

# High Speed And High Precision Automatic Weighing Machine

## Product Features

- ① Powerful calculation function, recording various test data;
- ② Three-level operation authority management, supporting self-set passwords;
- ③ Touch screen operation, humanized design;
- ④ Adopting variable frequency control motor, the speed can be adjusted according to needs;
- ⑤ The conveyor belt is easy to disassemble and install, easy to install and maintain, and easy to clean.

- Suitable for small packages weighing  $\leq 5\text{kg}$   
 Belt speed  $\leq 120\text{ m/minute}$   
 Accuracy  $\pm 3\text{--}5\text{ grams}$

## Product technical parameters

Product model	SC2-L-6055S5	Storage Formula	1 type
Display division	0.1g	Belt Speed	5-120m/min
Inspection weight range	1-5000g	Power Supply	AC220V $\pm$ 10%
Weight checking accuracy	$\pm 1\text{--}5\text{g}$	Shell Material	Stainless steel 304
Size of weighing section	L 600mm*W 550mm	Data Transmission	USB data export
Suitable product size	L $\leq$ 400mm; W $\leq$ 400mm	Sorting Section	Standard 2 section, optional 3 sections
Elimination method	Push rod, toggle, and balance wheel options are available		
Optional Features	Real time printing, code reading and sorting, online code spraying, online code reading, and online labeling
