

Why We Are Safe to Work With

A manufacturing partner built for long-term, repeatable supply

Established Manufacturing Background

Established in **1998**, **Ningbo Xiesheng Lighting** has over two decades of experience in aluminum processing and professional lighting manufacturing.

Dual Manufacturing Footprint (China & Cambodia)

Dual manufacturing footprint in **China** and **Cambodia** provides flexibility, risk diversification, and stable long-term supply.

Focus on Repeatable Products, Not One-off Projects

We focus on products designed for **repeat orders**, rather than one-time or experimental projects.

Controlled Manufacturing & Quality Logic

Standardized production processes and controlled quality checkpoints ensure consistent performance.

LED:200+ CNC Machining Centers | 200+ Design Patents

20,000+ m² Manufacturing Facility | 250+ Skilled Technicians | 15+ Engineers

Quality is managed through **process control**, not post-correction. Problems are prevented during production, not fixed afterward.

Manufacturing & Quality Control

Predictable manufacturing for consistent product performance

In-house Research & Development Process

① Concept Design

Operating since 1998, Ningbo Xiesheng Lighting has over two decades of experience in aluminum processing and lighting manufacturing.

② Prototyping & Samples

Prototypes and functional samples are produced based on finalized design specifications.

③ In-house Testing

Extensive performance and lifespan testing conducted by our internal lab to ensure durability and safety.

④ In-house Key Processes

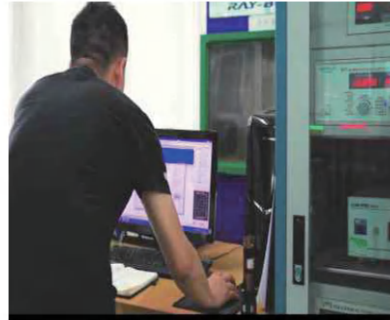

Key manufacturing and testing steps completed in-house, ensuring direct control over quality & production rhythm.

⑤ Batch Consistency

Each batch follows the same assembly and inspection logic to maintain consistent performance and facilitate repeat orders.

⑥ Risk & Issue Management

Controlled quality checkpoints and stringent inspection logic ensure issues are caught early and managed to minimize risk.

QC is built into every process step, not inspected at the end.

Why We Are Good At — For Long-Term Partners

Helping you streamline stable production, not just pass compliance checks.

Production-Ready R&D

R&D focused on production-ready designs, not lab concepts.

- ✓ Production-ready from early stage
- ✓ Fewer redesign loops
- ✓ Faster time to stable mass production

Compliance Checklist

- ✓ ISO 9001 certified
- ✓ UL-ready design
- ✓ RoHS compliant
- ✓ Amfori BSCI audited

Compliance is a baseline, not a selling point.

Proven manufacturing track record

- ✓ More than two decades of manufacturing experience
- ✓ Stable team structure without high turnover
- ✓ Long-term, reliable supplier relationships

Cooperation Models:

OEM | ODM | Co-development

*R&D aimed at fewer revisions
and faster time-to-market.*

*Over twenty years of continuous
operations and stable partnerships.*

One Product Platform.

Multiple Ways to **Work Together.**

Designed for low-risk entry today, and scalable cooperation tomorrow.

Core/Foundation Products

**Low-risk entry.
Built for repeat orders.**

- ✓ Mature, proven platforms
- ✓ Stable BOM & standardized structure
- ✓ Designed for long-term repeat supply.

Ideal starting point for
OEM and core assortments.

Enhanced/Better Products

**Improved usability.
Same supply stability.**

- ✓ Inspection & compact work lights
- ✓ More flexible form factors
- ✓ Easy to introduce as step-up SKUs

Built on the same quality
system as core products.

Application-Specific Professional Products

**Application-driven.
Validation required.**

- ✓ Inspection & compact work lights
- ✓ More flexible form factors
- ✓ Easy to introduce as step-up SKUs

Developed step by step,
based on validated applications.

Start with Core → Scale with Enhanced → Differentiate with Application-specific
