Pick To Light System ---SETP_Label_V23

Pick to Light

E-commerce Warehouse

Intelligent Manufacturing

Intelligent Warehousing

Innovation Point

- 2.9 inch e-ink screen display
- Buttons and three-color high-brightnessLED indicator
- Extra long battery life, usually more than3 years of use
- Faster response, no screen flicker
- Large button, supports shooting light button
- Expandable control light strip or lock, expandable input detection
- Minimalist strong magnetic installation

Summary of picking system

The electronic label picking system is a logistics auxiliary operation system developed using advanced electronic technology and communication technology. It is usually used in the sorting process of warehousing or modern logistics centers. It has the characteristics of fast picking speed, high efficiency, low error rate and paperless, standardized operating characteristics. As an advanced operating method, the electronic label-assisted picking system is more efficient when used in conjunction with a warehouse management system (WMS) or other logistics management systems.

The electronic label picking system is a set of electronic equipment installed on the shelf storage space. It is controlled by computers and software, and uses indicator lights or digital displays as auxiliary tools to guide pickers to complete their work correctly, quickly and easily.

Characteristics and benefits

Electronic Pick Tag

Receive and analyze the data information sent by the router, make corresponding instructions, and click the button to complete the picking.

- 2.9-inch e-ink screen
- Comes with 4 buttons
- The label ID is displayed on the front
- Wireless communication 868M,
 frequency hopping communication
- Communication rate 200K/50K
- Covering a communication radius of more than 30 meters
- Multi-color LED highlight indicator
- Resolution 296*128, support character, bar code, two-dimensional code display
- Dimensions: 156*48*20mm
- Two power supply modes are available: 1. AA*4 battery power supply and 2. 24V external power supply
- Custom two-way communication protocol, safe and reliable
- Interface protocol: HTTP & Json

Model: SETP_Label_v23

Electronic Pick Tag

SETP_Label	V23	(Battery	Power	Supp	oly)
------------	------------	----------	--------------	------	-----	---

,	
Model	SETP_Label_V23_B
Dimension	156x48x20mm
Screen Size	2.9 inch
Resolution	296*128
Pixel Density	112dpi
Display Technology	Full Graphic E ink Display
Pixel Color	Black & White
Case Color	White & silver gray
Button	4 Buttons
Indicator Light	4 RGB Lights
LED Color	7Colors(Red/Green/Blue/Yellow/purple/white/cyan)
Working Temperature	0~50°C
Operating Frequency	868MHz
Viewing Angle	Nearly 180°
Displayable content	Text/Picture/Barcode/QRcode
Battery	Battery power (AA Battery*4)
Battery Lifetime	>3year (10 times per day)
Communication Mode	Wireless
Extended Interface	1 input pin
Compliance	CE, RoHS
Wireless Firmware Update	Yes
Template design DIY	Yes
Mounting Type	magnetic mounting
Communication equipment	Controller: SETP_ Router_V1.4/ SETP_ Router_V1.2

System Structure V1.2(External Power Supply)

The electronic label picking system sends instructions through a PC or scanner, forwards them through a router, and controls the LED lights or screens on the electronic labels to guide the pickers to accurately and quickly pick the corresponding goods at the designated location.

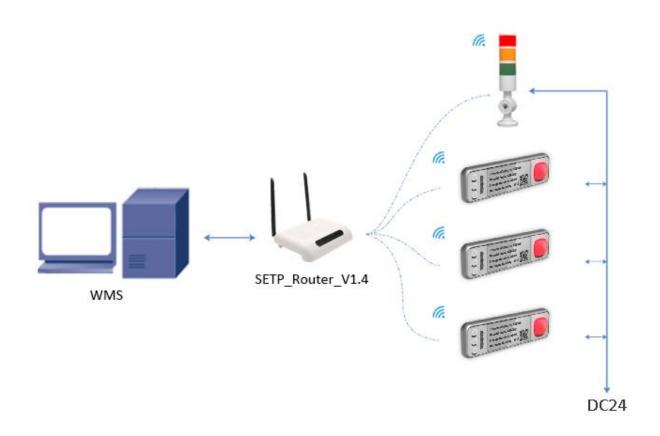

System Structure V1.2(Batteries Supply)

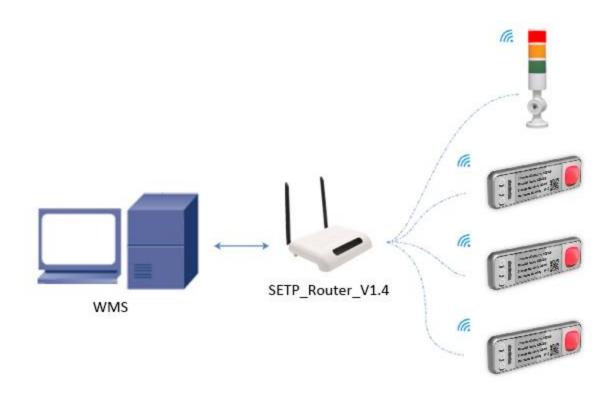

System Structure V1.4 (External Power Supply)

Note: The V1.4 version of the base station has a built-in server program. Users only need to send operating instructions to the base station to realize data transfer, making it easier to use.

System Structure V1.4 (Batteries Supply)

Power Supply Type

Two power supply modes:

1.Powered by AA*4 battery pack (battery version)

2.DC24V external power supply (external power supply version)

Installation Method

Magnetic fixed installation:

Very simple strong magnetic mounting

Installation Method

Corresponds to the slot size 129*42mm

1. Paste and secure

2. Magnetic fixation

3. Track groove fixing

Physical Display

Router

Receive the operation instructions issued by the PC, analyze them and then send them to the electronic tag through RF.

- Wireless communication distance 30m
- Wireless communication rate 200kbps
- Network communication rate 10/100 Mbps
- Custom two-way data communication protocol to ensure data transmission speed and accuracy
- There is no upper limit for covering electronic labels
- Supports synchronization of multiple routers
- Parallel communication, safe and fast
- Omnidirectional transmission, no dead ends
- Support online software upgrade
- Operating system: linux
- Supports POE power supply or external DC12V power supply

Tag controller

Model: SETP_Router_V1.2

The V1.2 base station has an independent routing function and needs to cooperate with the label server.

Model: SETP_Router_V1.4

The V1.4 version base station comes with its own server program and can directly accept instructions.

Tower Light with Buzzer

Wirelessly receive the data information sent by the router and analyze it, make corresponding instructions and cooperate with the picking lane prompts.

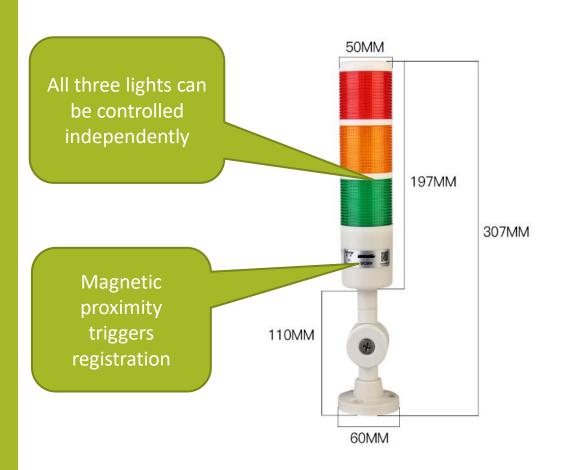

- Used with label picking
- All three lights (red, yellow and green) can be controlled independently
- Wireless communication 868M, frequency hopping communication
- Communication rate 50K
- Covering a communication radius of more than 30 meters
- Multi-color LED highlight indicator light
- 24V external DC power supply, maximum current <0.2A
- Built-in buzzer, controllable by command

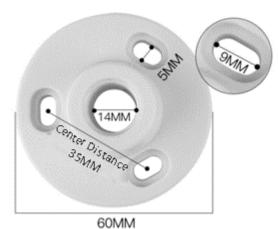

Tower Light with Buzzer Model: SETP_Label_V9

Tower Light with Buzzer

DC5.5 * 2.1
Power supply DC24V, <0.2A

Manual

Initial: Set the server and label parameters

Step 1: The customer sends the picking information to the label server

Step 2: The server parses the command requirements and wirelessly lights up the tunnel lights and tags

Step 3: Pick items according to the illuminated label and press the confirmation button to turn off the light, and the screen content is updated with the result after the operation.

System Functions

- Supports tag registration usage
- Single light lighting interface
- Light up in batches
- Light up result query
- Button feedback
- Tag inspection
- Tag inspection result query
- Support online software upgrade
- Large coverage radius, unlimited number of nodes
- Intelligent routing and transmission, sufficient communication tolerance
- Rich and complete management background, the status of each device is under control

Multifunctional Operation Interface

Through the background management interface, comprehensive management, control and operation of information are achieved.

- Multi-account management background
- Web-based software, you can remotely control tags by entering the URL
- Real-time viewing of base station and tag status
- Label display style template customization
- Import user product data table
- Quick screen refresh and lighting operations
- Simple docking interface (HTTP & Json)
- System software supports cloud and local private server deployment
