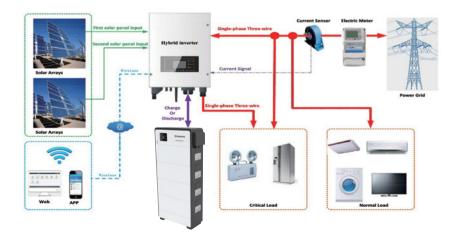

EXPANDABLE

Parallel on cabinet level available

AC Coupled Solar System

Power Base X20-B can compatible well with energy storage inverters

Residential grid-tie solar with backup power

Secure power for your home during grid outages by retrofitting your grid-tied system with backup power using proven GARAYE's solutions.

Off-grid power supply

Cut your consumption peak and save money by reducing loads. When the grid is offline, the storage system should automatically switch to off-grid powering in less than 1s, for external emergency load powering.

Community electrification

Cut your consumption peak and save money by reducing loads.

Self-consumption

Extra PV power for battery charging. When PV power is low or none, load consumption should take power from the battery first, and from the grid as little as possible.

Backup power

Respond to external power code control in less than 1s, which is sufficient for frequency regulation and peak shaving among areas.
