MAIN PRODUCTS

企业产品

企业产品

COMPANY INTRODUCTION

1.

Main Products-Silicone Keypads

It is made of silicone material through oil pressure molding, spraying, silk screen printing, laser engraving and other production processes.

The surface feels softer than other buttons, the process is relatively simple and the cost is low. It is widely used in TV remote controls, POS machines, telephones, electronic toys and other electronic products.

2.

Main Products-**Silicone Parts**

Mainly include: silicone parts, silicone sheath, silicone sealing ring

Mainly used in: remote control, POS machine, bank password device, automotive electronics, heavy machinery equipment, control panel, game console, electronic dictionary, learning machine and other instruments and equipment products.

企业产品

COMPANY INTRODUCTION

3.

Main Products-Silicone Patches

Liquid silicone material is used to dispense various colors into the mold through a glue dispenser for heating and curing, and then solid silicone is used for molding.

The silicone products with multi-color surfaces are mostly used in silicone gifts, decorative accessories, and children's toy accessories.

ENTERPRISE DEVELOPMENT

01

Dongguan Bohao Electronic Technology Co., Ltd. was founded in 2010 and rapidly expanded its operations, acquiring a new factory and increasing its machinery by 2012.

02

In 2013, Bohao Electronics expanded its operations by acquiring Guangzhou Heli Rubber and Plastics. The following year, in 2014, the company underwent a restructuring process and established Jianhao Electronics.

03

In 2015, the company began a product line optimization. The following year, the workshop was upgraded to a cleanroom and old machinery was replaced. In 2018, a mold manufacturing department was established, equipped with 10 CNC machines and 4 spark machines, allowing the company to start producing molds in-house.

04

In 2021, 8 new Haitian injection molding machines were added to support the silicone product line. In 2022, the factory's equipment continued to expand, with the addition of a 400 kVA transformer. The same year, the number of CNC machines in the mold manufacturing department increased to 12.

05

In 2023, to expand our product line, we established a resin casting division and a silicone patch division. Each division is equipped with 8 dispensing machines, 8 hydraulic presses, and 8 patch forming machines.
