

GPC4 / 10 / 12

PE Guillotine Cutter

Design Features

- Suitable for cutting PE pipes both in trenches and on open ground (PVC and PP are not available)
- Squarest cut available, within 1/8" (3 mm) on medium and high density pipe, due to strong frames and unique blade design
- Saves facing cost: no facing needed for electrofusion, less needed for butt fusion
- GPC10 cuts up to 10" (250mm) instead of traditional 8"(225mm)
- GPC12 cuts up to 12" (355 mm)
- Requires minimal clearance, only 4"-6" (102-152 mm) around pipe
- Clean and safe! No chips to clog valves and apertures
- The blade is made of reinforced mold steel, coated with hard chrome, making it super easy to cut without sticking
