HC-1X

Pipe Hole Cutting Machine

Design Features

- The Model HC-1X Pipe Hole Cutter is designed to cut holes up to 4" into steel pipe.
- The HC-1X has a 5/8" capacity drill chuck to accommodate all sizes of hole saws and hole saw arbors. An integral motor and gear reduction optimizes performance of large diameter hole saws.
- The two feed handles allows the operator to use the Pipe Hole Cutter from either the left or right side. A rotating leveling vial in the base allows repeated holes to line up.
- Only 11" high, the compact design, allows the HC-1X to be used in tight quarters or above installed pipe close to ceilings.
